

Implementation and Management Series

Oracle Customer Experience

The [Implementation and Management video series](#) helps you prepare for an implementation of Oracle Customer Experience (CX) applications and provides guidelines for effectively managing the deployment and ongoing use of the system. This **no-cost series of videos** is highly recommended if you are involved in planning and managing a project, or are a member of a project team. They will also be helpful to Oracle partners who offer implementation services, to help them to augment and align their approach and practices with Oracle’s recommendations.

“Well done presentation with good foundational principles for a successful implementation! I especially liked the bracketing of Small, Medium, and Large projects according to number of users, number of countries, and number of business units.”

TARGET AUDIENCE

- Implementer
- Application Administrator
- Business Administrator
- Project Manager
- Business Analyst

Implementation and management recommendations presented in a series of videos developed by experts.

Introduction to Implementation and Management Series

This introduction to the Implementation and Management Series covers some general concepts to serve as a foundation for all the topics in the series, provides an overview of the implementation process, and will help you understand how to assess the scale of your project. Duration: 14.5 minutes

Implementation and Management Series Oracle Cloud CX
