RATEBOARD GMBH

Rateboard Validated Integration with Oracle Hospitality Suite8 8.10.2

Increase your hotel revenue through better price decisions

Rateboard's revenue management software for hotels and resorts enables hotel management to sell the right room, to the right guest, at the right time, and at the right price.

Company Overview

Founded in Innsbruck in 2015, Rateboard provides a revolutionary system for suggesting optimal room rates. It atomizes, integrates, and simplifies time-consuming processes such as forecasting, pricing, and rate maintenance for hotels.

Rateboard's stable price algorithm takes the following data into consideration: historical bookings, actual bookings, competitors, market demand, weather, guest reviews, special events, and holidays.

Integration Overview

The integration between Rateboard and Oracle Hospitality Suite8 property management system (PMS) includes reservations, blocks, and allotments with availabilities flowing from the PMS to Rateboard. RateBoard combines this data with other third-party data to estimate the demand for the hotel within the next 365 days. The hotel management is then able to adjust room rates accordingly.

Integration Details

The integration uses encrypted HTTPS transport between Rateboard and Oracle Hospitality Suite8. All message exchange is based on the widely accepted OpenTravel Alliance (OTA) standard.

Rateboard receives the following messages from Oracle Hospitality Suite8:

- OTA_HotelResNotifRQ
- OTA_HotelRatePlanNotifRQ
- OTA_HotelInvCountNotifRQ
- OTA_HotelInvBlockNotifRQ

ORACLE®
Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

rateboard.io

Rate updates through hurdle decisions from Rateboard to Oracle Hospitality Suite8 are based on the following message type:

- OTA_HotelAvailNotifRQ

This message type enables Rateboard to show guest, revenue, pickup, and reservation statistics about the past and future. In addition, Rateboard can analyze the demand for up to 365 days in the future, recommend prices for each room type, and then send hurdle rates back to Oracle Hospitality Suite8.
