Property violates this Agreement, including any security or data privacy requirements herein, or is otherwise unsatisfactory, Oracle may terminate this Agreement, require that Developer modify the Developed Property, uninstall or disable, or require that Developer or User uninstall, the Developed Property, or suspend Developer's access to the Service until the violation or other issues are resolved.

(c) Making Developed Property Available to Users. Subject to the limitations set forth herein and any applicable registration requirements, and provided that Developer adequately labels the Developed Property to identify the entity making available and responsible for the Developed Property, Developer may make Developed Property that Developer develops available within the Service to other Users as further described in applicable documentation. In doing so, Developer is solely responsible for (i) controlling access to, and the accessible attributes of, Developed Property as further described in the documentation, (ii) the terms governing access and use, and (iii) having authorized account access and all necessary permissions prior to installing a Developed Property into the Service account of a User.

To the extent no such terms of use are included or otherwise agreed to by User, Developer grants User a non-exclusive right and license to reproduce, install, and use any Developed Property that Developer makes available to User to access in connection with the Service. Notwithstanding any rights granted by Developer to a User related to Developed Property, Developer agrees that Oracle may exercise its rights under its agreement with a User with respect to such User's access and use of the Service at any time without notice or liability to Developer, including its right to suspend or terminate the Service for indefinite periods of time, or to cancel the Service at any time, which will have the effect of suspending User's access and use to such Developed Property.

(e) Testing. Upon Oracle's request and prior to making each release of a SuiteApp available to Users or other third parties, Oracle and Developer agree to (i) configure an automated testing framework for the SuiteApp, (ii) test, or have Developer test, SuiteApp with the Service and other applications for each upgrade of such application, including maintenance releases, and (iii) approve release of the SuiteApp. In connection with the foregoing and solely to the extent Developer is legally entitled to do so, Developer will also provide access to and the right to use any tools, documentation, components, and environments required for use and operability of the SuiteApp. Developer will conduct load and security testing solely when requested by Oracle and as directed and in cooperation with Oracle.

For the purposes of this Agreement, "Assert" means to bring an action of any nature before any legal, judicial, arbitration, administrative, executive, or other type of body or tribunal that has or claims to have authority to adjudicate such action in whole or in part including, without limitation, the United States

State and Federal Courts, the United States International Trade Commission and any foreign counterparts of any of the foregoing.

User agrees that Oracle will not be liable to User, or to any third party, for terminating User's access to the SuiteCloud Technologies in conformance with this Section 7. In the event Oracle terminates Developer's access to the SuiteCloud Technologies, Developer further agrees that Users who have received authorized access to Developed Property, will continue to access and use such Developed Property in accordance with the terms of User's agreement with Developer or this Agreement.
