

P3 Hotel Software

P3 Hotel Booking Engine Integration with Oracle Hospitality OPERA 5.6

The P3 Booking Engine is developed for large independent hotels and hotel chains that are equipped with Oracle Hospitality OPERA. P3 designs and builds the system to be customized to each hotel, incorporating their visual identity to maintain brand continuity. P3's experience in conversion rate optimisation and user experience (UX) and user interface (UI) design results in a high-converting, easy-to-use booking engine system.

COMPANY OVERVIEW

An Irish technology company, P3 Hotel Software has 20 years' experience providing customized booking solutions for large independent hotels and international hotel chains that use Oracle Hospitality OPERA property management system (PMS).

The company's mission is to ensure a sustainable and timely growth for its clients by providing efficient processes and high-quality products to maximize revenue. P3's solutions facilitate a smooth booking process and an enhanced experience for guests, reducing friction points for both guests and hotel operators.

INTEGRATION OVERVIEW

P3 Booking Engine integrates with the on-premise version of Oracle Hospitality OPERA. P3's extensive experience in working with OPERA Web Services (OWS) systems ensures clients get the best support on an ongoing basis for their booking engine. The additional benefits that this integration brings to hotels include ease of use, time savings, and increased revenue.

INTEGRATION DETAILS

P3 Booking Engine is designed from a mobile-first perspective to optimize usability on all devices. P3 embraces ecommerce practices to deliver an intuitive, user-friendly, and appealing booking experience for hotel guests.

P3 is compliant with both PCI-DSS and the General Data Protection Regulation (GDPR). Online payments are protected with 3D Secure to meet the European Union's second payment service directive (PSD2) requirements, and the booking engine is integrated with the world's leading payment providers.

The real-time, three-way integration of the booking engine with Oracle Hospitality OPERA offers a streamlined data flow, making booking engine management easier and more efficient for hotel operators.

ORACLE
Validated Integration
Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an on-premise Oracle application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

The integration includes the following functionality:

- Real-time integration with Oracle Hospitality OPERA PMS for room availability, rates, and reservations.
- Automatic addition of guest information to Oracle Hospitality OPERA profiles.
- Integration with online payment providers and support for Oracle Payment Interface.
- Real-time retrieval of package add-ons in the PMS to the “Enhance Your Stay” page.
- Integration between the P3 booking tool and the company profiles and negotiated rates in Oracle Hospitality OPERA.
- Integration between loyalty software and Oracle Hospitality OPERA profiles.
- Ability to work with promo codes, block codes, and corporate codes pulled from Oracle Hospitality OPERA.
- Functionality for modifying and cancelling bookings.
- Special offer pages with a view of the availability calendar.
- Dynamic discounting capability used for tactical promotions.
- P3’s unique reporting dashboard integrated with Google Analytics.
- Ability to book blended rates.
