

The Baxter logo is centered at the top of the slide. It consists of the word "Baxter" in a bold, italicized, blue sans-serif font. The background of the slide is a complex geometric pattern of overlapping triangles and lines in various shades of blue, gold, and light grey, creating a dynamic, modern aesthetic.

Sept 2020

Advancing Healthcare: Our Six Global Business Units

RENAL CARE

Pioneering therapy options for people with kidney disease, including peritoneal dialysis and hemodialysis

ADVANCED SURGERY

Enabling surgeons to act with precision and speed to minimize complications and increase efficiency

PHARMACEUTICALS

Providing generic injectable medicines and inhaled anesthetics that are critical to effective patient care across the globe

MEDICATION DELIVERY

Advanced infusion systems and solutions to help ensure the right treatment is delivered safely and efficiently

NUTRITION

Leading clinical nutrition solutions formulated to help patients maintain or regain their health

ACUTE THERAPIES

Innovative products and therapies that treat life-threatening conditions in the ICU

Making a difference for patients and partners worldwide

85+ year heritage of **saving and sustaining lives**

Strong **global business** with great people

One of the most **trusted brands** in medical products

Advancing transformative **healthcare innovation**

Baxter Profile: Global Patient Impact

60M+ patients treated annually

Products in **100+** countries

47,000+ employees worldwide

Global Revenue

\$11.4B
2019 Sales

Revenue by Region

- Americas 54%
- EMEA 26%
- Asia Pacific 20%

Global Analytics and Business Intelligence (GABI)

Quick Facts

2008

Program founded with primary data sourced from JDE deployments via CDC Streams

50TB

Database under constant growth running on ageing X2 Exadata in company Datacenter

10+

Sources constantly added over the years resulting in dozens of data feeds both in and outbound

1000s

Thousands of nightly ETL jobs. (DataStage)

Two

Initially began to serve Finance and Supply Chain, but grew into a company wide platform (Mfg, QA, Commercial)

100s

Large chunks of data scanned on a daily basis. Exacheck shows 100s of TB scanned

100s

Hundreds of concurrent users. (adhoc and canned reports) (Tableau and Cognos)

Six

The number of months we had to unwind and move,

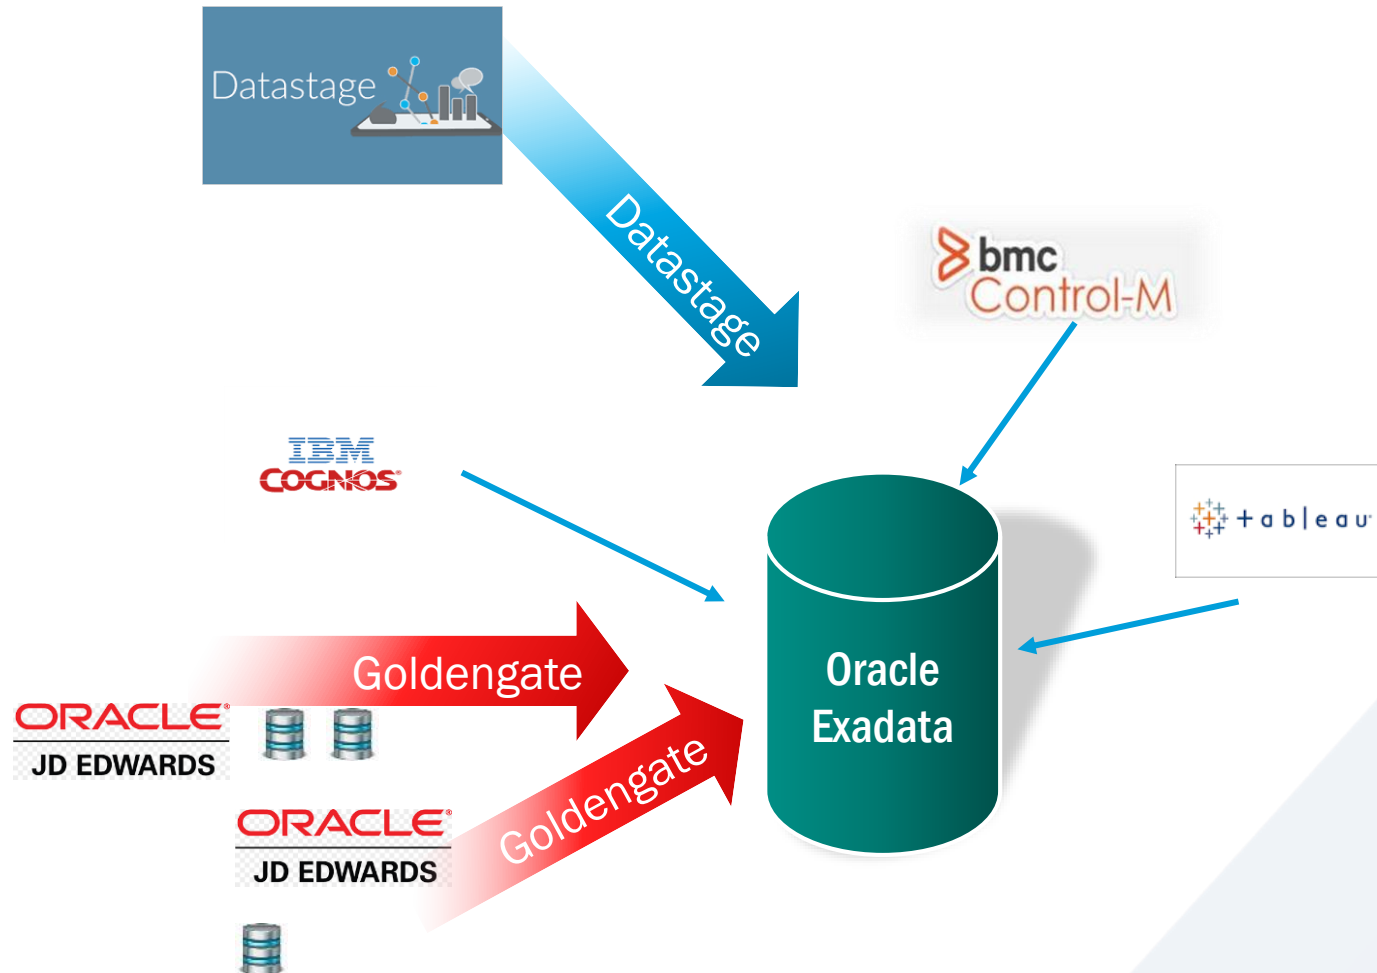

Migration Challenges

- Oracle Exadata Capability Not available in AWS
- ETL Jobs depend on smart scan capability
- Multiple Crashes of AWS database service when running tests
- Breaking up DB into smaller chunks worked
- Rewrite estimated to take over a year
- Multiple Options considered, each had + and –
- Opted to leverage Oracle Autonomous Data Warehouse PaaS offering
- Move reporting and ETL components to AWS

Why Oracle Autonomous Data Warehouse service and not Exadata Cloud service?

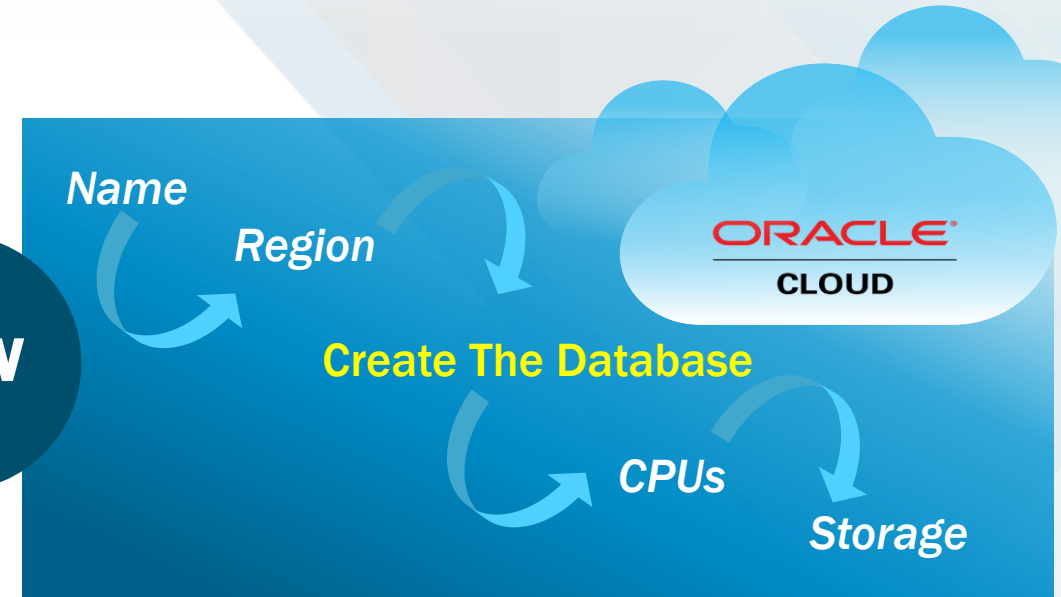

WHAT

~~Storage Quotas~~
~~Indexing~~
~~Partitioning~~
~~Compression~~
~~Availability~~
~~Patching~~
~~Upgrades~~
~~Backups~~

- ✓ Load Data
- ✓ Run Queries
- ✓ Elastically Scale

HOW

WHY

Automation:

We know the implementation and it is being performed by the software based on our rules.

Autonomy:

- We do not know the implementation
- We do not set the rules.
- Decisions made by the software

The background is a complex geometric pattern of overlapping triangles and squares in various shades of blue, ranging from light sky blue to deep navy blue. The pattern is symmetrical and creates a sense of depth and movement. The text is centered and rendered in a clean, white, sans-serif font.
