Enterprise point of sale (POS) that helps your business grow

This validated integration combines the power of Fedelta POS with Oracle's industry-leading property management system (PMS).

Company Overview

Founded in 2003 in Brisbane, Australia, AFJ Software strives to deliver innovative, powerful, and intuitive software for retail and hospitality businesses. A global company, AFJ Software operates in 15 countries.

Fedelta is an industry leading POS solution built with input from hospitality customers across the globe. Fedelta employs a modular design, enabling it to appeal to a broad range of businesses. Fedelta is trusted by customers ranging from single POS sites to industry titans and publicly listed companies with diverse business portfolios and complex integration requirements.

The company's willingness to listen and ability to adapt bespoke requirements into broadly appealing functionality has been key to its success. The process begins with customer input and extends to consultation throughout implementation services and continues through to post go-live support. This ensures a customer focused experience in all of our interactions.

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Integration Overview

The integration provides connectivity between Fedelta POS and Oracle Hospitality OPERA PMS to communicate POS transactions to Oracle Hospitality OPERA. Hotel guests are able to charge items and services to their room and conveniently pay for the items at checkout. The integration enables detailed bill breakdown so that the entire folio can be reviewed at checkout by the guest.

Functionality provided by the integration includes:

- Lookup room via guest name or room number
- Authorization slip for guests to sign
- Support for partial bill payment (For example, part of a bill may be paid in cash with the remainder charged to the room.)
- Split bill to room
- Refund to room
- Room charge reconciliation

Revenue breakup includes:

- Support for 16 itemizers
- Support for unlimited service periods, customizable per outlet or revenue center
- Support for posting transactions to folios other than rooms such as cash, credit cards, and house accounts.

Integration Details

The integration supports the following functionality:

- Post inquiry to Oracle Hospitality OPERA PMS
- Posting list from Oracle Hospitality OPERA PMS
- Guest or room posting to Oracle Hospitality OPERA PMS
- Posting with other payment methods to Oracle Hospitality OPERA PMS
- Posting answer from Oracle Hospitality OPERA PMS
