Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Hapi cloud exposes the digital customer journey from booking to departure, so hotel companies can better challenge modern competitors. Hapi allows them to fully capitalize on data traditionally locked in disparate, legacy systems.

HAPI Cloud provides a secure, scalable cloud data hub, an open API and schema, and secure data contracts. The HAPI data streaming platform is based on the same proven technology that runs some of the largest social media and business services. To that foundation, HAPI adds multiple layers of encryption, authentication, and governance and ensures the most important parts are open source. HAPI is PCI-DSS Service Provider Level 1.

Company Overview

HAPI Cloud has been founded by seasoned hospitality leaders who believe hospitality will be better when the barriers of innovation are eliminated. Traditional commercial models and multiple integration standards hurt innovation and progress. HAPI Cloud's vision is to apply the best open technologies in a new and inclusive model. With the expansion of data and amazing new capabilities being delivered outside the hospitality vertical, it is time for the industry to rethink its approach. The result is to deliver a platform where data can be consumed from multiple sources and then normalized, enriched and filtered before exposing it to other innovative technology partners.

Integration Overview

The integration publishes data from Oracle's controller and hotel property interface, IFC8 FIAS, onto the HAPI platform and allows HAPI subscribers to make requests and update Oracle Hospitality OPERA property management system (PMS) via HAPI APIs.

Integration Details

The integration allows for the following:

- Reservation updates from Oracle Hospitality OPERA PMS
- Post charges to a guest folio
- Request guest folio information
- Request remote checkout
- Update room status

AVAILABILITY

52 Riley Rd #522
 Celebration, FL 34747
