HotelRunner

HotelRunner Channel Manager Validated Integration with Oracle Hospitality OPERA 5.5

The HotelRunner Channel Manager provides an XML interface to room reservations, rates and inventory in Oracle Hospitality OPERA.

HotelRunner is a SaaS-enabled B2B network for accommodations and travel agencies allowing them to find, contract, connect, and transact with each other online, to increase online accommodation bookings at scale.

A cloud-based digital marketing, channel management, and sales platform, HotelRunner maximizes online visibility, boost occupancy rates, and increase revenues. Used by hotels, daily rentals, and travel agencies around the world, HotelRunner allows properties to manage inventory, rates and to accept online payments.

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Company Overview

Founded in 2011, HotelRunner is a freemium, cloud-based, online platform for sales, digital marketing, and channel management that helps hotels and travel agencies tailor, streamline, and improve their online outreach.

HotelRunner helps hotels and travel agencies' transition to an online presence through state-of-the-art technology. It helps hotels create innovative sales channels, improve international brand recognition, reach more customers, and boost profits. HotelRunner automates inventory distribution, maximizes direct channel revenues, and boosts profits.

Integration Overview

With the integration between HotelRunner and Oracle Hospitality OPERA property management system (PMS), hotels can update inventory, prices, and restrictions in the PMS and instantly receive reservations from the HotelRunner Channel Manager.

Integration Details

The integration enables the following:

- Reservation push from HotelRunner to Oracle Hospitality OPERA
- ErrorNotifRQ push from HotelRunner to Oracle Hospitality OPERA
- Rate updates, restriction updates, and Inventory updates from Oracle Hospitality OPERA to HotelRunner.
