ORACLE
Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Optimal Hotel Room Control System

The RACOS Room Control System delivers efficient energy management reducing your hotel's reliance on manpower. Integrated with your property management system (PMS), this state-of-the-art system shows check in/out of guest and controls temperature and lights of the hotel room.

Company Overview

Founded in 1997, RACOS System Co., Ltd. provides a hotel room control system and a radio frequency (RF) card key system that delivers convenience and efficiency for hotel administrators. As a leading share of the market, the company focuses on developing its technology and improving quality of system.

RACOS seeks to build the best system that can meet the evolving and increasing needs of the hospitality industry as well as training centers, dormitories, resorts, research buildings, offices, and retirement communities.

Integration Overview

The validated integration between RACOS Hotel Room Control System and Oracle Hospitality OPERA PMS improves the efficiency of your hotel. The information of guest check in/out can be delivered in real time. It supports adjusting the heating, cooling, and lights so that hotel would be able to avoid energy waste and reduce costs.

Integration Details

The integration between RACOS Hotel Room Control System and Oracle Hospitality OPERA supports the following functionality:

- Check in and Check out
- Guest information
- Guest share
- Room move
- Resync database
- Update room equipment and room status
- Night audit
