HOTELFINDER.DE GMBH

OnlineRes Validated Integration with Oracle Hospitality Suite8 8.12

OnlineRes

The commission-free booking engine for your hotel's website

OnlineRes is a fully customizable, mobile-ready booking engine that integrates directly into your website. With it, guests can book reservations directly from your hotel's own homepage.

Birkenallee 135
Rheine, Germany,48432

onlineres.de

Company Overview

In addition to OnlineRes internet booking engine (IBE), Hotelfinder.de GmbH & Co KG offers OnlineChannel, an online, professional channel management solution, and OnlineVoucher, a coupon shop for your website.

OnlineRes and OnlineChannel use the OTA XML Interface Two Way to connect with Oracle Hospitality Suite8 property management system (PMS).

Integration Overview

The integration enables the following data to be transferred between Oracle Hospitality Suite8 OTA XML interface and OnlineRes via a secure sockets layer (SSL):

- **Room availability:** OTA_HotelInvCountNotifRQ/OTA_HotelInvCountNotifRS
- **Rate availability:** OTA_HotelBookingRuleNotifRQ/OTA_HotelBookingRuleNotifRS
- **Rate code:** OTA_HotelRatePlanNotifRQ/OTA_HotelRatePlanNotifRS
- **Reservation delivery:** OTA_HotelResNotifRQ/OTA_HotelResNotifRS

Integration Details

The hotel needs to purchase and install an SSL certificate for internet information services (IIS) in order to provide an encrypted connection for the incoming messages from OnlineRes to Oracle Hospitality Suite8. The endpoints provided by OnlineRes to receive the messages sent by Oracle Hospitality Suite8 are also secured by SSL.

OnlineRes endpoints include:

- **Rate availability**
- **Inventory**
- **Rate plan**

Mappings for room types, rate codes, guarantee types, market codes, source codes and packages need to be provided by the hotel. Hotelfinder.de is working to develop functionality for resync, rate codes, and rate restrictions.
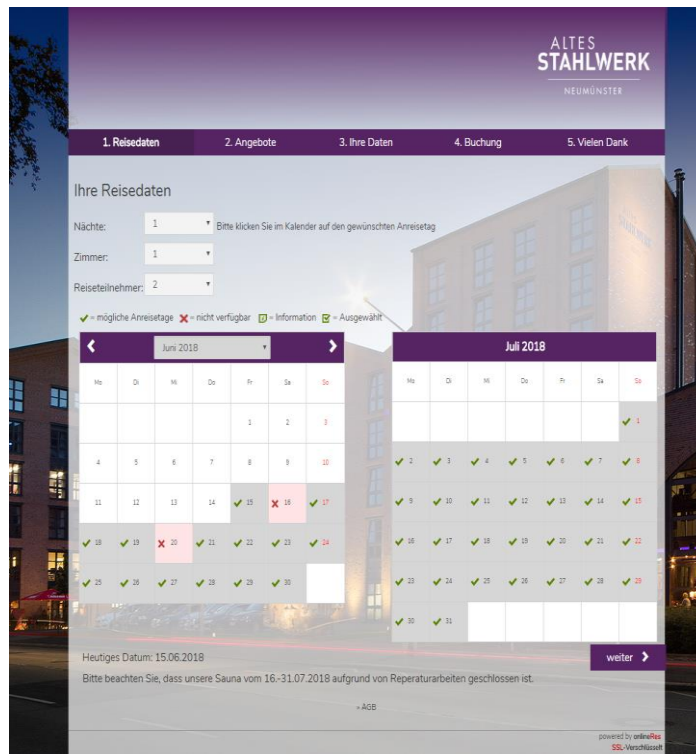

ORACLE

Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.
