Today's work environment is experiencing unprecedented disruption. Technology is a major driver of workplace change and has transformed human expectations both inside and outside of the office. As technology continues to accelerate, employee expectations for a modern work experience are evolving at a rate many organizations are struggling to match. Companies with yesterday's legacy on-premise HR systems are simply unable to adapt to today's changing business and workforce needs. As a result, HR has become a driver of digital transformation within organizations, playing a strategic role in the alignment of people, technology, and business priorities.

Today, customers are upgrading from their on-premises HR systems to Oracle Fusion Cloud Human Capital Management to support their transformation, and provide substantial benefits, including:

<b>More agility</b>	Configure, rather than customize, business requirements so you can rely less on IT, and easily navigate business changes.
<b>Faster innovation</b>	Take advantage of automatic updates to keep up with the pace of change and free IT resources.
<b>Transformative technologies</b>	Get the innovations you need to compete and attract the best talent with adaptive intelligence, machine learning, a digital assistant, and blockchain embedded in your solution.
<b>New functionality</b>	Evolve HR with predictive analytics, next-generation recruiting, complete workforce management, talent review, and contextual learning.
<b>Increased productivity</b>	Prioritize tasks with a personalized homepage, run analytics and reports from visually intuitive dashboards, and complete transactions in only a few clicks – all from any device.
<b>Improved data security</b>	Protect your data and simplify compliance with security at every level, data encryption at-rest and in-transit, and enterprise grade cloud data centers.
<b>Easier integration</b>	All-in-one solution for the entire enterprise, across finance, HR, supply chain, sales, and marketing, while easily integrating with other applications.
