Oracle Cloud Infrastructure
Strategy and Direction

James Allerton-Austin

Senior Director, Cloud Strategy EMEA

Oracle Cloud Applications

Complete suite of integrated applications

Oracle Cloud Infrastructure

Secure, high-performance platform for all your workloads

Strong Investment in Oracle Cloud
Results showing a deeper and wider capability

Oracle Cloud Applications	Custom Applications	ISV Applications

Application development and DevOps

Integration

Containers

Management, monitoring, and automation

Machine learning and AI

Native VMware

Compute

Storage

Networking

Relational databases

Non-relational databases

Analytics, BI, and data science

Security | Governance | Compliance

Global Cloud Data Center Infrastructure
30 Commercial and Government Public Cloud Regions | Cloud@Customer | Dedicated Regions | Roving Edge

Meet customers where they are with hybrid cloud

Oracle Public Regions

Hyperscale cloud regions in 30 worldwide locations

Dedicated Regions

All OCI services, running in customer data centers

OCI-Azure Interconnect

Low latency, secure connection for running workloads across OCI and Azure

Exadata Cloud@Customer

Cloud Autonomous Databases, running in your data center

Roving Edge Infrastructure

OCI compute and storage for remote, disconnected scenarios

Worldwide or exactly where you need it, with scale and control

Taking on more responsibility for cloud workloads

Autonomous Database

Automatic provisioning, scaling, tuning, and online patching and updating

Autonomous Linux

Automatically applies security patches with no downtime

Cloud Guard

Constant scans for misconfiguration and policy breaches. Fixes automatically

Maximum Security Zones

Default secure configurations eliminate setup errors

Security that's built-in, on by default, with no extra charges

Built for the most demanding workloads

Flex Infrastructure

Online infrastructure scales up and down resources without application rewrites

Exadata & RAC

Proven and unique solutions for database performance and resiliency

Bare Metal

Cloud-based provisioning of bare metal compute for maximum performance and isolation

Oracle Cloud VMware Solution

Native VMware on OCI in public cloud or dedicated regions

Meeting customers where they are, with what they need

Global, regional, and industry compliance

Global

SOC 1 : SOC 2 : SOC 3
