

Quantum Consulting SRL

Quantum LAD Localizations Integration with JD Edwards EnterpriseOne 9.2

Quantum LAD Localizations cover most of the requirements for Argentina localizations of Oracle's JD Edwards EnterpriseOne, including electronic invoices, bank reconciliations, and payments with multiple instruments.

COMPANY OVERVIEW

Quantum Consulting S.R.L. was founded in 2010 and is a provider of JD Edwards EnterpriseOne solutions. Quantum's objective is to provide its customers with the necessary assistance to improve operational efficiency and maximize business profitability.

The Quantum team has years of experience providing JD Edwards EnterpriseOne solutions and has human resources with deep knowledge of customers' different business processes.

INTEGRATION OVERVIEW

All functionality in the Quantum LAD Localizations were developed using standard programming tools provided in JD Edwards EnterpriseOne. The installation is easy and does not require any special maintenance.

The following three capabilities enable the user to have a robust system that complies with all applicable local laws.

- **Argentinian electronic invoice.** This functionality validates the information required to send invoices to the government agency and receive the electronic authorization code (CAE). The solution covers the invoicing process from JD Edwards EnterpriseOne Sales Order Management and Financials.
- **Bank reconciliation.** This functionality facilitates the reconciliation between the balances in your bank accounts with your bank statements. The system can automatically reconcile the bank accounts or it can be done manually. Additionally, it allows control, consultation of bank information, and automatic generation of monthly bank charges.
- **Payments with multiple instruments.** This functionality allows a company to assign values that were received by third parties (by way of collection) or their own values to the suppliers' bill payments. It makes it possible to see related balances both in the supplier current account and the customer account, since the program credits third-party values in the JD Edwards EnterpriseOne Accounts Receivables module and payments to suppliers are updated.

ORACLE Validated Integration JD Edwards EnterpriseOne

Oracle Validated Integration provides customers with confidence that a partner's integration with an on-premises Oracle application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

INTEGRATION DETAILS

To develop this product, Quantum followed the guidelines and practices recommended by JD Edwards. Because of this, the integration between Quantum LAD Localizations and JD Edwards EnterpriseOne is reliable and transparent to the user, ensuring quality standards.
