Company Overview

Founded in 2013 and employing more than 50 hospitality and technology experts, Beonprice provides a comprehensive and effective automatic revenue management solution that is available to hotels around the wold. Based on leading big data technology, Beonpricefacilitates and optimizes your price management decisions in the hotel industry.

Integration Overview

The integration between Beonprice Revenue Integration and Oracle Hospitality OPERA property management system (PMS) enables customers to connect their reservation data with Beonprice's system. Thanks to this connection, Beonprice is able to pull all this data into its calculations and analyze it using a powerful algorithm to provide the best price management solution to its clients.

Once these calculations are made, customers can use these recommendations in each of their distribution channels for the best optimization.

Integration Details

The integration enables the following:

- Triggers reservations from Oracle Hospitality OPERA PMS
- Triggers inventory from Oracle Hospitality OPERA PMS
- Posts restrictions into Oracle Hospitality OPERA PMS
- Posts rate updates into Oracle Hospitality OPERA PMS

XML versions used at each integration point are:

- Reservations use XML version 5.
- Profiles use XML version 5.
- Real-time audio visual (RTAV) uses XML version 4.

ORACLE
Validated Integration
Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

ter

- Restrictions use XML version 4.
- Rate uses XML version 6.
- Results use XML version 4.
