A Passion for Digital Hotel Solutions

Betterspace provides a holistic, digital hotel solution for the entire guest journey including guest communication, energy management, and other hotel-related services.

Company Overview

Betterspace is the innovative and holistic 360-degree platform provider for the reliable and efficient digitalization of the hotel industry.

Betterspace revolutionizes the communication between hoteliers and guests while helping hoteliers generate revenues, reduce costs, and protect the environment. This results in an optimization of operating and communication process in the hotel.

Integration Overview

Betterspace provides a software and hardware on-premises-based connector to Oracle's interface, which enables bidirectional communication between the Betterspace Cloud platform and Oracle Hospitality Suite8 8.10 property management system (PMS). It allows hoteliers to communicate to guests directly via the Betterspace Cloud platform.

Integration Details

The integration enables the following:

- Receive guest check-in and check-out data from Oracle Hospitality Suite8 PMS as soon as the actions are performed.
- Handle reservations where guests in the same room each receive a separate bill.
- Receive a notification from Oracle Hospitality Suite8 PMS whenever a checked-in guest performs a room move.
- Receive a notification from Oracle Hospitality Suite8 PMS whenever a checked-in guest changes departure date, guest name, or language
- Request to, or receive from Oracle Hospitality Suite8 PMS, database swap commands to refresh the house occupancy status on the vendor system.
- Receive every text message as soon as it is entered into Oracle Hospitality Suite8 PMS.
- Set the message status to Received in Oracle Hospitality Suite8 PMS.
- Send text messages to Oracle Hospitality Suite8 PMS.

Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.
