TouchNet

U.Commerce 8 Integration with PeopleSoft Campus Solutions 9.2

—

TouchNet U.Commerce, the fully integrated platform solution for colleges and universities, helps simplify operations and ensure student success outside of the classroom.

COMPANY OVERVIEW

TouchNet is a leading provider of integrated, comprehensive, and secure commerce and credential solutions for colleges and universities. Institutions of higher education rely on TouchNet to unify and secure payments, permissions, and other related business transactions campuswide. TouchNet's unmatched integration, transparency, and security gives institutions greater control over transactions, costs, and compliance, while providing greater operational efficiencies and self-service access to real-time information. TouchNet is a Global Payments company (NYSE: GPN).

INTEGRATION OVERVIEW

The integration of TouchNet's U.Commerce 8 with Oracle's PeopleSoft Campus Solutions 9.2 provides real-time data flows that result in a secure campus commerce platform that automates the business office with comprehensive self-service functionality and enhanced in-line service.

The integration provides processes for student self-service payments, automated paperless billing and payment, automated payment plans, third-party access and payment, and comprehensive in-person payment processing.

INTEGRATION DETAILS

The TouchNet U.Commerce integration with PeopleSoft Campus Solutions features a real-time request-response architecture that uses native PeopleSoft Campus Solutions integration points, including PeopleSoft Integration Broker and PeopleSoft Component Interfaces applications. When an action—for example, a payment—is completed, the calling application sends the appropriate data in a request transaction and accepts the response data from the transaction. Using this methodology, TouchNet U.Commerce queries and updates PeopleSoft Campus Solutions in real-time, while PeopleSoft Campus Solutions remains the system of record.

ORACLE
Validated Integration
PeopleSoft Campus Solutions

Oracle Validated Integration provides customers with confidence that a partner's integration with an on-premise Oracle application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.
