Oasis POS Software for Hotels and Casinos

Oasis offers browser-based, point-of-sale (POS) software for food and beverage operations in hotels and casinos that integrates with Oracle Hospitality OPERA property management system (PMS).

Company Overview

Oasis Hospitality Software specializes in both on-premises and cloud-based POS for hotels and casinos. Custom service is available upon request.

The OASIS POS meets most local taxation and language requirements in Asia Pacific and India. In addition, it supports all browser-based touchscreen terminals and the popular thermal and dot-matrix POS printers in the market.

Integration Overview

The Oasis POS follows the Oracle Hospitality OPERA XML_POS protocol without requiring a hardware interface. Oracle Hospitality OPERA PMS is the socket server and Oasis POS is the client.

Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

High-level integration architecture

Integration Details

The integration enables the following:

- Post inquiries by room number and by name to Oracle Hospitality OPERA
- Send a posting list from Oracle Hospitality OPERA
- Send guest or room postings to Oracle Hospitality OPERA
- Send cash and credit card postings to Oracle Hospitality OPERA
- Enable posting by serving time and revenue center to Oracle Hospitality OPERA
