Auditors' Report

PCPAR (2019) No.ZA40824

To shareholders of Oracle Financial Services Software (Shanghai) Limited,

Opinion

We have audited the accompanying financial statements of Oracle Financial Services Software (Shanghai) Limited (hereafter referred to as "the Company"), which comprise the statement of financial position as at December 31, 2018, the statement of comprehensive income, statement of cash flows and statement of changes in equity for the reporting year then ended, and notes to the financial statements.

In our opinion, the accompanying financial statements are properly drawn up in accordance with the provisions of the Accounting Standards for Business Enterprises so as to give a true and fair view of, in all material respects, the financial position of the Company as at December 31, 2018, and of the financial performance and cash flows of the Company for the year ended on that date.

Basis for opinion

We conducted our audit in accordance with Chinese Certified Public Accountants Auditing Standards. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Professional Conduct and Ethics for Chinese Certified Public Accountants, and we have fulfilled our other ethical responsibilities. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of management for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the provisions of the Accounting Standards for Business Enterprises, and for devising and maintaining a system of internal accounting controls necessary to permit the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing matters related to going concern (if applicable), and using the going concern assumption, unless management either intends to liquidate the entity or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Accounting Standards for Business Enterprises will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Accounting Standards for Business Enterprises, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- a) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- d) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- e) Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Oracle Financial Services Software (Shanghai) Limited

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 2018

(All the amounts are denominated in CNY unless otherwise stated.)

1. Company profile

Oracle Financial Services Software (Shanghai) Limited (the "Company") is a wholly owned foreign invested enterprise established by Oracle Financial Service Software Limited on February 23rd, 2010. The Company was approved by the People's Government of Shanghai with an approval certificate of SWZHPDZZ No.[2010]0477. The total investment of the Company is US\$1,420,000 and the registered capital is US\$1,000,000. The above capital contributed by the investors was verified by Shanghai Xinjie CPAs Co., Ltd. with a capital verification report of XJKSZ No. (2010) 5016.

The Company obtained the business certificate No. 91310000551510963C. The legal representative of the Company is Mr AVADHUT DIGAMBAR KETKAR. The registered address is Room806, No. 155, Tianjin Road, Huangpu District, Shanghai. The operating period is from February 23rd, 2010 to February 23rd, 2040, the operating period is 30 years. The company's principal activities is Development and production of computer software products; installation, debugging and sales of computer system integration and related software systems, as well as self-produced products; supply of technical consultation, maintenance, services, and after-sales training of software products; wholesale, import and export, as well as commission agent (auction excluded) of computer hardware and software and relevant associated components (products subject to the administration of State-run Trade not involved; products subject to the administration of quota and licensing are applied in line with relevant national regulations).

The financial statements were approved by the board of directors of the Company on May 27, 2019.

2. Basis of preparation for financial statements

2.1 Basis of preparation for financial statements

The Company recognizes and measures its accounting items on a going concern basis in compliance with the Accounting Standards for Business Enterprises – Basic Standards and

specific accounting standards, the Application Guidance on the Accounting Standards for Business Enterprises, the Explanation on the Accounting Standards for Business Enterprises, and other relevant regulations published by the Ministry of Finance (all of which known as “the Accounting Standards for Business Enterprises”) on the basis of actual transactions and events, and prepares its financial statements on the above basis.

2.2 Going concern

The Company’s financial statements for the year ended December 31, 2018 were prepared on a going concern basis.

3. Principal accounting policies and accounting estimates

3.1 Statement on compliance with the Accounting Standards for Business Enterprises

The financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2018, and its financial performance and its cash flows for the year then ended in accordance with the Accounting Standards for Business Enterprises.

3.2 Accounting year

The accounting year is from January 1 to December 31.

3.3 Operating cycle

The Company’s operating cycle is 12 months.

3.4 Functional currency

The Company adopts CNY as the functional currency.

3.5 Recognition criteria of cash and cash equivalents

For the purpose of preparing the statement of cash flows, the term “cash equivalents” refers to short-term (maturing within three months on acquisition) and highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

3.6 Accounting for foreign currency transactions and translation of foreign currency financial statements

3.6.1 Accounting for foreign currency transactions

Foreign currency transactions are translated into CNY for accounting purpose at the spot exchange rate on the day when the transaction occurs.

The exchange differences arising from balances of foreign currency monetary items are translated at the spot exchange rate prevailing at the end of the reporting period. Except those arising from specific-purpose borrowings in foreign currencies related to assets eligible for capitalization that shall be measured in accordance with principle of capitalization of the borrowing costs, other exchange differences shall be recognized in profit or loss for the current period.

3.7 Financial instruments

Financial instruments include financial assets, financial liabilities and equity instruments.

3.7.1 Classification of financial instruments

Financial assets and liabilities are classified into the following categories according to the purpose of acquisition: the financial assets or financial liabilities measured at fair value through profit and loss, including financial assets or financial liabilities held for trading and those financial assets or financial liabilities directly designated to be measured at fair value through profit and loss, held-to-maturity investments, receivables, available-for-sale financial assets and other financial liabilities, etc.

3.7.2 Recognition and measurement of financial instruments

3.7.2.1 Financial assets (or financial liabilities) measured at fair value through profit and loss

Financial assets/liabilities are initially measured at fair value when acquired (deducting cash dividends that have been declared but not distributed and bond interest that has matured but not yet been retrieved). Relevant transaction costs are charged to profit or loss for the current period. The interest or cash dividends received are recognized as investment income during the holding period.

Interest or cash dividends received during the holding period are recognized as investment income, and changes in fair value are charged to profit or loss for the current period at year end.

Differences between the fair value and initial book value are recognized as investment income upon disposal, and gain or loss on changes in fair value is adjusted at the same time.

3.7.2.2 Held-to-maturity investments

Held-to-maturity investments are initially measured at fair value (deducting bond interest that has matured but not yet been retrieved) plus relevant transaction costs when acquired.

Interest income is recognized as investment income based on the amortized cost and effective interest rate. If the difference between the effective interest rate and coupon rate is negligible, the coupon rate is applicable. The effective interest rate is determined upon acquisition and remains unchanged during the expected remaining period, or a shorter period if applicable.

Differences between the proceeds and book value of the investments are recognized as investment income on disposal.

3.7.2.3 Receivables

The debtors arising from selling goods or rendering services by the Company and other debtors from other enterprises held by the Company (excluding liability instruments quoted in an active market), including accounts receivable, other receivables, etc., are initially recognized at the contract or agreement price. If the receivable is financing in nature, it shall be initially recognized at present value.

Differences between the amounts received and book value of the receivables are charged to profit or loss for the current period upon collection or disposal.

3.7.2.4 Available-for-sale financial assets

Available-for-sale financial assets are initially measured at fair value (deducting cash dividends that have been declared but not distributed and bond interest that has matured but not yet been retrieved) plus transaction costs when acquired.

The interest and cash dividends received during the holding period are recognized as investment income. Available-for-sale financial assets are measured at fair value at year end, and the amount of changes in fair value is charged to other comprehensive income. However, investments in equity instruments not quoted in an active market and with no reliable fair value measurement (and derivatives indexed to such equity instruments and settled by delivery of such equity instruments) should be measured at cost.

Differences between the proceeds and the book value of the financial assets are recognized as gain or loss on investment upon disposal. Meanwhile, the accumulated changes in fair value of the disposed assets which are previously recognized as other comprehensive income are transferred to profit or loss for the current period.

3.7.2.5 Other financial liabilities

Other financial liabilities are initially recognized at fair value plus transaction cost. The subsequent measurement is based on amortized cost.

3.7.3 Recognition and measurement for transfer of financial assets

If the Company has transferred nearly all of the risks and rewards relating to the ownership of the financial assets to the transferee, they shall be derecognized. If it retains nearly all of the risks and rewards relating to the ownership of the financial assets, they shall not be derecognized.

Substance over form principle is adopted to determine whether the transfer of financial assets can satisfy the criteria as described above for derecognition. The Company shall classify the transfer of financial assets into the entire transfer and the partial transfer. If the transfer of entire financial assets satisfy the criteria for derecognition, differences between the amounts of the following two items shall be recognized in profit or loss for the current period:

- i) The carrying amount of the transferred financial asset;
- ii) The aggregate consideration received from the transfer plus the cumulative amounts of the changes in the fair value originally recognized in the owners' equity (in the event that the transferred financial assets are available-for-sale financial assets).

If the partial transfer of financial assets satisfy the criteria for derecognition, the carrying amounts of the entire financial assets transferred shall be split into the derecognized and recognized parts according to their respective fair value and differences between the amounts of the following two items are charged to profit or loss for the current period:

- i) The carrying amounts of the derecognized parts;
- ii) The aggregate consideration for the derecognized parts plus the portion of the accumulative amounts of the changes in the fair value of the derecognized parts which are originally recognized in the owners' equity (in the event that the transferred financial assets are available-for-sale financial assets).

If the transfer of financial assets does not satisfy requirements for derecognition, the financial assets shall continue to be recognized, and the consideration received will be recognized as financial liabilities.

3.7.4 Requirements for derecognition of financial liabilities

Financial liabilities shall be entirely or partially derecognized if the present obligations derived from them are entirely or partially discharged. If the Company enters into an agreement with a creditor so as to substitute the current financial liabilities with new ones, and the contract clauses of which are substantially different from those of the current ones, it shall recognize the new financial liabilities in place of the current ones.

If substantial revisions are made to some or all of the contract clauses of the current financial liabilities, the Company shall recognize the new financial liabilities after revision of the contract clauses in place of the current ones entirely or partially.

Upon entire or partial derecognition of financial liabilities, differences between the carrying amounts of the derecognized financial liabilities and the consideration paid (including non-monetary assets surrendered or new financial liabilities assumed) are charged to profit or loss for the current period.

If the Company redeems part of its financial liabilities, it shall allocate the carrying amounts of the entire financial liabilities between the relative fair value of the parts that continue to be recognized and the derecognized parts on the redemption date. Differences between the

carrying amounts allocated to the derecognized parts and the consideration paid (including non-monetary assets surrendered and the new financial liabilities assumed) are charged to profit or loss for the current period.

3.7.5 Determination of fair values of financial assets and financial liabilities

Quoted market prices in an active market are the best evidence of fair value and should be used, where they exist, to measure the financial instrument. If a market for a financial instrument is not active, the Company establishes fair value by using a valuation technique. The Company uses a valuation technique appropriate in the circumstances and for which sufficient data and other information are available to measure fair value, selecting the inputs pursuant to the characteristics of the asset or liability being measured that a market participant would take into account, and giving priority to the use of relevant observable inputs. Only when such observable inputs are not available or impossible to obtain shall unobservable inputs be used instead.

3.7.6 Tests and accounting for provisions for impairment loss on financial assets (excluding receivables)

Except financial assets measured at fair value through profit and loss, the Company performs impairment tests on the carrying amounts of all other financial assets at the end of the reporting period, and makes provisions for impairment loss on financial assets where there is any objective evidence that they have been impaired.

3.7.6.1 Provisions for impairment loss on available-for-sale financial assets

If the fair value of available-for-sale financial assets have significantly declined at the period end, or it is expected that the trend of decreases in value is non-temporary after consideration of all the relevant factors, impairment shall be recognized, and accumulated decreases in fair value previously charged directly to owners' equity are reversed and recognized as impairment loss.

For an available-for-sale debt instrument for which an impairment loss has been recognized, if its fair value rises subsequently and the rise is related to the events after the recognition of the impairment loss, the originally recognized impairment loss can be reversed and charged to profit or loss for the current period.

The impairment loss for available-for-sale equity instruments should not be reversed through profit or loss.

3.7.6.2 Provisions for impairment loss on held-to-maturity investments

Measurement of provisions for impairment loss on held-to-maturity investments is similar to that applicable to provisions for impairment loss on receivables.

3.8 Allowance for bad debts of receivables

Separate impairment tests are performed on the individually material receivables. For individually immaterial receivables, they are tested for impairment separately or as part of a portfolio with similar credit risk features. Receivables with no indication of impairment as the result of the separate impairment test (including both individually material and immaterial receivables) are tested for impairment as part of a portfolio with similar credit risk features. Receivables written down as the result of the separate impairment test are not tested for impairment again as part of a portfolio with similar credit risk features.

Among which, allowance for bad debts made by aging analysis:

Aging	Proportion of allowance for bad debts of accounts receivable (%)	Proportion of allowance for bad debts of other receivables (%)
Within 1 year (including 1 year)	0	
1 to 2 years	20	
2 to 3 years	75	
Over 3 years	100	

3.9 Fixed assets

3.9.1 Recognition of fixed assets

Fixed assets refer to tangible assets held for the purpose of producing commodities, providing services, renting or business management with useful lives exceeding one accounting year. Fixed assets are recognized when all the following criteria are satisfied:

- i) It is probable that the economic benefits relating to the fixed assets will flow into the Company; and
- ii) The costs of the fixed assets can be measured reliably.

3.9.2 Depreciation methods of fixed assets

Depreciation is provided on a category basis using the straight-line method. The depreciation rates are determined according to the categories, estimated useful lives and estimated net residual rates of fixed assets. If the useful lives of various categories of fixed assets are different, or economic benefits are generated from various fixed assets in different ways, then different depreciation rates or methods shall be selected by the Company for the fixed assets.

The estimated depreciation methods, depreciation periods, residual rates and annual depreciation rates of fixed assets are listed by their respective categories as follows:

Categories	Depreciation methods	Depreciation periods	Residual rates (%)	Annual depreciation rates (%)
Office equipment	straight-line method	3 years	0.00	33.33
Leasehold improvement	straight-line method	83 months	0.00	1.23

3.10 Employee benefits

3.10.1 Accounting for short-term benefits

The short-term benefits incurred during the period when the employees render services to the Company shall be recognized as liabilities and charged to profit or loss for the current period or costs of relevant assets.

Social insurance fees and housing provident funds paid by the Company for the employees, as well as labor union fees and labor education fees accrued during the period when the employees render services to the Company shall be recognized as employee benefits payable according to the stipulated basis of calculation and proportion.

The employee welfare expenditure in the form of benefits in kind shall be measured at fair value.

3.10.2 Accounting for post-employment benefits

3.10.2.1 Defined contribution plans

The Company participates in the basic pension schemes and unemployment insurance programs as required by the local government. The Company calculates the amount payable according to the base and proportion of payment stipulated by the local government and recognizes the amount payable as liabilities, and charges it to profit or loss for the current period or includes it in costs of relevant assets.

In addition, the Company has established the corporate annuities scheme. The portion paid by the Company is accrued at a certain percentage of the total wages for the last year, and charged into profit or loss for the current period or costs of relevant assets.

3.10.2.2 Defined benefit plans

The Company attributes the defined benefit obligations to the periods of service using the “projected unit credit method”, and recognizes them in current profit or loss or costs of relevant assets.

The deficit or surplus arising from the present value of the defined benefit obligations deducting fair value of the plan assets is recognized as a net liability or net asset of a defined benefit plan. If there is a net surplus of the defined benefit plan, the Company measures the net asset of the defined benefit plan at the lower of the net surplus of the plan or the upper limit of the plan asset.

All contributions to a defined benefit plan, including those that are expected to be settled within 12 months after the end of the annual reporting period in which the employee renders the related service are discounted to their present value. The discount rate used is determined by reference to market yields on government bonds or high quality corporate bonds at the active market at the end of the reporting period. Currencies and terms of bond yields used must be consistent with the currency and estimated term of the obligation being discounted.

Service cost, net interest arising from net liabilities or assets of the defined benefit plan are all recognized in profit or loss or costs of relevant assets; movements arising from remeasurements of net liabilities or assets of the defined benefit plan are recognized in other comprehensive income, and they are not reversed to profit or loss in subsequent periods.

When the defined benefit plan is terminated, the entire amount recognized as other comprehensive income shall be transferred to retained profit.

At the settlement of the defined benefit plan, the difference between the present value of the defined benefit plan and the settled price at the settlement date shall be recognized as gain or loss on settlement.

3.10.3 Accounting for termination benefits

If the Company has no right to revoke plans or offer for termination of the employment relationship or the Company recognizes the cost or expenditure relevant to restructuring involving termination benefits, whichever is earlier, the termination benefits shall be recognized as provisions and charged to profit or loss for the current period.

3.11 Revenue

3.11.1 Sales of goods

Revenues from sale of goods are recognized when the Company has transferred to the buyer the significant risks and rewards of ownership of the goods; the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold; it is probable that the economic benefits associated with the transaction will flow to the enterprise; and the relevant amounts of revenues and costs can be measured reliably.

3.11.2 Rendering of services

When the provision of services is started and completed within the same accounting year, the service has been provided, and when receipt of the proceeds or the evidence to receive proceeds has obtained, revenue is recognized. When the provision of services is started and completed in different accounting years and the outcome of a transaction can be estimated reliably, revenue is recognized using the percentage of completion method at the balance sheet date.

3.11.3 Alienation of assets

Interest and royalties should be recognized when both the following conditions have been satisfied: the economic benefits associated with the transactions will flow to the Company, and the amounts of the revenues can be measured reliably.

3.12 Government grants

3.12.1 Classification

Government grants refer to the monetary or non-monetary assets obtained by the Company from the government for free. Government grants are classified into government grants relating to assets and government grants relating to income.

Government grants relating to assets are those acquired by the Company for the purpose of purchasing, constructing or forming long-term assets in other ways, including fiscal grants for purchase of fixed assets or intangible assets, and subsidized interest for specific loans relating to fixed assets. Government grants relating to income are grants other than those relating to assets.

3.12.2 Timing for recognition

Besides government grants that have been obtained in accordance with the fixed quota standard and clearly stipulated in the relevant documents, government grants will be confirmed according to the actual time received; government grants that have been obtained in accordance with the fixed quota standard and clearly stipulated in the relevant documents, the amount will be confirmed in accordance with documents and fixed quota standards at the end of the year.

3.12.3 Accounting treatments

For government grants relating to assets, the carrying amounts of relevant assets shall be reversed, or they are recognized as deferred income and amortized over the useful lives of assets and charged to profit or loss for the current period by stage (those relevant to the normal operations are recognized as other income and those not are recognized as non-operating income).

Government grants relating to income to compensate future expenses or losses shall be recognized as deferred income and shall be charged to profit or loss for the current period (those relevant to the normal operations are recognized as other income and those not are recognized as non-operating income) during the period when the relevant expenses or losses are recognized, or the relevant expenses or losses shall be reversed. The government grants relating to income to compensate incurred expenses or losses shall be directly recognized as profit or loss for the current period (those relevant to the normal operations are recognized as other income and those not are recognized as non-operating income), or the relevant expenses or losses shall be reversed.

3.13 Changes in major accounting policies and accounting estimates

3.13.1 Changes in major accounting policies

3.13.1.1 The Ministry of Finance promulgated the Notice on the Revision of the Format of the Financial Statements of General Enterprises for Issuance in 2018 (Cai Kuai (2018) No.15), which revised the format of the financial statements of general enterprises.

In the statement of financial position, the accounting items “notes receivable” and “accounts receivable” are combined to be presented as “notes and accounts receivable”; “notes payable” and “accounts payable” are combined to be presented as “notes and accounts payable”; “interest receivable” and “dividends receivable” are presented as part of “other receivables”; “interest payable” and “dividends payable” are presented as part of “other payables”; “disposal of fixed assets” is presented as part of “fixed assets”; “project materials” are presented as part of “construction in progress”; “specific payables” are presented as part of “long-term payables”. Comparative data is adjusted accordingly.

In the statement of comprehensive income, a new accounting item of “research and development expenses” is added, and the research and development expenses originally presented as part of general and administrative expenses are separately reclassified as “research and development expenses”; new accounting items of “of which: interest expense” and “interest income” are added as part of financial expenses. Comparative data is adjusted accordingly.

Major impacts of the above stipulation on the Company are summarized below:

NO.	Items	Statement of Financial Position			
		December 31, 2017	Reclassification amount	Remeasure and adjustment amount	January 1, 2018
1	Notes receivable				
2	Accounts receivable	6,962,062.56	6,962,062.56		
3	Notes receivable &Accounts receivable			6,962,062.56	6,962,062.56
4	Interest receivable	275,585.75	275,585.75		
5	Dividends receivable				
6	Other receivables	4,634,575.27		275,585.75	4,910,161.02
7	Fixed assets	223,138.77			223,138.77

Oracle Financial Services Software (Shanghai) Limited
