ORACLE

Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

An entirely new approach to hospitality and casino revenue management

Born from the hospitality/gaming space and the challenges presented by managing complex, integrated resorts, Luxe Pricing's highly advanced engineering team borrows math and science from the aerospace industry and Wall Street to create HouseCount, a best-in-class revenue management system (RMS) presenting real-time yield information to the user in a transparent and responsive single-page application.

Company Overview

A hotel pricing company built by hotel people for hotel people, Luxe Pricing has more than 100 years of combined hospitality, gaming, operations, sales, marketing, and engineering experience. Luxe Pricing uses the engineering techniques that solve the world's toughest problems and applies them to pricing.

HouseCount is a cloud-based software system with mathematical fundamentals built around pricing elasticity. It maximizes profitability by providing minute-by-minute price recommendations. Although it is based on sophisticated technology, HouseCount's easy-to-use interface provides clear and transparent metrics that everyone in hotel operations can understand, regardless of their analytical background.

Integration Overview

The validated integration sends reservation, allotment, price, and inventory data from Oracle Hospitality OPERA to HouseCount via the OPERA Exchange Interface (OXI). HouseCount uses this data in real-time to generate optimized rate, restriction, and overbook recommendations for the hotel. HouseCount then posts these changes to Oracle Hospitality OPERA via the OXI interface (OXI polls HouseCount).

Integration Details

The integration enables the following:

- Allotment update from Oracle Hospitality OPERA
- Inventory update from Oracle Hospitality OPERA (RTAV)
- Rate update from Oracle Hospitality OPERA
- Restriction update from Oracle Hospitality OPERA (RAVL and RAVR)
- Reservations update from Oracle Hospitality OPERA
- Revenue summary from Oracle Hospitality OPERA

AVAILABILITY

Luxe Pricing Offices
 2831 St. Rose Pkwy
 Suite 200
