Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Maximize your revenue by pricing intelligently.

AxisRooms provides a suite of apps to help your hotel to better manage its distribution. Knights Templar, AxisRooms' revenue management system (RMS), delivers dynamic pricing based on demand, season, day of week, competition, and more. With it, you can provide optimal rates around the clock, every day of the year.

Company Overview

Founded in 2011, AxisRooms goal is to improve hotel room distribution using breakthrough technological solutions. With a vision of helping clients transition to better business practices, AxisRooms's strategic team uses clear, straightforward methodologies with its clients to provide insights that drive revenue. Today, AxisRooms is a market leader, developing ingenious, transparent system software that executes the demanding tasks required of the travel and hospitality industry.

Integration Overview

AxisRooms' Knights Templar RMS delivers dynamic, optimized pricing based on demand, season, day of week, competition, and other timely inputs. The validated integration between Knights Templar and Oracle Hospitality OPERA uses the Oracle Hospitality OPERA Xchange Interface (OXI). With a two-way connection between AxisRooms' Knights Templar RMS and Oracle Hospitality OXI, price updates and restrictions can be pushed from the RMS to Oracle Hospitality OPERA. In addition, bookings, packages, configuration, stays, allotments, and other messages can be sent from Oracle Hospitality OPERA to Knights Templar. The integration helps hotels to manage hotel pricing and reservations.
