EVO Payments

EVO Adapter for Oracle E-Business Suite 12.2

The EVO Adapter integrates with Oracle Payments, the central payment engine of Oracle E-Business Suite. It automates the accounts receivable process, enabling efficient, reliable, and secure financial transactions.

COMPANY OVERVIEW

EVO Payments, Inc. has a global presence operating in more than 50 markets worldwide and supporting more than 130 currencies and. EVO Payments is an exceptionally innovative and technology-focused card processor in the payment industry. Founded in 1989, the company is nationally recognized for its service, support, and specialization in bringing the latest electronic payment solutions to businesses of all types and sizes—quickly, affordably, and securely.

INTEGRATION OVERVIEW

The EVO Adapter integrates into the Oracle Payments module of Oracle E-Business Suite to automate payment processing. This reduces time, resources, and errors associated with manual ledger entries.

INTEGRATION DETAILS

The EVO Adapter for Oracle E-Business Suite plugs into Oracle Payments to enable standard Oracle functionality for funds capture and credit card processing. The adapter is fully PCI-DSS compliant and communicates with the EVO PayFabric Gateway through secure HTTPS connections for transaction processing.
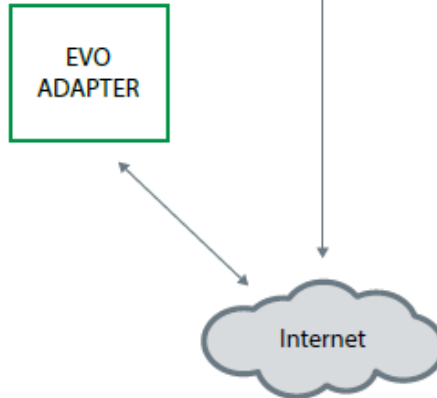

- Java-based application for easy maintenance and enhancement.
- Java components run all supported Oracle E-Business Suite R12 or greater platforms.
- Fully supports all transaction types: sales, authorizations, captures, voids, refunds, and batch settlements.
- Supports credit, debit, business, government, and purchasing cards from all major card brands.
- Processes tokens for all transactions, reducing PCI scope.
- Can be installed by client's technical staff or third-party integration firm with support by EVO B2B Support Team.

ORACLE
Validated Integration
Oracle E-Business Suite

Oracle Validated Integration provides customers with confidence that a partner's integration with an on-premise Oracle application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

High-level architecture of the EVO Adapter for Oracle E-Business Suite.
