VERTEX, INC.

Vertex® Tax Links 9.0 Validated Integration with JD Edwards EnterpriseOne 9.2

Vertex Tax Links 9.0, provides a validated integration between Oracle's JD Edwards EnterpriseOne and Vertex Indirect Tax O Series. This enables customers to extend the value of their JD Edwards investments and benefit from a centralized solution that improves transaction tax management efficiencies and compliance.

COMPANY OVERVIEW

Vertex, Inc. is a leading global provider of indirect tax software and solutions. The company's mission is to deliver the most trusted tax technology enabling global businesses to transact, comply and grow with confidence.

A member of the Oracle PartnerNetwork (OPN) and trusted Oracle partner for more than 25 years, Vertex solutions help Oracle customers automate their end-to-end indirect tax processes. The company provides cloud-based and on-premise solutions that can be tailored to specific industries for major lines of indirect tax, including sales and consumer use, value added and payroll. Vertex has been recognized as OPN Cloud Build partner, having achieved Integrated with Oracle Cloud and Powered by Oracle Cloud Expertise. This means customers can be confident that Vertex solutions are supported by the Oracle Cloud Infrastructure SLA.

INTEGRATION OVERVIEW

Vertex Tax Links serves as a dynamic integration channel between Vertex Indirect Tax O Series 9.0, Vertex Indirect Tax O Series On-Demand 9.0, Vertex Cloud Indirect Tax and JD Edwards EnterpriseOne. The innovative design and configuration options of Vertex Tax Links allows tax departments to take control of tax decisions and make changes that affect their company's compliance with minimal IT assistance. Through this connector, Vertex Tax Links users are given full access to Vertex's reporting and remittance tools that help streamline compliance processes by:

- Increasing accuracy of tax information and auditability of tax data.
- Streamlining processes for personnel maintaining JD Edwards EnterpriseOne and Vertex O Series tax solutions (Vertex Indirect Tax O Series 9.0/Vertex Indirect Tax O Series On-Demand 9.0/ Vertex Cloud Indirect Tax).
- Removing tax decisions from nontax personnel.

INTEGRATION DETAILS

Created to meet established standards for software development, Vertex Tax Links facilitates communication between JD Edwards EnterpriseOne, and the various Vertex O Series-based tax solutions. Vertex Tax Links is composed of C functions and application objects that represent several layers of functionality between JD Edwards EnterpriseOne and the Vertex O

Oracle Validated Integration provides customers with confidence that a partner's integration with an on-premise Oracle application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Series tax calculation engine. Once Vertex Tax Links has been installed and configured, the information passed from JD Edwards EnterpriseOne is mapped to the appropriate Vertex O Series parameters for processing by the tax calculation or tax area ID services; the result is returned to JD Edwards EnterpriseOne.

Vertex Tax Links enables JD Edwards EnterpriseOne and Vertex O Series users to:

- Retrieve and assign tax area IDs for more accurate tax jurisdiction codes.
- Address cleansing and latitude or longitude support when assigning tax area IDs.
- Calculate and apply proper tax to sales and procurement transactions.
- Provide configuration flexibility for integration.

Note: Vertex Tax Links connects JD Edwards EnterpriseOne to Vertex O Series solutions. The purpose of this is to avoid changes to the core application business objects for JD Edwards EnterpriseOne modules—Sales Order Management, Procurement and Subcontract Management, and Financials. This reduces implantation time and maintenance costs associated with applying bug fixes or enhancements provided by Oracle.
