Oracle Treasury

Oracle® Treasury, Oracle Risk Management and Oracle Cash Management form a complete web-enabled treasury workstation solution for managing global treasury operations while improving visibility, profitability and control.

KEY BUSINESS BENEFITS

Oracle Treasury enables you to:

- · Make smarter decisions
- Optimize treasury decisions
- · Reduce external funds requirements

Make Smarter Decisions

The ever changing global economy creates a complex financial environment for all companies. With Oracle Treasury and Oracle Risk Management, you can proactively monitor and adjust currency and interest rate positions and exposures across your entire enterprise while complying with your internal risk policies.

These sophisticated tools enable you to make informed investing, borrowing and foreign currency hedging decisions on a timely basis. They help you to achieve greater profitability by eliminating undesirable positions, minimizing financial risks, funding costs, and maximizing investment returns.

Optimize Treasury Operations

Oracle Treasury offers fast and accurate deal capture whether you enter transactions manually or feed them into the system electronically. Useful defaults and screens tailored to each financial instrument enable you to quickly enter all relevant details, plus attach supporting files. Oracle Treasury supports a broad range of financial instruments including debt, investment, foreign exchange, equities, and derivatives. To minimize errors, Oracle Treasury performs extensive validations during deal entry. It streamlines treasury operations by immediately updating all related positions when you complete a new deal.

- Product Support Services
- Professional Services

provides powerful limit controls, embedded policies, and native security that address these significant corporate governance concerns. Oracle Treasury monitors your limits in real-time and automatically alerts you and your management to any exceptions.

Oracle Treasury secures your treasury operations and enforces segregation of duties by providing common business roles or responsibilities. In addition to the extensive security features in Oracle E-Business Suite, you can also control specific deal input and settlement validation authority. Your centralized treasury team can operate on behalf of multiple companies in regional or worldwide shared service centers. Oracle Treasury also supports auditing a wide selection of business events to allow you to track any changes made to financial instruments in the system.

Reduce External Funds Requirements

Oracle Treasury's in-house banking features enable the treasury department to act as a bank to subsidiaries. These capabilities allow you to collaborate with your subsidiaries regionally or worldwide to consolidate and manage cash on their behalf. Your subsidiaries can borrow or invest money with the in-house bank at interest rates that reflect the fair cost of funding. For each subsidiary and currency, Oracle Treasury automatically maintains a running balance, calculates accrued interest, settles or compounds interest at any time, and generates related reporting and accounting entries for all this activity.

Oracle E-Business Suite - The Complete Solution

Oracle E-Business Suite enables companies to efficiently manage customer processes, manufacture products, ship orders, collect payments, and more—all from applications that are built on a unified information architecture. This information architecture provides a single definition of your customers, suppliers, employees, products - all aspects of your business. Whether you implement one module or the entire Suite, Oracle E-Business Suite enables you to share unified information across the enterprise so you can make smarter decisions with better information.
