Company Overview

Founded in 2011, AxisRooms employs creative thinkers and problem solvers in the travel and hospitality industry, bringing a deep understanding of the hotel business to its solutions. The company was founded with the intent to increase and improve hotel business distribution using breakthrough technological solutions and providing the vision to help clients transition to better business practices. Today, AxisRooms provides a complete suite of products that increase distribution, profitability, and efficiency for its hotel customers.

Integration Overview

AxisRooms' Channel Manager is integrated with a wide network of travel partners and online travel agents (OTAs). Through the validated integration with Oracle Hospitality OPERA and Channel Manager you can manage all your hotel's listings on these travel partners via Oracle Hospitality OPERA.

Channel Manager is integrated with Oracle Hospitality OPERA's alternate distribution system (ADS) for managing hotel inventory and pricing. Bookings received by Channel Manager from connected OTAs are synced with Oracle Hospitality OPERA property management system (PMS).

With two-way connectivity between Channel Manager and Oracle Hospitality OPERA PMS, rates and inventory are pushed to Channel Manager from the PMS while bookings are pushed from Channel Manager to the Oracle Hospitality OPERA PMS. In addition, rooms and rates can be created on Channel Manager and mapped to the corresponding room and rate fields in Oracle Hospitality OPERA PMS.

ORACLE®

Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Integration Details

Channel Manager's integration with Oracle Hospitality OPERA's ADS uses an API integration. With the integration, you can

- Map rooms and rates from Oracle Hospitality OPERA PMS with Channel Manager.
- Send pricing for every room and rate combination from Oracle Hospitality OPERA PMS to Channel Manager.
- Send inventory for every room to Channel Manager.
- Receive booking and cancellation information from connected OTAs into Channel Manager; Channel Manager then delivers that inforamation automatically to Oracle Hospitality OPERA.
