### Validated Integration

#### Oracle Retail

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

**Experience a new breed of enterprise mobility for Oracle Retail Xstore with the power to work faster and smarter.**

Zebra Mobility DNA works at the cellular level of Zebra mobile Android devices to transform the users of Oracle Retail Xstore into an enterprise-ready workforce. The solution heightens productivity, simplifies management, and improves ease of automation for Oracle Retail Xstore.

### Company Overview

Zebra builds solutions that generate actionable information and insight for unprecedented visibility into retailers' businesses by giving physical things a digital voice. Zebra's extensive portfolio of solutions provides real-time visibility into everything from merchandise and physical assets to people, delivering very precise operational data on where things are and what condition they are in. This allows business leaders to use data to make better, more-informed decisions and respond in real time, ultimately helping retailers understand how they work, and how they could work better.

### Integration Overview

The anatomy of Zebra Mobility DNA is more than the mobile Android platform to make the business run better. It takes an entire software ecosystem formulated for the retail workforce—including managers, IT staff, and associates—to determine the right mobility mixture. With that, the integration starts with superior technology genes to evolve a new, more advanced enterprise mobility experience for Oracle Retail Xstore users.

The Integration for Zebra Mobility DNA and Oracle Retail Xstore closes omnichannel gaps and provides operational efficiency to retailers. Zebra Mobility DNA components are augmented for Oracle Retail Xstore to include the following:

- **Workforce Connect Push to Talk (PTT) Pro.** Improve and unify communications across the store(s) by effectively opening communication with all retail associates.
- **StageNow.** Quickly stage Android devices with a barcode scan or NFC tag tap to load applications on many devices simultaneously.
- **DataWedge.** Allow associates to scan barcode from their Zebra mobile computers and send scanned data to the Oracle mobile server for processing
- **Enterprise Home Screen.** This creates a single-purpose device for implementing corporate policies while providing the right applications to users.

Seamless integration starts with augmenting the mobile user experience for Oracle Retail Xstore and enabling it to run faster.

## Integration Details

### AVAILABILITY

Dukes Meadow  
 Millboard Road  
 Bourne End, United Kingdom  
 Tel: 44.1628.556.000  
 Email: [inquiry4@zebra.com](mailto:inquiry4@zebra.com)

The integration fuses simplicity and manageability, regaining control of the mobile platform on Android for Oracle Retail Xstore through superior communication, greater application control, centralized deployment, and real-time visibility.

Oracle Retail Xstore's mobile client allows users to navigate through Oracle Retail Xstore transactions on Zebra mobile computers. Zebra Mobility DNA augments this process by adding additional features on the devices for a better user experience and efficiency on the retail floor. The result is better deployment and management for optimal uptime.
