ORACLE

Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Reservation Management System Provider

Seanut's TL-Lincoln is a revolutionary system for streamlining hotel and inn reservation management tasks.

Company Overview

Seanuts Company, Ltd. was founded in 2007 by a collaboration between Japan's largest IT company, Recruit Holdings, and Japan's largest travel company, JTB.

As the internet grows, the number of reservations from online distributors continues to increase. A proliferation in the number of sales channels is welcomed by accommodation facilities, but at the same time, reservation and sales management tasks become more complicated, resulting in a heavy work load for the person in charge. Accommodation facilities want to accurately and efficiently manage reservations from travel agencies, online distributors, and their own websites. TL-Lincoln comes with the latest features to address that need.

Integration Overview

TL-Lincoln enables two-way connectivity between Oracle Hospitality OPERA property management system (PMS) and online travel agents (OTAs). TL-Lincoln can send reservation information from OTAs to Oracle Hospitality OPERA PMS. Conversely, TL-Lincoln can send updated inventory and rate information from the PMS to the OTAs.

Integration Details

TL-Lincoln offers enhanced data output for linking with Oracle Hospitality OPERA PMS. It automatically imports most reservation data and substantially reduces the hassle of manual entry and risk of mistakes.

Data from Oracle Hospitality OPERA to TL-Lincoln:

- Rates
- Inventory
- Restrictions such as open/close and room type
