SalesAndCatering.com

Company Overview

SalesAndCatering.com provides best-in-class software solutions, specific to the unique needs of hospitality. SalesAndCatering.com is a collaboration between Simple Solutions, Inc., the company behind STS-R, the affordable full-featured sales and catering system for the hospitality industry, and Bluebuzzard, the makers of ProposalPath, the industry's versatile, easy-to-use, and cost-effective online proposal solution.

Integration Overview

The validated integration between STS Cloud and Oracle Hospitality OPERA property management system (PMS) supports the exchange of group blocks (allotments), inventory, reservations, and stay records. Group blocks built in STS Cloud may be transmitted to Oracle Hospitality OPERA PMS for the purposes of creating both deductible and non-deductible allotments and updating room inventory in near real-time. In addition, the two-way integration enables STS Cloud to receive updates made to Oracle Hospitality OPERA inventory and guest stays.

Integration Details

The integration supports the following functionality:

- Group blocks created in STS Cloud and designated for integration with the PMS will automatically create and update block allotments in Oracle Hospitality OPERA PMS. When group blocks originally created in STS Cloud are changed in Oracle Hospitality OPERA PMS, STS Cloud automatically updates with the changed data, including changes to block details and pickups
- Room inventory kept in sync between STS Cloud and Oracle Hospitality OPERA PMS.
- Individual reservation details are sent to STS Cloud to track pickups against accounts or volume contracts.

The Oracle logo, consisting of the word "ORACLE" in white capital letters on a red rectangular background.

Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.
