Mission Statement

The Company is aiming for further business growth by supporting our customer’s cloud migration of their core systems and active data utilization. Its mission is to help people see data in new ways, discover insights, unlock endless possibilities.

We have confidence that continuing to evolve ourselves and navigating the evolution of our customers will be a step toward guiding the world in the right direction, and ultimately will contribute to society and humankind.

Our Strength

The Company is aiming for further business growth by supporting our customers’ cloud migration of their core systems and active data utilization with deepen customer-trust, which is based on “Be a TRUSTED TECHNOLOGY ADVISOR”. We have practiced DX (Digital Transformation) to the Cloud by own technology which brought business success to ourselves. By accelerating to deploy and implement our technology to the customers, we support their Data-driven DX.

The Company has the comprehensive product portfolio which consists of platform, applications, hardware which can be deployed on cloud environment and on-premise environment. Especially our software license products have been widely adopted in the field of mission critical systems, which have demanded high security, availability and high performance for many years. The Oracle Cloud, which is the core of the Company’s business, has been developed based on the same system architecture and technologies as these software licenses, and the Company enjoys a strength in enabling coordination and bidirectional migration between on-premises systems built with the software licenses products and the Oracle Cloud.

Key Initiatives

Through the data-driven approaches that we have been focusing on, we will further accelerate the provision of not only cloud-based services to maximize the value of information but various types of services to support the use of such cloud services. In consequence, we will contribute to Japanese society.

Also, our license team and cloud team will step up collaboration with each other to facilitate customers’ initiatives for cloud transformation.

In addition, we will contribute to customers’ businesses by strengthening industry models through cross-functional collaboration and providing optimal Oracle solutions to customers in a range of industries.

We were able to lay a foundation through five measures we focused on in the fiscal year ended May 31, 2023 with a view to accelerating cloud transformation. In this fiscal year, to contribute to Japanese society, we will focus on the following two initiatives specifically.

1. Provision of the Japan-focused cloud

1. By providing the cloud dedicated to customers in Japan, we will help Japanese companies modernize their mission-critical systems.

2. By supporting the digitalization of local governments in all over Japan nationwide through the utilization of Oracle Cloud Infrastructure (OCI) which is certified as the Government Cloud, we will contribute to the government cloud initiative that the Japanese government is promoting.
 3. By always offering optimal solutions for the reform of IT cost structures while also providing a range of solutions such as the hybrid cloud featuring on-premises and the cloud, as well as multi-cloud solutions, we will support customers in introducing cloud-based mission-critical systems.
 4. By providing cloud-native SaaS, we support the transformation of customers' life cycle cost structures, the enjoyment of continuously evolving AI technology, and the ability to respond to change.
 5. To implement the above measures, we will further strengthen collaboration with partners.
2. Promotion of AI for customers
- We have the capabilities to provide AI services to our customers.
Oracle is well positioned to be at the forefront of artificial intelligence, and we are positioned to exploit the advantages of AI and becomes an integral part of computing technology as well.
We will promote AI for our customers by allowing them to utilize our cloud services.

(Glossary)

- Cloud service: Providing software and hardware resources which are used for IT system infrastructure at companies and other organizations as services under agreements for certain periods through the networks such as Internets.
- On-premises: A form of IT system developed and operated as the company's possession.

Business status in the 1st Quarter of the fiscal year (from June 1, 2023 to August 31, 2023)

[Cloud & Licenses]

In the Cloud license and on-premise license, the Company has developed its strength of products and services to its Customers under our strategy stated above.

Regarding our License business, the market is showing a recovery trend in IT investment which is not only for cost reduction but developing and growing their business.

In terms of Partner business side, we are expanding our cooperative ties of alliance and keep on expansion our Cloud partnership, while creating new demands on SME market segment.

In the cloud service, we continued to focus on facilitating existing customers' upgrades to the Oracle Fusion Cloud ERP (a lift and shift from on-premises to the cloud) to further accelerate a shift to the cloud, while also working proactively on acquiring new customers.

Regarding "Oracle Cloud Infrastructure (OCI)", there is a lot of demands from customers putting a weight on performance, security and cost effectiveness that has led to the usage of our Tokyo and Osaka region data center are successfully increasing continuously with expansion its Cloud datacenter.

We have been authorized ISMAP (Information system Security Management and Assessment Program) for Government Cloud supplier with OCI, PaaS and Oracle Exadata Cloud@Customer.

Furthermore, our OCI is selected as Cloud service for government cloud development at the Digital Agency, and prospective benefits amid a push for the Central and Local governments' digitalization include an acceleration and increase in investment, larger projects, and further stimulation of demand over the mid-long term.

The Company has opened a website that provides information on OCI for governments and local governments (in Japanese only).

<https://www.oracle.com/jp/cloud/government/>

NetSuite for SME market remained brisk performance in adding new customers who adopted Cloud ERP.

Also we have been keeping the high renewal rate of license support contracts and the attach rate for the on-premise license.

[Hardware Systems]

In Hardware Systems segment, the Company released "Exadata Database Machine X10M" (upgraded version of X9M) in June, 2023.

"Exadata Database Machine X10M" and "Exadata Cloud@Customer X10M" are the first Exadata systems powered by all AMD EPYC™ processors.

The inquiry for this machine is strong and the impact on shipments has gradually eased because of shortage of the semiconductor chip worldwide, however we are continuously examining our business status.

Exadata removes storage bottlenecks and dramatically increase performance for the most demanding workloads such as Online Transaction Processing (OLTP), analytics, IoT, fraud detection, and high frequency trading.

[Services]

In Services segment, the number of composite projects from Consulting Services taking advantage of the Company's comprehensive product and service portfolio has increased steadily. They include projects for platform transition from the on-premise environment to the IaaS and PaaS environment and those for linkage with SaaS solutions such as the ERP cloud.
