

# Oracle Energy and Water Architecture board

**The Oracle Energy and Water architecture board brings the full power of Oracle as a service to facilitate a smooth and successful implementation. We've established and led architecture boards for multiple utilities during their implementation of Oracle Energy and Water applications.**

## Contributing to project governance effectiveness

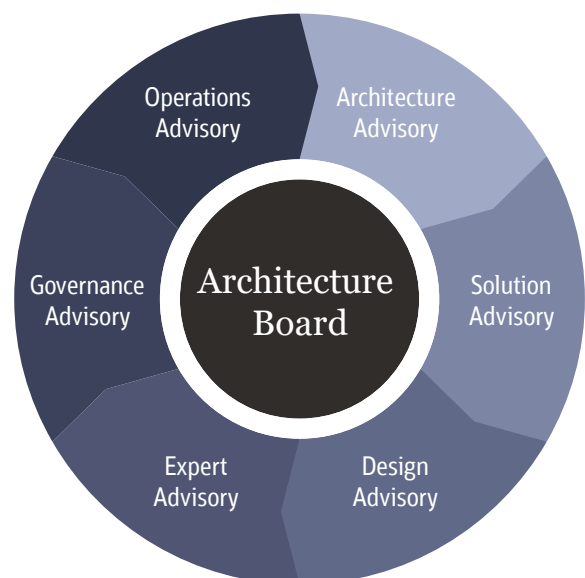

Our architecture board can bolster your project governance structure and processes by providing the following:

- An overarching authority to review and assist in decision-making on the interdependent technologies and evaluating the specific project impacts
- Deep involvement of experienced subject matter consultants from the vendor throughout the project as deliverables are completed and key decisions are made
- Creative thinking derived from industry and project delivery experience, as well as in-depth familiarity with the product roadmap
- Standards and processes for overall program performance, productivity, and measurement
- Guidance on aligning overall architecture and designs with the base product

## Designed around six pillars

The six pillars of Oracle's architecture board services are designed to cover functional and technical aspects of your implementation.

1. Architecture advisory
2. Solution advisory
3. Design advisory
4. Expert advisory
5. Governance advisory
6. Operations advisory

## The objectives of each pillar

### Architecture advisory

Gain confidence in your proposed technical architecture based on Oracle's experience and knowledge.

### Solution advisory

Get peace of mind that your business requirements will be met by maximizing Oracle product capabilities instead of building customizations to match old processes.

### Design advisory

Trust that your functional designs align with the proposed solutions, expected outcomes, and the Oracle product roadmap.

### Expert advisory

Receive expert advice from Oracle specialists in relevant focus areas to ensure the best use of products and applications.

### Governance advisory

Benefit from ongoing guidance on best practices from Oracle subject matter consultants, derived from years of experience.

### Operations advisory

Tap into Oracle's expertise in utilities operations to put in place a suitable plan for a smooth deployment and continued operational stability.

Oracle's architecture board team will work alongside your project team and system integrator, providing insight into implementation strategies, architectures, designs, and recommendations that encompass all your Oracle Energy and Water solutions.

## Solutions made easy

Energy and water are our business. We provide specialized knowledge, expertise, and technical skills to deliver end-to-end solutions, enabling your team to get the most from our platform and applications.

Our team is ready and waiting to discuss our services and how we can support your success.
