Summary of significant accounting policies [Refer note 2]

The accompanying notes form an integral part of the financial statements.

For and on behalf of the Board of Directors of Mantas Inc.

Bala Hari Director

# Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

### Note 1: Corporate information

Mantas Inc. ("the Company") was incorporated as a corporation registered in Delaware, United States of America on May 24, 2001. The Company is a subsidiary of Oracle Financial Services Software America, Inc. ("OAI") holding 100% (March 31, 2021 – 100%) ownership interest in the Company as at March 31, 2022.

The Company is principally engaged in the business of providing information technology solutions and business processing services to the financial services industry worldwide.

### Note 2: Summary of significant accounting policies

## 2.1 Basis of preparation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards ("Ind AS") specified under section 133 of the Companies Act, 2013 (the "Act") read with the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time. These financial statements have been prepared on the request of Oracle Financial Services Software Limited, the Holding Company to comply with the financial reporting requirements in India.

As the Company is not domiciled in India and hence not registered under the Act, these financial statements have not been prepared to fully comply with the Act, and so they do not reflect all disclosure requirements of the Act.

These financial statements have been prepared under the historical cost convention on an accrual and going concern basis except for certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments) and share-based payments.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in accounting policy hitherto in use.

### 2.2 Summary of significant accounting policies

The significant accounting policies adopted by the Company, in respect of the financial statements are set out as below:

### (a) Property, plant and equipment, capital work-in-progress and depreciation

### Property, plant and equipment and capital work-in-progress

All items of property, plant and equipment and capital work in progress, are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment, if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognized in the statement of profit and loss as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met. All additions during the reported year are considered at cost.

The Company purchases certain specific-use application software, which is in ready to use condition, for internal use. It is estimated that such software has a relatively short useful life, usually less than one year. The Company, therefore, charges to the statement of profit and loss the cost of acquiring such software.

# Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

### Depreciation

Depreciation is computed as per the straight-line method using the rates arrived at based on the useful lives estimated by the management.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

### (b) Impairment of non-financial assets

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal / external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's or cash generating units' ('CGU') fair value less cost of disposal, and its value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to assets.

In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are validated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators. The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit and loss.

### (c) Foreign currencies

The functional currency of the Company is US Dollar.

### Transactions and balances

Transactions in foreign currencies are initially recorded by the Company at the functional currency using spot rates on the date the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange differences arising on settlement or translation of monetary items are recognized in the statement of profit and loss.

### (d) Research and development expenses for software products

Research costs are expensed as incurred. Software product development costs are expensed as incurred unless technical feasibility of project is established, future economic benefits are probable, the Company has an intention and ability to complete and use or sell the software and the cost can be measured reliably.

# Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

Software product development costs incurred subsequent to the achievement of technical feasibility are not material and are expensed as incurred.

### (e) Revenue recognition

Revenue is recognized upon transfer of control of promised services to customers in an amount that reflects the consideration that the Company expects to receive in exchange for those services. The Company has concluded that it is the principal in its revenue arrangements because it typically controls the goods and services before transferring them to the customer.

The Company presents revenues net of indirect taxes in its statement of profit and loss.

Trade receivables represents the Company's rights to an amount of consideration that is unconditional. Revenue in excess of billing is classified as contract asset i.e. unbilled revenue while billing in excess of revenue is classified as contract liability i.e. deferred revenue. Contract assets are classified as unbilled receivables when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms. Unbilled revenues are classified as non-financial asset if the contractual right to consideration is dependent on completion of contractual milestones.

Deferred contract costs are incremental costs of obtaining a contract which are recognized as assets and amortized over the benefit period.

### (f) Income tax

### Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operate and generate taxable income.

Current income tax relating to items recognized outside statement of profit or loss is recognized either in other comprehensive income or in equity. Current tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax assets and current tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities.

### Deferred tax

Deferred tax is provided on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries and associates, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

# Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries, and associates, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized either in other comprehensive income or in equity as applicable. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Appendix C to Ind AS 12 Uncertainty over Income Tax Treatments:

The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of Ind AS 12 and does not apply to taxes or levies outside the scope of Ind AS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments. The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

The Company has determined whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed. In determining the approach that better predicts the resolution of the uncertainty, an entity might consider, for example, (a) how it prepares its income tax filings and supports tax treatments; or (b) how the entity expects the taxation authority to make its examination and resolve issues that might arise from that examination.

# Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

### (g) Non-current assets held for sale

The Company classifies non-current assets as held for sale if their carrying amounts shall be recovered principally through a sale rather than through continuing use. Sale transactions shall include exchanges of non-current assets for other non-current assets when the exchange has commercial substance.

Non-current assets held for sale are measured at the lower of their carrying amount and the fair value less costs to sell. Assets and liabilities classified as held for sale are presented separately in the balance sheet.

Property, plant and equipment once classified as held for sale are not depreciated or amortized.

All other notes to the financial statements primarily include amounts for continuing operations, unless otherwise mentioned.

## (h) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value so as to maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

At the reporting date, the Company analyzes the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the accounting policies. For this analysis, the

# Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

Company verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.

The Company also compares the change in the fair value of each asset and liability with relevant external sources to determine whether the change is reasonable.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

## (i) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. The Company recognizes a financial asset or a liability in its balance sheet only when the entity becomes party to the contractual provisions of the instrument.

### **Financial assets**

### Initial recognition and measurement

Financial assets are classified, at initial recognition, as financial assets measured at amortized cost, fair value through other comprehensive income or fair value through statement of profit or loss as appropriate. All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through statement of profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

### Subsequent measurement

For purposes of subsequent measurement, financial assets of the Company are classified in three categories:

- Debt instruments measured at amortized cost
- Debt instruments at fair value through other comprehensive income ('OCI')
- Debt instruments, derivatives and equity instruments at fair value through statement of profit or loss

### Debt instruments measured at amortized cost

This category is the most relevant to the Company. Debt instruments are measured at amortized cost if the asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and the contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. These financial assets are amortized using the effective interest rate (EIR) method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the statement of profit and loss. The losses arising from impairment are recognized in the statement of profit and loss.

### Debt instruments at fair value through OCI

Debt instruments are measured at fair value through other comprehensive income if the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The Company has not designated any financial assets at fair value through OCI.

# Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

### Debt instruments at fair value through profit or loss

Debt instruments at fair value through statement of profit or loss include assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments as defined by Ind AS 109 – Financial Instruments. Debt instruments at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognized in the statement of profit and loss.

### Derecognition

A financial asset is derecognized i.e. removed from the Company's statement of financial position when:

- The contractual rights to the cash flows from the financial asset expired or
- The Company has transferred its contractual rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognize the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

### Impairment of financial assets

The Company applies expected credit loss ('ECL') model for measurement and recognition of impairment loss on the financial assets and credit risk exposure. For trade receivables the Company follows 'simplified approach' for recognition of impairment loss allowance. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

The Company uses a provision matrix to determine impairment loss allowance on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. Further, the trade receivables

## Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

have customer concentration across the globe and therefore the Company also considers the socioeconomic conditions of the regions where the customers are located.

At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

### Impairment of investments

The carrying amounts of investments are reviewed at each balance sheet date if there is any indication of impairment based on internal / external factors. An impairment loss is recognized wherever the carrying amount of an investment exceeds its recoverable amount.

#### Interest income

Interest income is recognized using the effective interest method.

### **Financial liabilities**

### Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at amortized cost or financial liabilities at fair value through profit or loss, as appropriate. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade payables, accrued expenses, accrued compensation to employees, advance from customers, amounts due to subsidiaries, dividend and dividend tax payable along with unpaid dividends.

#### Subsequent measurement

The Company measures all financial liabilities at amortized cost except for financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR.

Financial liabilities held for trading are measured at fair value through profit or loss. The Company has not designated any financial liability as at fair value through profit or loss.

### Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit and loss.

### **Embedded derivatives**

An embedded derivative is a component of a hybrid (combined) instrument that also includes a nonderivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a standalone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a nonfinancial variable that the variable is not

## Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109 – Financial Instruments, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognized in profit or loss, unless designated as effective hedging instruments.

### (j) Leases

### Company as a Lessee

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

The Company recognizes right-of-use asset and a corresponding lease liability for all lease arrangements in which the Company is a lessee, except for a short term lease of 12 months or less and leases of lowvalue assets. For short term lease and low-value asset arrangements, the Company recognizes the lease payments as an operating expense on straight-line basis over the lease term.

Certain lease arrangements include the options to extend or terminate the lease before the end of the lease arrangement. Right-of-use assets and lease liabilities are measured according to such options when it is reasonably certain that the Company will exercise these options.

The right-of-use asset are recognized at the inception of the lease arrangement at the amount of the initial measurement of lease liability adjusted for any lease payments made at or before the commencement date of lease arrangement reduced by any lease incentives received, added by initial direct costs incurred and an estimate of costs to be incurred by the Company in dismantling and removing the underlying asset or restoring the underlying asset or site on which it is located. The right-of-use assets are depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. Estimated useful life of right-of-use assets is determined on the basis of useful life of property, plant and equipment. Right-of-use assets are tested for impairment whenever there is an indication that their carrying value may not be recoverable. Impairment loss, if any is recognized in the statement of profit and loss account.

The lease liability is measured at amortized cost, at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease arrangement or, if not readily determinable, at the incremental borrowing rate in the country of domicile of such leases. Lease liabilities are remeasured with corresponding adjustments to right-of-use assets to reflect any reassessment or lease modifications.

### Company as a Lessor

Leases for which the Company is a lessor is classified as finance or operating lease. If the terms of the lease arrangement transfers substantially all the risks and rewards of ownership to the lessee, such lease arrangement is classified as finance lease. All other leases are classified as operating leases.

# Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

In case of sub-lease, the Company recognizes investment in sub-lease separately in the financial statements. The sub-lease is classified as a finance or operating lease by reference to the right-of-use asset arising from such lease arrangement. For operating leases, rental income is recognized on a straight-line basis over the term of the lease arrangement.

### (k) **Provisions**

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

## (l) Earnings per share

The earnings considered in ascertaining the Company's earnings per share comprise the net profit after tax. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the year. The number of shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving basic earnings per share, and also the weighted average number of shares, if any which would have been issued on the conversion of all dilutive potential equity shares. The weighted average number of shares and potentially dilutive equity shares are adjusted for the bonus shares and sub-division of shares. For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

### (m) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and short term investments with an original maturity of three months or less.

### 2.3 Recent accounting pronouncements

### Standards issued but not yet effective

The Ministry of Corporate Affairs (MCA) vide the Companies (Indian Accounting Standards) Amendment Rules, 2022 has notified Ind AS 16 and Ind AS 37 on March 23, 2022:

### Ind AS 16 Property Plant and equipment

The amendment is applicable to the Company from financial year beginning April 1, 2022.

The amendment clarifies that excess of net sale proceeds of items produced over the cost of testing, if any, shall not be recognized in the statement of profit or loss but deducted from the directly attributable costs considered as part of cost of an item of property, plant, and equipment.

The Company has evaluated the amendment and there is no impact on its standalone financial statements.

# Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

### Ind AS 37 Provisions, Contingent Liabilities and Contingent Assets

The amendment is applicable to the Company from financial year beginning April 1, 2022, although early adoption is permitted.

The amendment specifies that the cost of fulfilling a contract comprises the costs that relate directly to the contract. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract or an allocation of other costs that relate directly to fulfilling contracts.

The Company has evaluated the amendment and the impact is not expected to be material.

## Note 11: Disclosure on revenue from operations

Since the Company has not earned any revenue during the year ended March 31, 2022 and March 31, 2021 disclosures as per Ind AS 115 are not applicable.

#### **Note 12: Segment Information**

#### **Business Segments**

The Company prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole. Segments are reported in a manner consistent with the internal reporting provided to the Board of Directors i.e. Chief Operating Decision Maker (CODM) who evaluates the Company's performance and allocates resources based on an analysis of various performance indicators by reportable segments. The Company operates under a single reportable segment. Accordingly, the amounts appearing in these financial statements relate to this primary business segment.

#### Geographical Segments

The Company operates and rendered services to customers in USA and thus operates only one single geography.

#### Note 13: Reconciliation of basic and diluted shares used in computing earnings per share

	(	(Amounts in USD except share data) Year ended March 31,	
	2022	2021	
(Loss) / Profit for the year attributable to equity shareholders (A)	586	(5,019)

Add: Effect of dilutive stock options	-	-	
Weighted average shares outstanding for diluted earnings per share (B)	100	100	
Earning Per Share (C) = $(A/B)$ (Basic & Diluted)	6	(50)	

# Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

### Note 14: Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

The key assumptions and estimate at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are described below. These assumptions and estimates are based on available parameters as on the date of preparation of financial statements. These assumptions and estimates, however, may change due to market changes or circumstances arising that are beyond the control of the Company.

### (i) Taxes

Income tax expense comprises current tax expense and the net changes in the deferred tax asset or liability during the year. Significant judgements are involved in determining the provision for income taxes, including amount expected to be paid/recovered for uncertain tax positions, including disclosures thereof.

### (ii) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

### Note 15: Capital commitments and contingent liabilities

	(Amounts in USD)		
Particulars	March 31, 2022 March 31, 2021		
a) Capital commitments towards			
i) property, plant and equipment	Nil	Nil	
b) Contingent liabilities	Nil	Nil	

#### Note 16: Financial risk management objectives and policies

The Company's activities expose it to market risks, Liquidity risk and credit risks. The management oversees these risks and is aided by the Risk Management Committee whose scope is to formulate the risk management policy, which will identify elements of risk, if any which may affect the Company.

#### (a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk mainly comprises of foreign currency risk.

## Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

### • Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of monetary items will fluctuate because of changes in foreign exchange rates. This may have potential impact on the statement of profit and loss and other components of equity, where monetary items are denominated in a foreign currency, which are different from functional currency in which they are measured.

As at the balance sheet date, the Company's net foreign currency exposure expressed in USD that is not hedged is USD (36,939) (March 31, 2021 USD (37,681)).

Following are the carrying amounts of foreign currency denominated monetary items (net) of the Company where it has significant exposure as at the balance sheet date:

	(Amounts in	n USD)
Currency	31-Mar-22	31-Mar-21
SGD	(23,394)	(23,497)
GBP	(13,545)	(14,184)

### • Foreign currency sensitivity

Below table demonstrates sensitivity impact on Company's profit after tax and total equity due to change in foreign exchange rates of currencies where it has significant exposure:

Currency	()	(Amounts in USD)			
	31-Mar-2	31-Mar-22		31-Mar-21	
	+1%	-1%	+1%	-1%	
SGD	(185)	185	(186)	186	
GBP	(107)	107	(112)	112	

The above sensitivity impact gain (loss) is due to every percentage point appreciation or depreciation in the exchange rate of respective currencies, with all other variables held constant. Sensitivity impact is computed based on change in value of monetary assets and liabilities denominated in above respective currency, where the functional currency of the entity is a currency other than above respective currency and entities with functional currency as above respective currency where transactions are in foreign currencies.

#### (b) Liquidity risk

Liquidity risk management implies maintaining sufficient availability of funds to meet obligations when due and to close out market positions. The Company monitors rolling forecast of the cash and cash equivalent on the basis of expected cash flows.

# Notes annexed to and forming part of unaudited financial statements for the year ended March 31, 2022

The table below summarizes the maturity profile of the Company's financial liabilities:

	(Amour		
Particulars	Less than 1 year	More than 1 year	Total
As at March 31, 2022			
Amount due to subsidiaries	-	27,004	27,004
	-	27,004	27,004
	(A	Amounts in USD)	
Particulars	Less than	More than	Total
	1 year	1 year	Total
As at March 31, 2021			
Amount due to subsidiaries	27,004	-	27,004
	27,004	-	27,004

#### (c) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily financial assets).

#### Note 17: Capital management

For the purpose of the Company's capital management, capital includes issued equity share capital, share premium and all other equity reserves attributable to the equity shareholders of the Company. The primary objective of the Company's capital management is to maximize the equity shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and other financial requirements.
