Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle onpremises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Company Overview

EUROICC is an original equipment manufacturer (OEM) of programmable logic controllers and room controllers. It focuses on saving energy through smart management of hotels, public venues, and residential properties. EUROICC has developed a compact series of programmable controllers that meet industrial standards and market demands. Small in dimensions and open to user programming, the compact controllers are a contemporary solution with broad use. For hospitality applications, compact controllers are accompanied by glass room panels and controllers which enable a full smart hotel experience.

Founded in 1998, the company has numerous successful applied automation and hospitality projects implemented across the globe.

Integration Overview

Toccata communicates with Oracle Hospitality Suite8 property management system (PMS) via the Fidelio Interface Application Specification (FIAS) protocol. Communication enabled includes notification of guest check in and checkout, room movements, and stay extensions.

Integration Details

The integration enables the following:

- · Receive guest-based check-in and checkout information from Oracle Hospitality Suite8 PMS as soon as the actions are performed.
- Receive a notification from Oracle Hospitality Suite8 PMS whenever a checked-in guest performs a room move.
- Receive a notification from Oracle Hospitality Suite8 PMS whenever a checked-in guest changes departure date or guest name.
- Request to Oracle Hospitality Suite8 PMS, or receive from the PMS, database resync commands to actualize the house occupancy status on the vendor system.
