

ORACLE E-BUSINESS SUITE TRANSFER OF INFORMATION (TOI) TRAINING

Releases 12.2.x (inclusive of 12.2 – 12.2.14)

Prepared by Oracle E-Business Suite Product Development

Last Updated: September 9, 2024

1. Introduction

1.1. Purpose of Document

Oracle offers free, online “Transfer of Information” (TOI) training on how to “Implement and Use” new and enhanced features of the ongoing Oracle E-Business Suite 12.2 releases, which include 12.2.x suite-wide Release Update Packs, Enterprise Command Center Updates, and Mobile Apps Updates.

The short (one hour or less) TOI sessions are organized by release, product, and feature set. Each TOI describes the day-in-the-life use and setup of a product feature set, along with troubleshooting tips and best practices.

The TOIs, which are pre-recorded by Oracle Development product experts, are targeted for use by customer and partner implementers.

1.2. Accessing TOI Training

For your convenience, this document provides direct link access to each of the Oracle E-Business Suite TOIs. Links are listed by product area and product, and are ordered by 12.2.x release.

Note, the TOIs are hosted on Oracle University’s learning platform. If you are prompted to sign into your Oracle account, proceed to do so. If you do not yet have an Oracle account, follow the on-screen instructions for creating one.

1.3. TOI Recording Formats

TOIs for Oracle E-Business Suite 12.2.8+ and higher (i.e., starting from the Enterprise Command Centers - April 2019 Update) are in MP4 video format, which is supported by major desktop and mobile browsers.

TOIs for Oracle E-Business Suite 12.2.4 through 12.2.8 are in non-MP4 video formats that are best viewed in the Firefox browser.

TOIs for Oracle E-Business Suite 12.2 to 12.2.3 are in PDF only.

To access “Help and Support” for any TOI issue, click the dropdown menu in the upper-right corner of Oracle University’s [Oracle E-Business Suite Training TOIs home page](#).
