

ORACLE VALIDATED INTEGRATION DATA SHEET

Sanyo Electric Industry Co., Ltd

SEIC MSC Interface Integration with Oracle Hospitality OPERA 5.5

The validated integration provides an interface for exchanging messages between Oracle Hospitality OPERA property management system (PMS) and external systems for managing buildings, heating and air conditioning, and housekeeping.

COMPANY OVERVIEW

Sanyo Electric's products have expanded beyond display units to include control-related products that are linked to LAN networks, host computers, and its own interface technology. The company's customers—including hotels, office buildings, and government offices—use these products to improve service, advance computerization, reduce labor, and improve energy efficiency. In addition, Sanyo Electric delivers maintenance and support to meet customer requirements.

INTEGRATION OVERVIEW

This validated integration enables the exchange of messages between Oracle Hospitality OPERA PMS and the external system while meeting the customer requirements.

INTEGRATION DETAILS

The integration enables the following functionality:

- Room or guest data including check in, checkout, guest information change, and room change
- Room or guest database synchronization
- Charge postings
- Online guest message query and deletion
- Guest message creation
- Guest billing or balance query
- Remote checkout
- Room status update
- Class-of-service update
- TV rights update
- Night audit

ORACLE

Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an on-premise Oracle application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.
