

# Fiserv

## Retail Solution Integration with Oracle Payment Interface 17 – Pay@Retail

The retail landscape is constantly changing to cater to an ever-more-demanding and -informed consumer. Fiserv now offers the retail industry much more than a traditional point-of-sale (POS) solution – a retail solution integrated with Oracle Payment Interface that eliminates the need for custom integration and empowers merchants to provide memorable service levels.

### COMPANY OVERVIEW

Fiserv aspires to move money and information in a way that moves the world. As a global leader in payments and financial technology, the company helps clients achieve best-in-class results through a commitment to innovation and excellence in areas including account processing and digital banking solutions, card issuer processing and network services, payments, e-commerce, merchant acquiring and processing, and the cloud-based Clover POS and business management platform.

Fiserv has operated in the Asia Pacific region since 1987 and serves thousands of businesses and financial institutions across it.

### INTEGRATION OVERVIEW

The validated integration between the Fiserv Retail solution and Oracle Payment Interface provides comprehensive payment functionality from within Oracle Retail Xstore POS, which allows merchants to connect securely to Fiserv's data center in the Asia Pacific region. Fiserv smart terminals deployed at a merchant's premises will deliver the transaction requests to Fiserv's acquiring authorization hosts for approval.

This validated integration provides a modern, seamless, highly scalable, and reliable payment solution for retail merchants.

### INTEGRATION DETAILS

Fiserv Retail solution integration with Oracle Payment Interface has been validated for these functionalities and payment types:

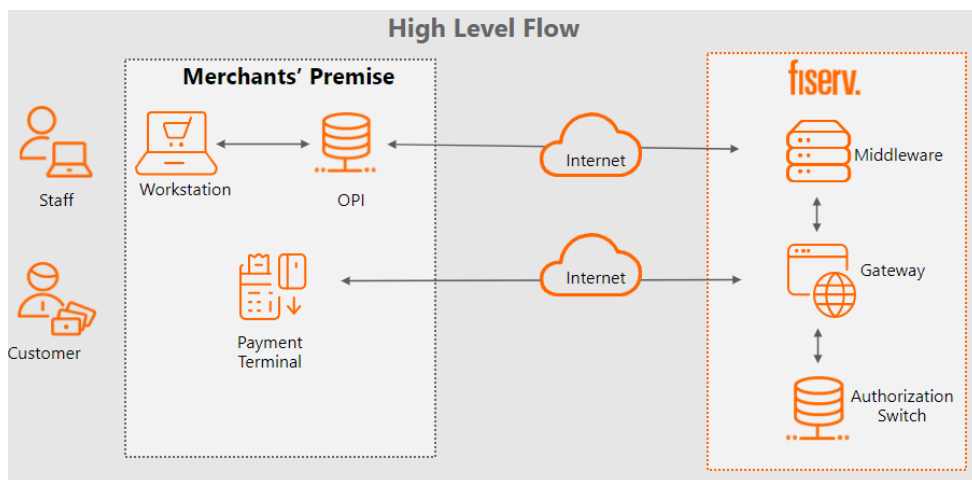

- Card payment/purchase
- Refund and void
- Void of refund
- Reversal
- Dynamic currency conversion (DCC)
- Day end settlement

### ORACLE Validated Integration Oracle Retail

Oracle Validated Integration provides customers with confidence that a partner's integration with an on-premises Oracle application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.
