Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

The smart and professional iPad point-of-sale (POS) system for hotels and restaurants

GASTROFIX provides an app- and cloud-based iPad POS system with full offline capability, unlimited mobility and scalability, multi-venue (branch) management, an intuitive user interface and user experience, and a strong application programming interface (API).

Company Overview

GASTROFIX has more than 20 years of experience in the POS market and is a market leading provider for professional iPad POS system., GASTROFIX has a footprint in seven European markets and serves more than 10,000 customers in the hotel and restaurant industries. The GASTROFIX portfolio consists of hardware, software as a service (SaaS), and a full range of services to offer a 360 degree approach for hospitality and restaurant customers.

Integration Overview

The integration between GASTROFIX's POS system and Oracle Hospitality OPERA 5.5 provides a solution for bidirectional communication between the two systems using the GASTROFIX Device Server.

Integration Details

The integration allows restaurant and hotel operators to accomplish the following:

- Send inquiries to Oracle Hospitality OPERA Property Management System (PMS) to check room occupancy. Inquiries can be performed by either room number or guest name.
- Send room postings to the Oracle Hospitality OPERA PMS.
- Handle discounts as a Total Amount per check.
- Send cash or credit card postings to Oracle Hospitality OPERA PMS. Revenue will be sent to the Oracle system during the POS' end-of-day procedure.
- Handle NoPost flags received from Oracle Hospitality OPERA PMS.
- Handle individual postings for each occupant in the room.
- Post covers.
- Void a previous posting.

Serving Charges and Serving Time are not supported in this integration.
