Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Company Overview

AMTT is an intelligent and ecological hotel operator with more than 10 years' experience with the hospitality industry. With the development of internet technology, AMTT devoted itself to researching the special features of internet access required to provide hotel internet operation and management. AMTT understands internet demand variations faced by hotels at varying times.

Integration Overview

AMTT's HiBOS pmsd communicates with Oracle Hospitality OPERA property management system via the Fidelio Interface Application Specification (FIAS) format.

Integration Details

The integration supports the following functionality:

- Check in and check out
- Room moves
- Database resync
- Guest information change
- Simple charge posting
- Guest messages
- Folio review
- Remote check out
- Night audit notification
