Oracle Java SE Subscription and Oracle Java SE Desktop Subscription: are defined as the right to use the specified Oracle Java SE Subscription Program(s) in accordance with the applicable metric and to receive Oracle Software Update License & Support (limited to the specified Oracle Java SE Subscription Program(s)), for the term specified on the ordering document. You may not create, modify, or change the behavior of classes, interfaces, or subpackages that are in any way identified as "Java", "Javax", "Sun", "Oracle", or similar convention as specified by Oracle in any naming convention designation. Your right to use the specified Oracle Java SE Subscription Program(s) for Your internal business operations includes using the Oracle Java SE Subscription Program(s) to run Your Java applications as a cloud service, subject to the terms of the Master Agreement. For the avoidance of doubt, You shall not make the Oracle Java SE Subscription Program(s) themselves available as a cloud service. The subscription term is effective upon the effective date of the subscription ordering document, unless otherwise stated in Your ordering document. If Your order was placed through the Oracle Store, then the effective date is the date Your order was accepted by Oracle. Oracle Software Update License & Support is provided under the Oracle Software technical support policies in effect at the time the services are provided. At the end of the specified subscription term, You may renew Your subscription, if available, at the then current fees for the applicable subscription. If You choose not to renew Your subscription, Your right to use the specified Oracle Java SE Subscription Program(s) will terminate and You must de-install the specified Oracle Java SE Subscription Program(s).

With respect to Java SE Desktop Subscription – Named User Plus Program, the term "server" refers to a desktop computer.

With respect to Java SE Subscription - Processor, when licensing Oracle Programs with Standard Edition 2, Standard Edition One or Standard Edition in the product name, a processor is NOT counted equivalent to an occupied socket; however, in the case of multi-chip modules, each chip in the multi-chip module is counted as one occupied socket.

Native Image Feature

1.Definitions: "Native Image Feature" refers to the optional Native Image Feature and related technology that is identified as "Early Adopter" and provided to You by Oracle as a component of and for use with GraalVM Enterprise Edition software available with the Programs (as further described in the Program Documentation). "Native Image" refers to executables built using the Native Image Feature. "Excluded License" means any license that requires as a condition of use, modification and/or distribution of software subject to the Excluded License, that such software or other software combined and/or distributed with such software be (a) disclosed or distributed in source code form under the terms of the Excluded License or otherwise; or (b) licensed for the purpose of making derivative works.

2.You may only use the Native Image Feature, including Native Images built with it, in accordance with the rights and restrictions in the Master Agreement, subject to the additional restrictions and limitations set forth in your order.

Native Images created using Early Adopter technology include proprietary materials that prevent a Native Image from being placed under an Excluded License or other open source terms. You may not distribute such Native Images under an Excluded License or other open source terms nor take any other action that would have the effect of requiring such distribution. Without limiting the foregoing, You may not distribute any application or code that combines a Native Image, or any portion thereof, with any software that is subject to any version of the GNU General Public License (GPL) or any license with a similar reciprocal license obligation in a manner that would create a combined or derivative work (including but not limited to distribution to any third party contractor, affiliate or subsidiary, or any employee thereof that is not entitled to receive the Programs under this order).

3.The Native Image Feature is subject to ongoing development, testing, and modification. Oracle may significantly change the features and functionality of the Native Image Feature, and future releases may include changes that are incompatible with the current version. Oracle may also place limits on backports. You may be required to change Your application significantly to use future versions of the Native Image Feature. Any development or other work You undertake with the Native Image Feature is at Your sole risk.

THE NATIVE IMAGE FEATURE IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND.
