### Apply Patch 31088341 before Upgrade to prevent ORA-1403

Posted on November 23, 2020 by Mike.Dietrich [Flaws and Pitfalls](#)

As I learned from a customer this week, this patch is a must have when you use Partitioning and you attempt to upgrade to Oracle 19.9.0 or earlier. So please apply patch 31088341 before Upgrade to prevent ORA-1403 happening.

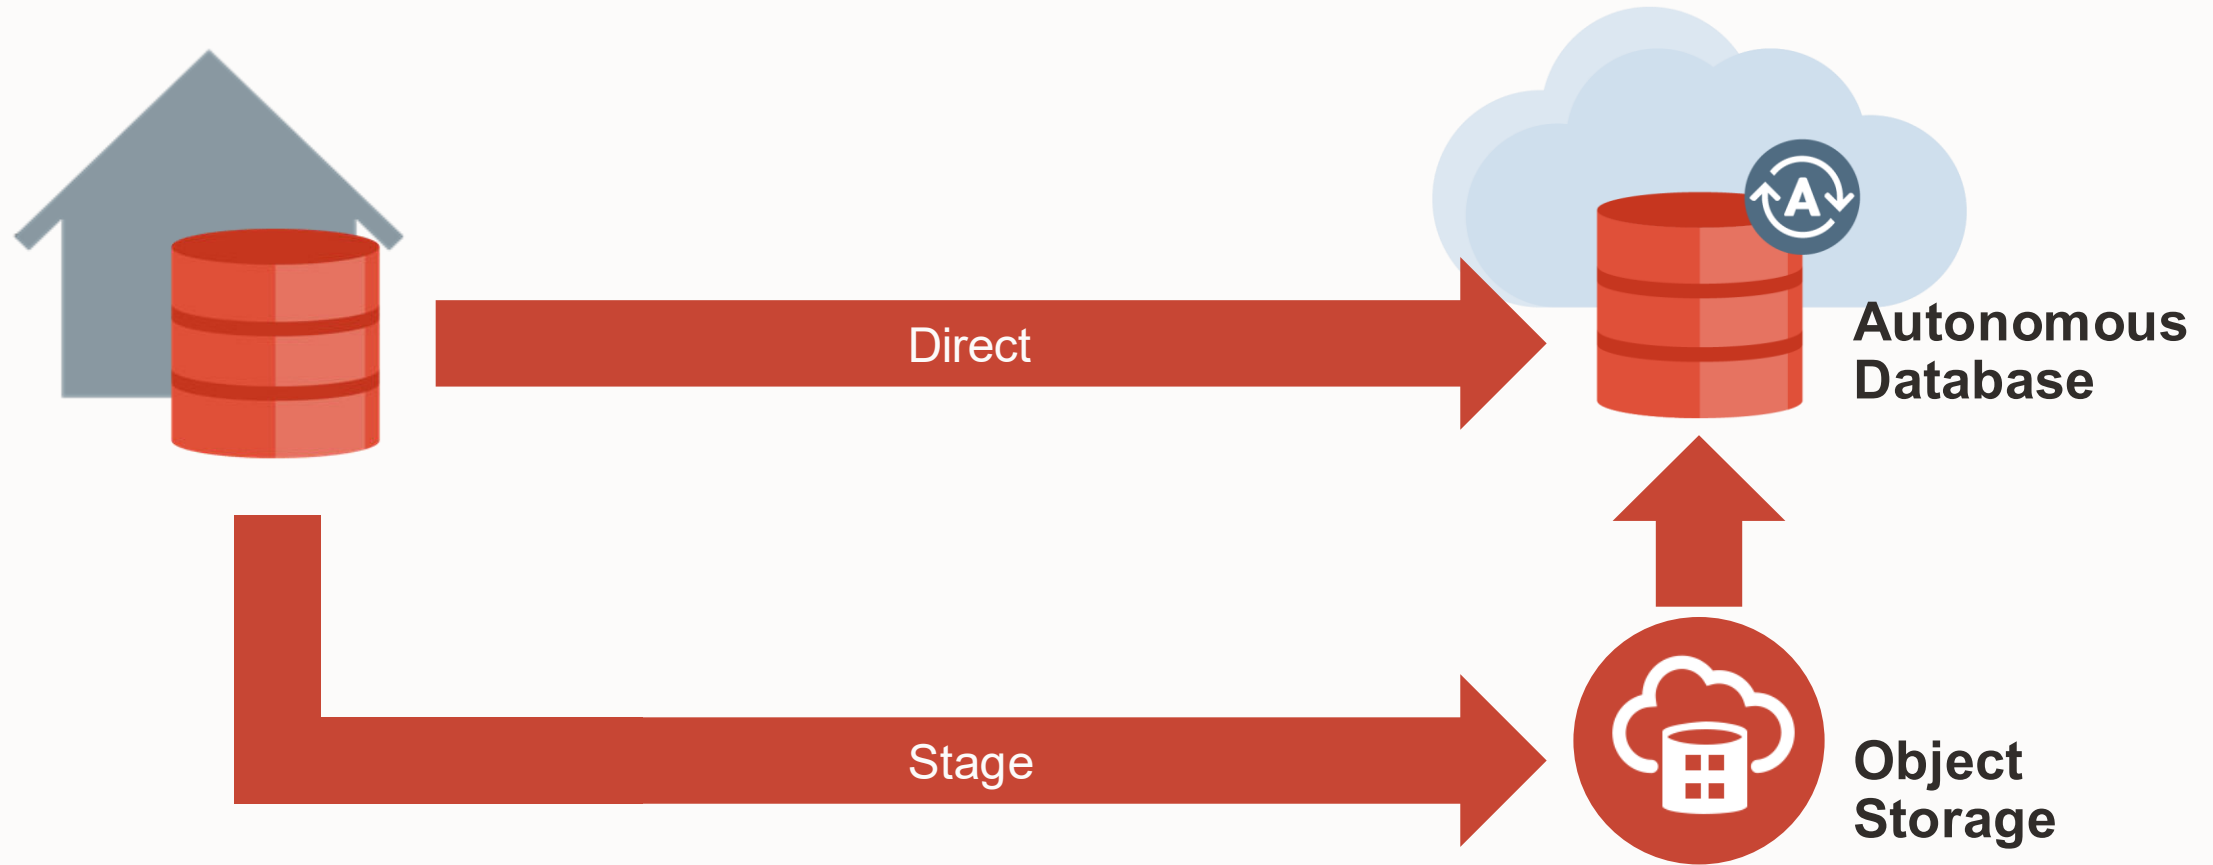

## Autonomous Database

How to Move Your Data into an  
Autonomous Database

”

When it comes to migration, Autonomous Database differs because you will be **migrating data**, not databases

# Autonomous Database | Migration Techniques

# Options | Overview

1. SQL Developer Web	2. <b>SQL Developer</b>	3. SQL*Loader	4. Data Pump	5. DBMS_CLOUD	6. MV2ADB
-------------------------	----------------------------	------------------	-----------------	------------------	--------------

# Options | SQL Developer

Local installation

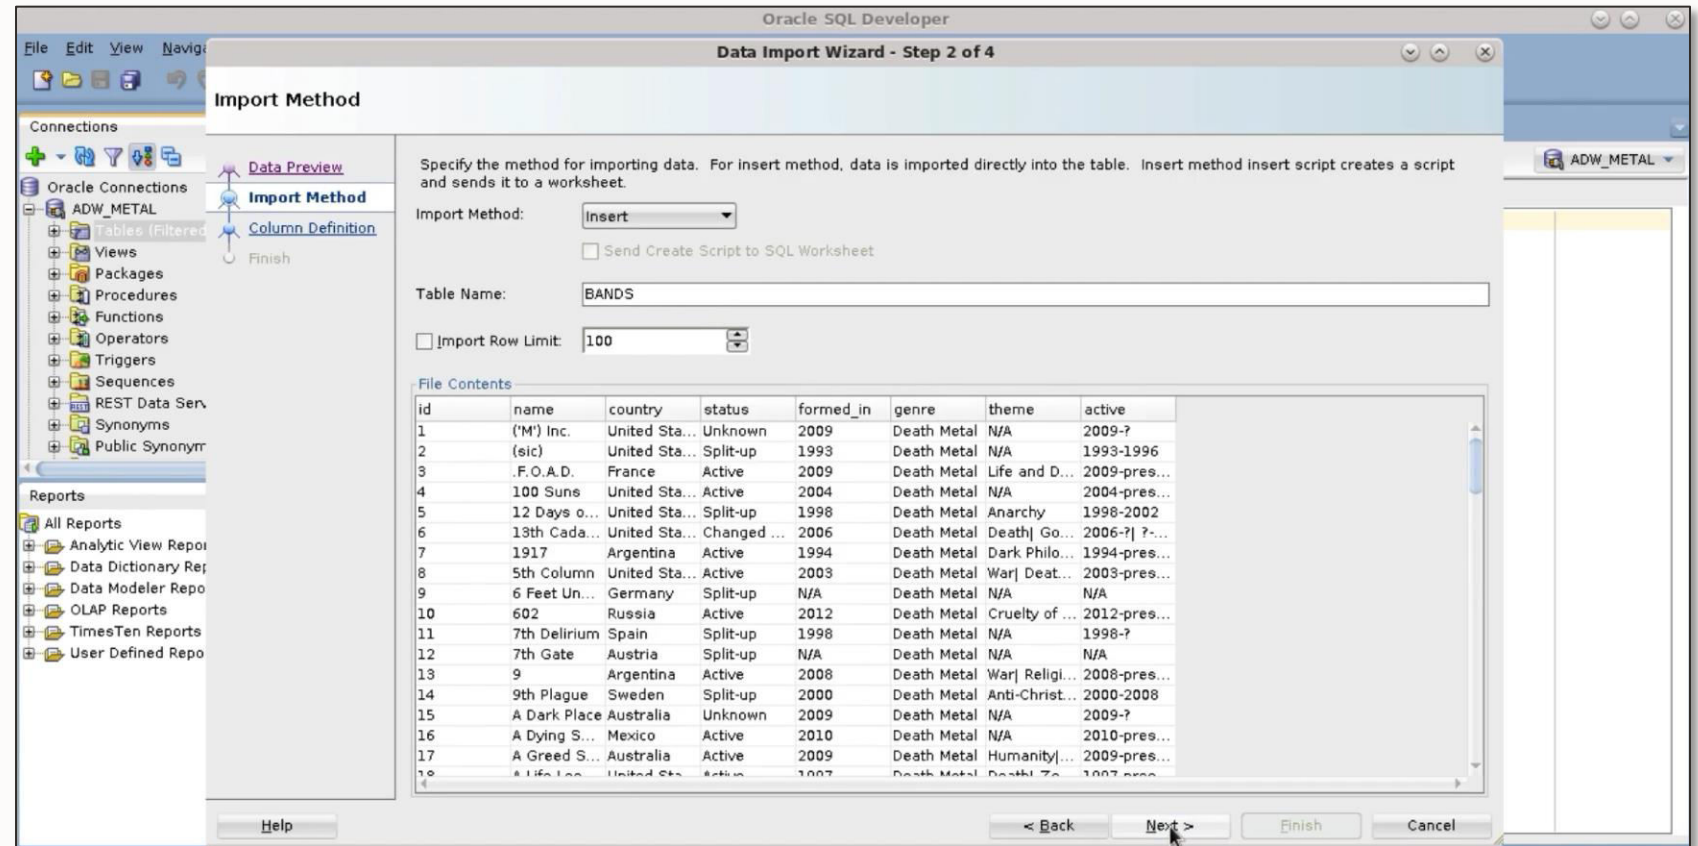

Quick and simple

Works on:

- CSV
- XML
- JSON
- XLS/XLSX
- Avro

Loads from:

- Local file
- OCI object stage

# Options | Overview

1. SQL Developer Web	2. SQL Developer	3. <b>SQL*Loader</b>	4. Data Pump	5. DBMS_CLOUD	6. MV2ADB
-------------------------	---------------------	-------------------------	-----------------	------------------	--------------

# Options | SQL\*Loader

Highly configurable

Can transform data

Loads from:

- Local file

Works on:

- CSV
- Text

```
Disconnected from Oracle Database 19c Enterprise Edition Release 19.0.0.0.0 - Production
Version 19.5.0.0.0
[oracle@hol ~]$ sqlldr admin@metal_high \
>   table=albums \
>   data=albums.csv \
>   external_table=not_used \
>   field_names=all
Password:

SQL*Loader: Release 19.0.0.0.0 - Production on Sun Oct 11 12:05:13 2020
Version 19.7.0.0.0

Copyright (c) 1982, 2019, Oracle and/or its affiliates. All rights reserved.

Express Mode Load, Table: ALBUMS
Path used:      Conventional
Commit point reached - logical record count 123
Commit point reached - logical record count 246
Commit point reached - logical record count 369
Commit point reached - logical record count 492
Commit point reached - logical record count 615
Commit point reached - logical record count 738
```

# Options | Overview

1. SQL Developer Web	2. SQL Developer	3. SQL*Loader	4. <b>Data Pump</b>	5. DBMS_CLOUD	6. MV2ADB
-------------------------	---------------------	------------------	------------------------	------------------	--------------

## Options | Data Pump

Fast unload and load

All or selected data

Best option for big data

Can transform metadata

Loads from:

- Oracle Database (database link)
- OCI Object Storage

Pro tip: Use [SQL Developer](#)

# Options | Overview

1. SQL Developer Web	2. SQL Developer	3. SQL*Loader	4. Data Pump	5. DBMS_CLOUD	6. MV2ADB
-------------------------	---------------------	------------------	-----------------	------------------	--------------

# Options | MV2ADB

"One button approach"

Uses Data Pump

Loads from:

- Oracle Database

Documentation: [Doc ID 2463574.1](#)

Runs on Linux / Solaris

```
[oracle@hol ~]$ more mv2adb_metal.cfg
#-----#
# DB Parameters #
#-----#
DB_CONSTRING=//localhost/DB19.localdomain

## Database Cloud Service

**Zero Downtime Migration**

## Zero Downtime Migration

”

ZDM is a **free** tool that you can use to migrate Linux databases into OCI with **zero downtime**

# Prerequisites And Features | Location

## Location

Release

Platform

Architecture

Overview

- Source database can be located
  - **On-premises**
  - Oracle Cloud Infrastructure Classic (OCI-C)
  - Oracle Cloud Infrastructure (OCI)

# Prerequisites And Features | **Release**

Location

**Release**

Platform

Architecture

Overview

- Supported database releases:
  - 11.2.0.4
  - And **anything newer**
- Target database release **must** be the same

# Prerequisites And Features | Platform
