Oracle Secure Mobile Identity Cloud Services	4
Oracle Communications Secure Mobile Identity Cloud Service	4
Oracle Communications Secure Mobile Identity Cloud Service, Hub Edition	4
Oracle Communications Secure Mobile Identity Cloud Service, Additional Attribute	4

## METRIC DEFINITIONS

**“1K Transactions Per Month”** is defined as one thousand transactions processed by the Oracle Cloud Service in a calendar month. For purposes of Oracle Secure Mobile Identity Cloud Service, a transaction is defined as an operation initiated by the Oracle Cloud Service to complete a task related to any authentication, authorization, or identity verification task.

**“1K Data Items Per Month”** is defined as one thousand data items processed by the Oracle Cloud Service in a calendar month. For purposes of the Oracle Secure Mobile Identity Cloud Service, a data item includes the following: subscriber, device, network, and other attributes contained in a transaction, such as name, address, e-mail, national identifier, international mobile subscriber identity, international mobile equipment identity, external IP address, internal IP address, tenure, account type, and location.

## GLOSSARY

**“Service Provider”** is defined as a person or legal entity providing digital services or content to subscribers (end users).

## SERVICE DESCRIPTIONS

### Oracle Secure Mobile Identity Cloud Services

PRODUCT NAME	PART #	METRIC
Oracle Communications Secure Mobile Identity Cloud Service	B90533	1K Transactions Per Month
Oracle Communications Secure Mobile Identity Cloud Service, Hub Edition	B91897	1K Transactions Per Month
Oracle Communications Secure Mobile Identity Cloud Service, Additional Attribute	B91898	1K Data Items Per Month

#### Oracle Communications Secure Mobile Identity Cloud Service

The Oracle Communications Secure Mobile Identity Cloud Service provides network-based authentication, authorization, and identity verification services based on an end user's mobile number and the mobile device associated with a mobile network.

#### Oracle Communications Secure Mobile Identity Cloud Service, Hub Edition

The Oracle Communications Secure Mobile Identity Cloud Service, Hub Edition provides a deployment model that enables mobile operator aggregators and joint ventures to offer a single touchpoint to service providers for consuming secure mobile identity services to support end-users from multiple mobile network operators in a region or country.

#### Oracle Communications Secure Mobile Identity Cloud Service, Additional Attribute

Users of the Oracle Communications Secure Mobile Identity Cloud Service, Additional Attribute are authorized to access the following attributes: subscriber, device, network, and other attributes contained in a transaction such as name, address, e-mail, national identifier, international mobile subscriber identity, international mobile equipment identity, external IP address, internal IP address, tenure, account type, and location.

**Usage Limits:** The Oracle Communications Secure Mobile Identity Cloud Services are subject to usage limits based on a maximum number of transactions or data items, as applicable, per calendar month in increments of one thousand, as defined in Your order.

If the total number of transactions or data items processed in a calendar month exceeds the number specified on Your order, You agree to purchase additional increments of 1K Transactions Per Month or 1K Data Items Per Month, as applicable.

**Service Level Targets:** The Service Level Targets for the Oracle Secure Mobile Identity Cloud Services are provided in the Oracle Cloud Policies referenced below.

#### Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the *Oracle Cloud Hosting and Delivery Policies* which may be viewed at [www.oracle.com/contracts](http://www.oracle.com/contracts).
