Definitions

1 Million Messages: is defined as the number of 1,000,000 message quantities per month used as part of the Oracle Cloud Service. A message is defined as up to 50Kb of in-and-out transmission from/to the Oracle Cloud Service. Any messages over 50Kb in size must be counted as multiple messages, with each 50Kb or portion thereof counting as equivalent to one message (e.g., 210Kb would be counted as 5 messages). Each named user for the process automation and/or the Visual Apps features is equal to 5,000 messages.

1000 Pooled Sessions: defined as 1000 Sessions per Service Period. A Session is a unique individual who accesses the service during a 24 hour period using a specific channel (e.g. web site, mobile app) and is identified through the use of cookie, device id, IP or session id. Access across multiple channels counts for multiple visitor sessions.

Oracle will sum the sessions each calendar month and decrement that amount from the total session pool.

100K Subscribers: 100K Subscribers is defined as one hundred thousand (100,000) individuals who are authorized by You to use one or more of Your licensed services with which the Oracle Fusion Customer Experience for Communications services listed herein (the "CX4C Cloud Services") are used.

For example, an individual subscriber may be tracked as a customer record/account in Your licensed service or other related subscriber databases such as a customer master, ordering system, etc. An individual subscriber is counted once, regardless of the number of licensed services used.

For CX4C Cloud Services, a subscriber is defined as an individual that purchases one or more licensed services from the service provider that utilizes launch, buying or care capabilities of the applicable service.

Activity Pooled Capacity: is defined as the maximum of one Activity in Oracle Field Service per Services Period. You can consume as many Pooled Activities as you need for each service month, but need to buy more Activities to fill your pool if you run out of capacity before the Services Period end date.

An Activity (e.g., work order, office visit, lunch break, warehouse visit, etc.) is scheduled on a contingent worker's route within Oracle Field Service Cloud. An Activity may have a defined status (e.g., pending, started, completed, not done, suspended, cancelled, etc.) and may have a defined time of start and end. If an Activity requires several activities (e.g., there is pre-work before the actual work begins, work is performed in several places, work is performed over multiple days/segments, work is suspended and returned to at a future time, etc.), each such activity is unique and considered to be a separate Activity in Oracle Field Service Cloud with a unique "aid" (appointment id).

For the purpose of Oracle Field Service, an Activity is determined by each unique "aid" assigned to a contingent worker's route where the user's User Classification is "contingent". At the end of each month, Oracle will look at the previous month's activity count and decrement that amount from the total pooled activities count.

Additional Resource Capacity: is defined as an additional 10TB of storage and required computer added to your configuration to run Oracle machine learning and other algorithms, services, and supporting resources required for processing additional data and to which Oracle grants you access as part of the Oracle Cloud Services orders by you.

Billable Service Customer: is defined as the total number of Your and Your Affiliates' individual utilities services that are billable to each of Your and Your Affiliates' Customers. If You will bill multiple utility services to one Customer, each service will count as a single billable service. If a Customer will be billed for utility services at multiple locations (e.g., a chain store, an apartment building, or a municipality), each utility service for each such location shall count as a single billable service.

Compensated participant: is defined as an active participant whose compensation or compensation calculations may be generated by the programs (even if zero dollars or non-monetary). The term Compensated Participant includes, but is not limited to, your employees, contractors, partners, retirees, and any other person or other entity (i.e. company).

Hosted Compensated Individual: is defined as an individual whose compensation or compensation calculations are generated by the programs. The term Compensated Individual includes, but is not limited to, your employees, contractors, partners, retirees, and any other Person.

Hosted Employee: is defined as

(i) all of your full-time, part-time, temporary employees, and

(ii) all of your agents, contractors and consultants who have access to, use of, or are tracked by, the programs. The quantity of the licenses required is determined by the number of Hosted Employees and not the actual number of users.

In addition, if you elect to outsource any business function(s) to another company, the following must be counted for purposes of determining the number of Hosted Employees: all of the other company's full-time employees, part-time employees, temporary employees, agents, contractors and consultants that (i) are providing the outsourcing services and (ii) have access to, use of, or are tracked by, the programs.

Hosted Expense Report: is defined as the total number of expense reports processed by Oracle Fusion Expenses Cloud Service during a month period.

Hosted Full Time Equivalent (FTE) Student: Any full-time student enrolled in your institution and earning academic credit counts as 100% of an FTE Student, any part-time student enrolled in your institution and earning academic credit counts as 25% of an FTE Student, and any student enrolled in your institution but not earning academic credit (for example, continuing education students) counts as 17.5% of an FTE Student. The definition of "full-time" and "part-time" is based on your policies for student classification. If the total number of FTE Students is a fraction, that number will be rounded up to the nearest whole number.

Hosted \$M in Freight Under Management (FUM): is defined as one million U.S. dollars (or the equivalent amount in local currency stated in the order) of the total transportation value of tendered orders for all shipments for a given calendar year during the term of the Oracle Transportation Management Cloud Service. FUM shall include the combined total of actual freight purchased by you, plus the cost of freight for shipments managed by you, and any transportation management services provided by you for your clients. Freight that is paid by a third party shall also be included in the FUM total (e.g., inbound shipments from suppliers to you with freight terms of prepaid).

Hosted \$M in Revenue: is defined for purposes of Oracle Global Trade Management Cloud Service as one million United States dollars (or the equivalent amount in local currency stated in the order) in all income (interest income and non-interest income) before adjustments for expenses and taxes generated by you during a fiscal year.

Hosted \$50M Revenue Under Management (RUM): Hosted \$50M RUM is defined as 50 million U.S. dollars of all income (interest income and non-interest income), before adjustments for expenses and taxes, generated in the preceding 12 months by Your businesses that use the CX4C Cloud Services.

Hosted Managed Resource: is defined as a physical asset subject to the applicable service (such as a truck or a train) and individual users of the service, as well as all your employees, contractors, partners, and any other individual or entity managed by the service.

Hosted Named User: is defined as an individual authorized by you to access the hosted service, regardless of whether the individual is actively accessing the hosted service at any given time. Hosted Named Users may include Business Network Administrators, Endorsing Trading Partners and Participating Trading Partners.

For the purposes of Talent Review & Succession Management Cloud Service, Talent Review & Succession Management for Midsize Cloud Service, Fusion Talent Management for Coexistence Cloud Service, Workforce Compensation Cloud Service, Workforce Compensation for Midsize Cloud Service and Fusion Talent Management and Workforce Compensation Cloud Service, Hosted Named User is calculated on a 12-month rolling basis.

The peak number of Hosted Named Users at any given time during each calendar month of the Services Period determines your compliance with this metric.

For the purpose of Oracle Field Service, authorized individuals are users directly configured in Oracle Field Service with a User status that is "active" and where the User Classification is "regular". The quantity of Hosted Named Users on the ordering document is the maximum number of Hosted Named Users.

Hosted Named User Per Month: is defined as an individual authorized by you to access the hosted service in a calendar month, regardless of whether the individual is actively accessing the hosted service at any given time.

Interaction: An Interaction is a combination of all interactions that contain an Adaptive Intelligent offer, recommendation, action etc. across all channels with which a brand communicates with its customers. An Interaction is defined as: Web visit = 1 Interaction; Email sent is calculated as 5 emails = 1 Interaction; SMS/Chatbot sent is calculated as 5 SMS = 1 Interaction. May include multiple offers, recommendations or actions within a single Interaction

100 Daily Visitor Sessions: is defined as 100 Daily Visitor Sessions where a Daily Visitor Session is defined as a unique individual who accesses the service during a 24 hour period using a specific channel (e.g. web site, mobile app) and is identified through the use of cookie, device id, IP or session id. Access across multiple channels counts for multiple visitor sessions.

Definitions (continued)

Hosted 1,000 Order Lines is defined as the total number of distinct order lines entered into the Oracle program from any source (including manually entered by licensed users) during a 12 month period. This includes order lines originating as external EDI/XML transactions and/or sourced from other Oracle and non-Oracle applications. You may not exceed the licensed number of order lines during any 12 month period.

Hosted 1,000 Planned Item Locations

- Is defined as (The number of planned items) x (The number of planned locations) where,

- **Planned Items:** The total number of unique, active, and planned product records used by the enterprise in the hosted service at any given time. This includes end items, assemblies, components, skis, styles, models and options but does not include any non-planned items, item configurations, organization assignments, or revisions/version of the same item.
- **Planned Locations:** The total number of planned locations where inventory is tracked or used in the hosted service at any given time. This includes physical locations such as plants and warehouses as well as virtual locations used to model inventory holdings such as consigned inventory.

Hosted 1,000 Records: is defined as 1,000 unique customer database records stored in the hosted service.

For the purposes of Fusion Customer Management Foundation for Organizations Cloud Service, a customer database record is a unique business entity or company record which is stored as an account or organization in the hosted service.

For the purposes of Fusion Customer Management Foundation for Persons Cloud Service, a customer database record is a unique consumer (i.e., physical person) record, which is stored as a contact or a person in the hosted service.

For the purposes of Fusion Data Quality Address Cleansing Cloud Service, the number of records should match the number of records of Fusion Customer Management Foundation for Organizations Cloud Service and/or Fusion Customer Management Foundation for Persons Cloud Service.

For the purposes of Fusion Data Quality Matching Cloud Service, the number of records should match the number of records of Fusion Customer Management Foundation for Organizations Cloud Service and/or Fusion Customer Management Foundation for Persons Cloud Service.

For the purposes of Fusion Automated Invoice Processing Cloud Service (and Fusion Document Recognition Cloud Service / old name: Fusion Webcenter Forms Recognition Cloud Service), a record is a unique invoice header, in the hosted service, entered during the month.

For the purposes of Product Hub Cloud Service, a product record is defined by a unique product that is used by an enterprise in the hosted service at any given time. A unique product record would include all items including but not limited to finished goods, phantom items, style items, sku items, pack items, assemblies, components, model and option items but does not include any instance items (i.e. star items), or organization assignments, or revisions/versions of the same item, or items.

For the purposes of Product Hub Portal Cloud Service a hosted product record is defined by a unique record that is uploaded through the Product Hub Portal Cloud Service.

For the purposes of Fusion Accounting Hub Cloud Service, record is a unique external transaction row uploaded to Accounting Hub Cloud Service during the month, and stored in the hosted service. It will be based on unique records in the subledger accounting lines table.

For the purposes of Fusion Accounting Hub Analytics Cloud Service, record is a unique external transaction row uploaded to Accounting Hub Cloud Service during the month, and stored in the hosted service. It will be based on unique records in the subledger accounting lines table.

For the purposes of Enterprise Data Management Cloud Service, a record is defined as a unique instance by name of a specific business entity -- called a node -- such as, but not limited to, company, account, cost center, product, customer, location, departments, or other critical business element that is managed within the hosted service.

For the purposes of Avalara Global Indirect Tax Cloud Service, a record is defined as a sale or purchase, quote or transfer document. Example documents include but are not limited to AP supplier invoices, AR customer invoices, purchase orders, purchase requisitions, prepayments, credit memos, debit memos, change orders, and/or sales orders. Avalara may process a document multiple times across its life cycle events; this is still counted as one record.

Hosted Environment: is the combination of systems and supporting resources to which Oracle grants you access as part of the Oracle Cloud Services ordered by you, that is (i) configured for the Oracle Programs operating on it and for specific uses as part of the Oracle Public Cloud Services, and (ii) used by Oracle to perform the Oracle Cloud Services. The Hosted Environment consists of the Production Environment, and any non-Production Environment(s), as referenced in the applicable Ordering Document and services policies.

Hosted Named Seat Month: For the purpose of Oracle Field Service, authorized individuals are users directly configured in Oracle Field Service with a User status that is "active" and where the User Classification is "regular" regardless of whether the individual is actively accessing the service at any given time during one service month. The Hosted Named Seat Months are pooled for the Service Period stated on the Order Document. You can consume as many units as you need for each month, but will need to buy more units to fill your pool if you run out of capacity before the Services Period End Date. This is monitored retroactively. At the end of each service month, Oracle will look at the previous month's provisioned unique user count, find the maximum number used during the service month and decrement that amount for the total seat pool. You can consume as many seats as you need for each service month, but need to buy more seats to fill your pool if you run out of capacity before the Services Period end date.

Monitored Service User is defined as individuals in the Customer's Cloud/SaaS applications who are authorized by the Customer to be monitored by the Service. Users may include but are not limited to Customer's and Customer's affiliates' employees, customers, partners, consultants, contractors and agents.

Pooled Named User: is defined as an individual authorized by you to access the hosted service, regardless of whether the individual is actively accessing the hosted service at any given time during one calendar month.

The Pooled Named Users are pooled for the Service Period stated on the Order Document. You can consume as many units as you need for each month, but will need to buy more units to fill your pool if you run out of capacity before the Service Period End Date. This is monitored retroactively. At the end of each calendar month, Oracle will look at the previous month's provisioned unique user count, find the maximum number used during the calendar month and decrement that amount from the total User pool.

Student Aid Applicant (SAA): is defined as the quantity of individuals who have submitted an Institutional Student Information Record (ISIR) to your institution within the prior 365 days, inclusive of the date of measurement.

Student Aid Recipient (SAR): is defined as the quantity of your students who have received any form of Financial Aid (including grants, scholarships, loans, work-study, stipends) processed through the system within the prior 365 days, inclusive of the date of measurement.

Test Environment is defined as a single test environment provided to Customer as part of the Cloud Services. A test environment is used by Oracle for testing and validating changes prior to promotion to the production environment as well as for recreating events and duplicating issues occurring in the production environment for the purposes of troubleshooting and facilitating incident resolution.

For the purposes of the following programs: Financial Consolidation and Close Cloud Service, Account Reconciliation Cloud Service, Tax Reporting Cloud Service, Enterprise Planning and Budgeting Cloud Service, Planning and Budgeting Cloud Service, Enterprise Performance Reporting Cloud Service, Oracle Profitability and Cost Management Cloud Service or Enterprise Data Management Cloud Service, the Test Environment option will provide either (a) two additional non-production environments for use with the associated Cloud Service or (b) two additional standby environments for use with the associated Cloud Service for use during service disruption only.

Video Pack (500 Videos - 500 GB) Per Month: is defined as up to 500 Videos consuming up to 500gb of Storage per month.

Warehouse Facility: is defined as a warehouse location where Oracle Warehouse Management Enterprise Edition Cloud Service is integrated with one or more types of material handling equipment systems. Examples of material handling equipment include: conveyors, pick/put-to-light systems, carton sorters, tilt tray sorters, automated storage and retrieval systems.

1,000 Page Views: is defined as 1,000 Page Views per Month where one Page View is defined an instance of an Internet user visiting a particular page on a website.

1,000 Sessions: is 1,000 Sessions where Session is defined as a user who accesses the Oracle Digital Assistant (ODA) through a specific channel (such as Slack, Web Client, MS Team, etc.), and can have as many interactions with the ODA through that channel until the user has closed the chat client or after the session has timed out (Maximum Value = 24 Hours).

1,000 Unique Viewers: is defined as 1,000 unique visitors where a unique visitor is defined as a unique individual that interacts with the service through a specific channel (website, app, API, email, etc) regardless of frequency of visits during a specific period of time. Unique visitors are tracked thru the use of cookie, user id, device id, token, IP or session id.

For the purpose of Oracle Content and Experience Cloud, anonymous access to the service is tracked as unique visitors during a 24-hour period. The service also tracks authenticated unique visitors based on the role given in the service during a 24-hour period. In addition, during the 24-hour period, the service tracks the number of API calls made to the service. If the number of API calls exceeds the API calls that are entitled per unique visitors, a new unique visitor is added.

Definitions (continued)

\$1,000 in Revenue: is defined for purposes of Oracle Commerce Cloud Service as one thousand United States dollars (or the equivalent amount in local currency stated in the order) of goods and services successfully purchased using the site's shopping cart, valued at the actual purchase price and excluding the value of separately identified shipping and sales tax charges. Site revenue is unaffected by downstream returns or cancellations except those that are communicated back to the Cloud Service in the same month in which the original sale occurred.

10,000 Hosted Customer Records per Month: is defined as 10,000 unique Customer Records accessed using the program during a calendar month, including contact records and unconverted lead records (i.e. prospects). Accessed Customer Records include all records accessed through campaigns (static, workflow, adaptive), microsites, web forms, lead scoring, web tracking, import, and response processing.

Customer Records do not include shared references that may be essential for data management purposes and excludes anonymous website visitors.

Customer Records do include contact or prospect records that are stored in the system temporarily during the subscription term (for example for rented prospect data).

Accounts with no associated contacts but are communicated to using the program are calculated as 1 contact per account.

50,000 Messages: is defined as 50,000 email message sent to marketing contacts (including contacts, customers, prospects, or employees) from the Oracle Fusion Marketing system. Unused or partially used email blocks expire at the end of the subscription term and do not rollover to a new term.

25,000 Transactions Per Hour is defined as 25,000 Transactions Per Hour where one transaction represents one external API request per hour and this service increases the contractual limit set forth in the "External API Transaction Processing Peak Capacity Limit" table by an additional 25,000 transactions per hour.

50 Gigabytes is defined as 50 Gigabytes of additional computer storage space used by a storage filer equal to fifty billion bytes through the Cloud Service. For products such as Oracle Planning and Budgeting Cloud Service, that include two environments per Subscription ID, "50 Gigabytes" provides entitlement to an additional 50 Gigabytes of storage per environment (production and non-production).

Hosted Record (For Oracle Account Enrichment and Contact Enrichment Cloud Service): For the purposes of the Oracle Account Enrichment, Oracle Contact Enrichment, Oracle Account Enrichment Additional Application and Oracle Contact Enrichment Additional Application Cloud Services, a Hosted Record is defined as database record in the Cloud Service that has a collection of attributes or fields containing data about Accounts (aka Companies) and Contacts provided by Dun & Bradstreet (D&B).

A database record that is created and first processed (e.g., when the record is either downloaded or matched to enrich/clean an existing Hosted Record) constitutes a new Hosted Record for purposes of the order including pricing. Further processing of that Hosted Record within the twelve (12) months of the first time the record is processed does not constitute a new Hosted Record for pricing purposes.

Hosted Record (for Oracle Address Verification Cloud Service): For purposes of the Oracle Address Verification Cloud Service, a Hosted Record is defined as database record in the Cloud Service that has a collection of attributes or fields containing data such as street, city, country, etc. about a postal address. A Hosted Record in this context is the result of the submission of one address record for purposes of either searching or verifying or cleaning an address. Each submission of an address constitutes a new Hosted Record for purposes of the order including pricing. Multiple submissions of a single address will be treated as separate records.

Hosted Tax Return: Is defined as the total number of tax returns that a customer purchases to support their statutory tax returns filing requirements with local jurisdiction tax authorities.

1,000 Subscriptions: Is defined as one thousand subscription lines where each is an individual, billable service or managed asset with recurring billing processed by Oracle Subscription Management Cloud Service.

1,000 in ARR: Is defined for purposes of Subscription Management Cloud Service as one thousand U.S. dollars (or the equivalent amount in local currency stated in the order) of the total subscriptions ARR in a given period processed by Oracle Subscription Management Cloud Service.

5,000 Assets Per Month: is defined as 5,000 Assets Per Month, where one (1) asset is one (1) item of any type (published or not published) stored in an Oracle Content Management Cloud Service asset repository. An asset stored in the asset repository can be either a file-based asset (e.g., a document, an image, a video) or a content item and a content item is a block of information created using a content type. Every twenty (20) files of any type stored in the Oracle Content Management documents file repository counts as one (1) asset; Every one hundred (100) files of any type stored in an Oracle Content Management business asset repository counts as one (1) asset; And every two hundred (200) files of any type that has been archived counts as one (1) asset.

Gigabyte Outbound Data Transfer Per Month: is defined as the quantity during a month of the Oracle Cloud Service of both the data You download from the Oracle Cloud Service and any transfer of data from the Oracle Cloud Service over the internet including responses to Your client requests.
