Deployment Requirements .....	2
Deployment Process .....	4
Step 1: Downloading Installation Files .....	5
Step 2: Installing and Configuring the Database .....	10
Step 3: Installing and Configuring EPM System .....	17

## About this Document

This document presents recommended steps to build a typical Oracle Hyperion Planning, Fusion Edition, development environment on a single server running Microsoft Windows. A typical Planning development environment comprises the following products:

- Oracle Hyperion Planning, Fusion Edition
- Oracle's Hyperion® Foundation Services
- Hyperion Calculation Manager
- Oracle Essbase
- Oracle Hyperion Financial Reporting, Fusion Edition
- Oracle Hyperion Smart View for Office, Fusion Edition
- Required products including Oracle Database, Oracle WebLogic Server, and Oracle HTTP Server.

## Deployment Requirements

### Server

**Table 1** Server Requirements

Requirement	Description
Server Operating System	Windows 2008 R2 x64
Processor	Quad core
Memory	16 GB RAM
Disk	200 GB Disk
Other Software	A program, such as 7-Zip or WinZip, to extract the contents of media packs

### User Account

Use a generic Windows user account, for example, `epm_rapid_user`, that satisfies the following requirements. This account is referred to as **deployment account** throughout this document:

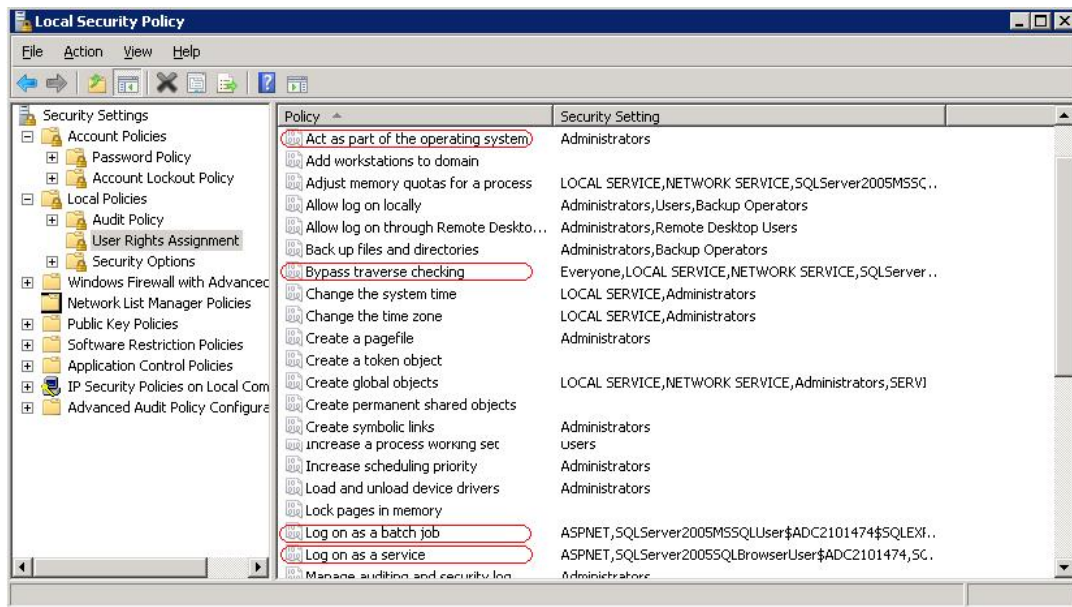

- Deployment account is a member of the Administrators group on the server on which you are deploying this domain.
- The following local security policies are assigned to the deployment account. By default, these policies are granted to members of the Administrators group:
  - Act as part of the operating system
  - Bypass traverse checking

- Log on as a batch job
- Log on as a service
- User account control is disabled for the deployment account.

## Verifying Local Security Policy Assignments

➤ To verify that local security policies are assigned to deployment user:

- 1 Log on to the server using the deployment account.
- 2 On the server, click **Start**, and then **Administrative Tools**, and then **Local Security Policy**.
- 3 in **Local Security Policy**, expand **Local Policies**, and then select **User Rights Assignment**.
- 4 Verify that the security setting for the policies highlighted in the following illustration include the Administrators group. Double-click the security setting of the policy to view its properties and assignments.

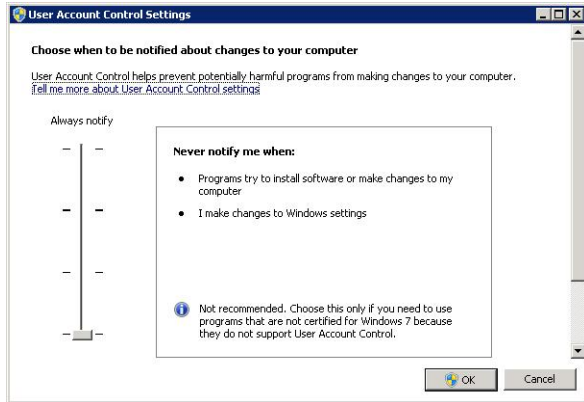

## Disabling User Account Control

➤ To turn off user account control:

- 1 Log on to the server using the deployment account.
- 2 On the server, click **Start**, and then **Control Panel**.
- 3 In Control Panel, click **User Accounts**.
- 4 In **User Accounts**, click **Change User Account Control settings**.

5 Drag the user account control slider to **Never Notify**.

6 Click **OK**.

## Deployment Password

Select a password for your deployment. This password will be used for Oracle Database Administrator, Oracle Database User, WebLogic Administrator, and EPM Administrator. This password is referred to as **deployment password** throughout this document.

The deployment password must conform to the following guidelines:

- Contain at least one uppercase letter
- Contain at least one numeral
- Be at least eight characters long
- Cannot contain special characters

An example of an acceptable password is **1Rapidepm**.

## Deployment Process

The deployment process involves the following steps and takes approximately three hours:

- **Step 1: Downloading Installation Files** (approximately 70 minutes)
- **Step 2: Installing and Configuring the Database** (approximately 20 minutes)
- **Step 3: Installing and Configuring EPM System**(approximately 90 minutes)

# Step 1: Downloading Installation Files

This section explains how to download Oracle 11g Database (Version 11.2.0.1.0) and Oracle Hyperion Enterprise Performance Management System product media packs and get them ready. You can download media packs simultaneously. Using a T1 connection, downloading media packs takes approximately 65 minutes.

► To download media packs from Oracle E-Delivery website:

- 1 **Create two folders named `EPM_rapid_downloads` and `EPM_rapid_unzipped` on your server. The file path should not contain spaces.**
- 2 **Using a browser, connect to `http://edelivery.oracle.com`.**
- 3 **On Oracle E-Delivery web site, click **Sign In / Register**.**
- 4 **In **Sign In**, enter your E-Delivery user name and password, and then click **Sign In**.**
- 5 **On **terms and Restrictions**, read and accept the **Trial License and Export Restrictions** agreements, and then click **Continue**.**

## Terms & Restrictions

By accessing the software on this Web site, you agree that (1) you have already obtained a license from Oracle, or an Oracle partner, for your use of the software and that your Oracle License and Services Agreement or Software License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement with Oracle or an Oracle partner, plus the applicable ordering document with Oracle or an Oracle partner, governs your use of the software, or (2) if you have not already obtained a license from Oracle or an Oracle Partner for your use of the software, the Oracle Electronic Delivery Trial License Agreement on this Web site governs your use of the software for the time specified in such agreement. Note: Programs downloaded for trial use or downloaded as replacement media may not be used to update any unsupported programs.

### Electronic Delivery Trial License Agreement

[View printable version](#)

Signifying acceptance of this trial license by selecting the "I accept the License Terms and Export Restrictions" checkbox below is an indication of your agreement, as an authorized representative of your company ("you"), to comply with all of the following trial license terms and conditions with respect to the Programs (as defined below) used by you in accordance with this E-Delivery Trial License Agreement (this "Agreement").

#### GENERAL INFORMATION

The "Trial Term" shall be 30 Days from the date of your acceptance of the terms and conditions of

**YES**, I accept the Trial License Terms and Export Restrictions and I acknowledge that I have reviewed and understand the agreement and agree to use the language I selected in entering into this agreement.

**OR**, I have already obtained a license from Oracle which governs my use of the software. I understand that Oracle has recently acquired Sun Microsystems, Inc. and that some of the downloads may contain or refer to a Software License Agreement and/or Entitlement in the legal directory, readme file, or elsewhere. I  acknowledge that my Oracle or Oracle partner license described in (1) above, or the Electronic Delivery Trial License Agreement (including export restrictions) described in (2) above, supersede and replace any terms contained in any other Software License and/or Entitlement document including those written in the legal directory or readme file.

### Export Restrictions

You agree that U.S. export control laws and other applicable export and import laws govern your use of the programs, including technical data; additional information can be found on Oracle's [Global Trade Compliance Web site](#).

You agree that neither the programs nor any direct product thereof will be exported, directly, or indirectly, in violation of these laws, or will be used for any purpose prohibited by these laws including, without limitation, nuclear, chemical, or biological weapons proliferation.

Oracle Employees: Under no circumstances are Oracle Employees authorized to download software for the purpose of distributing it to customers. Oracle products are available to employees for internal use or demonstration purposes only. In keeping with Oracle's trade compliance obligations under U.S. and applicable multilateral law, failure to comply with this policy could result in disciplinary action up to and including termination.

**YES**, I accept these Export Restrictions

## 6 Download part numbers to install Oracle Database 11g.

- a. In **Media Pack Search**, search for Oracle Database product pack for Microsoft Windows x64 (64-bit), and then select **Go** to start the search.

- b. From **Results** section, select **Oracle Database 11g Release 2 (11.2.0.1.0) Media Pack for Microsoft Windows x64 (64-bit)**, and then click **Continue**.

**Media Pack Search**

**Instructions**

1. Review the [License List](#) to determine which Product Pack or Packs you need to download.
2. Select the Product Pack and Platform and click "Go".
3. If there is only one result, you will see the download page. If there are multiple results, select one and click "Continue".

**Frequently Asked Questions**

- [What is a Media Pack?](#)
- [How do I find the Media Pack that I need?](#)
- [How do I get my license code?](#)
- [More...](#)

Select a Product Pack: Oracle Database

Platform: Microsoft Windows x64 (64-bit)

**Go**

V25498-01	6/7/2011 4:28 PM	WinZip File	1,141,494 KB
V25499-01	6/7/2011 4:31 PM	WinZip File	1,464,003 KB
V25500-01	6/7/2011 4:16 PM	WinZip File	90,985 KB

To verify folder size:

- a. In Windows Explorer, right-click EPM\_rapid\_downloads.
- b. Select **Properties**. The results should match the following illustration:

- 9 After the media pack downloads are complete, using a program, for example 7-Zip, extract the contents of the downloaded Oracle Database and EPM System product media packs into EPM\_rapid\_unzipped.

You will be warned about overwriting some existing files. Select **Yes**.

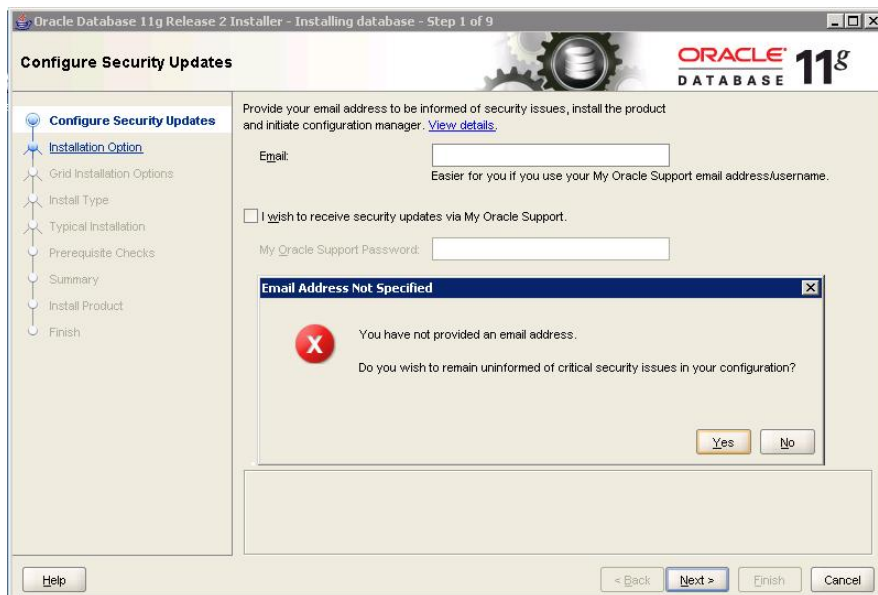

## Step 2: Installing and Configuring the Database

► To install and configure Oracle Database:

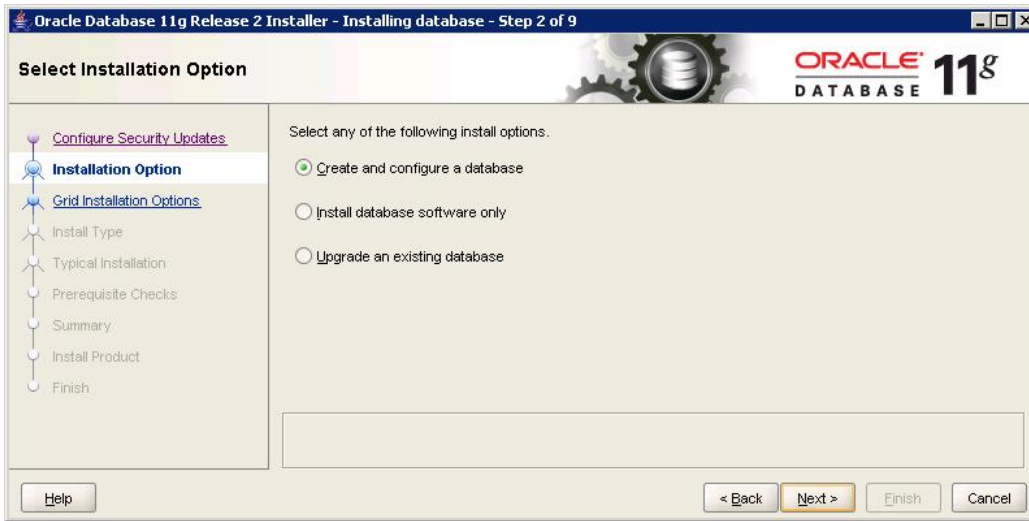

- 1 Using Windows Explorer, navigate to `EPM_rapid_unzipped/database`, and then double-click `setup.exe` to launch the installer.
- 2 In **Configure Security Updates**, uncheck **I wish to receive security updates via My Oracle Support**, and then select **Next**.

A warning that you did not provide an email address is displayed.

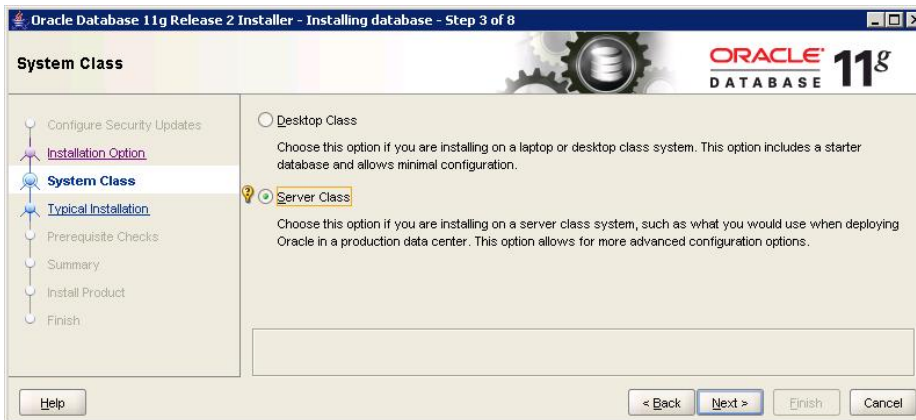

- 3 In **Email Address Not Specified**, click **Yes**.

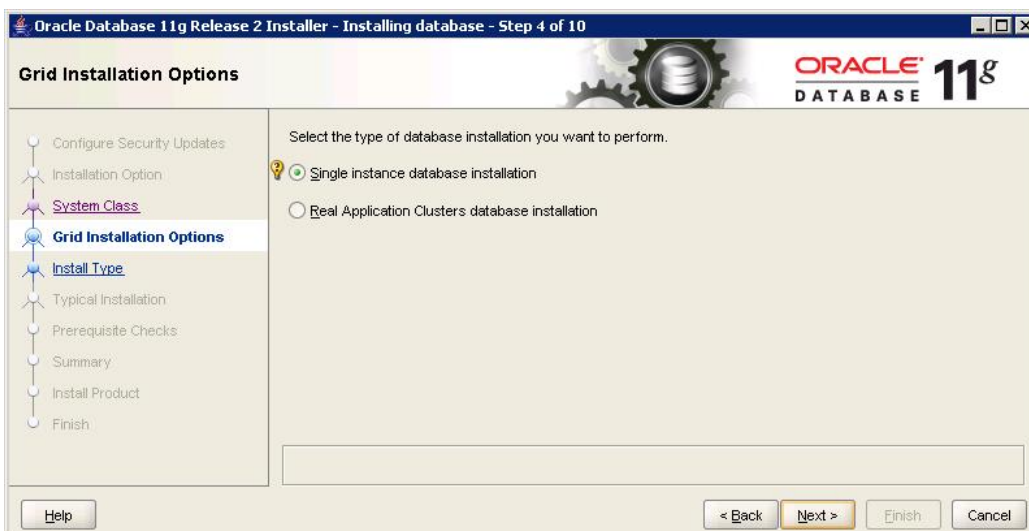

- 4 In **Select Installation Option**, ensure that **Create and configure a database** is selected, and then click **Next**.

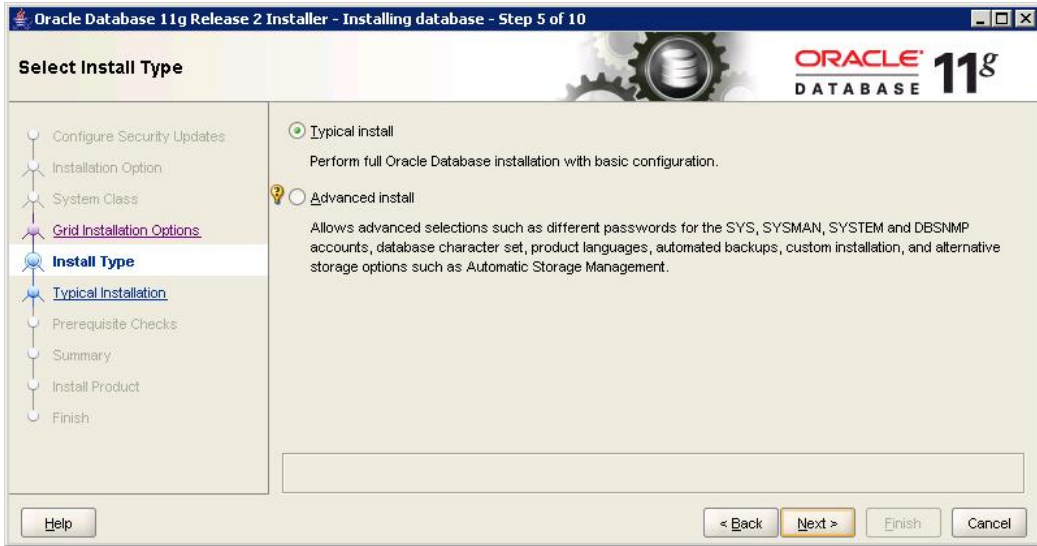

- 5 In **System Class**, select **Server Class**, and then click **Next**.

- 6 In **Grid Installation Options**, select **Single instance database installation**, and then click **Next**.

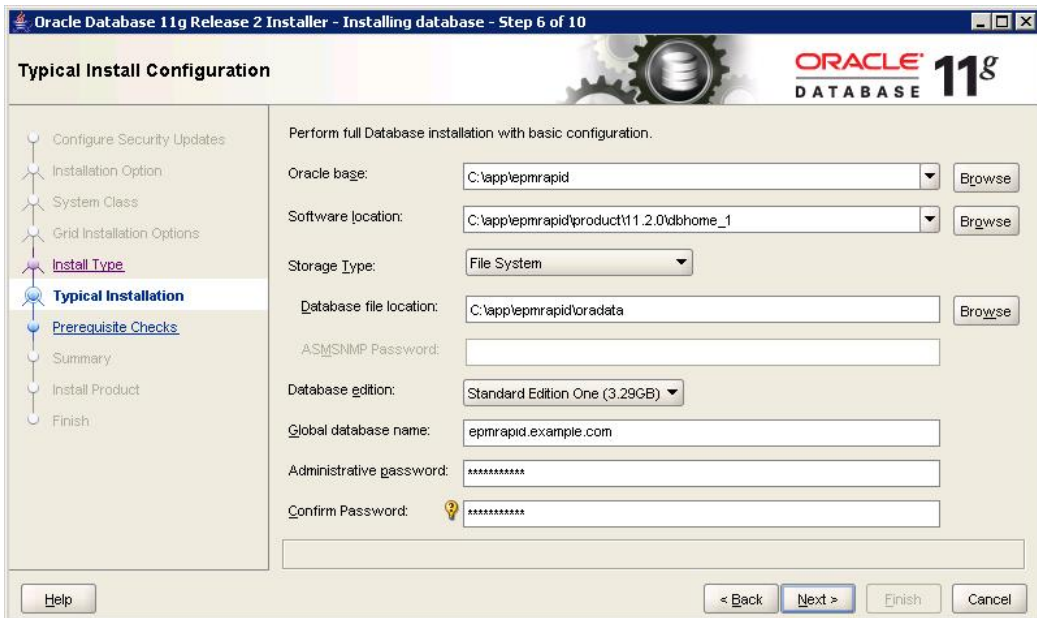

7 In **Select Install Type**, ensure that **Typical install** is selected, and then click **Next**.

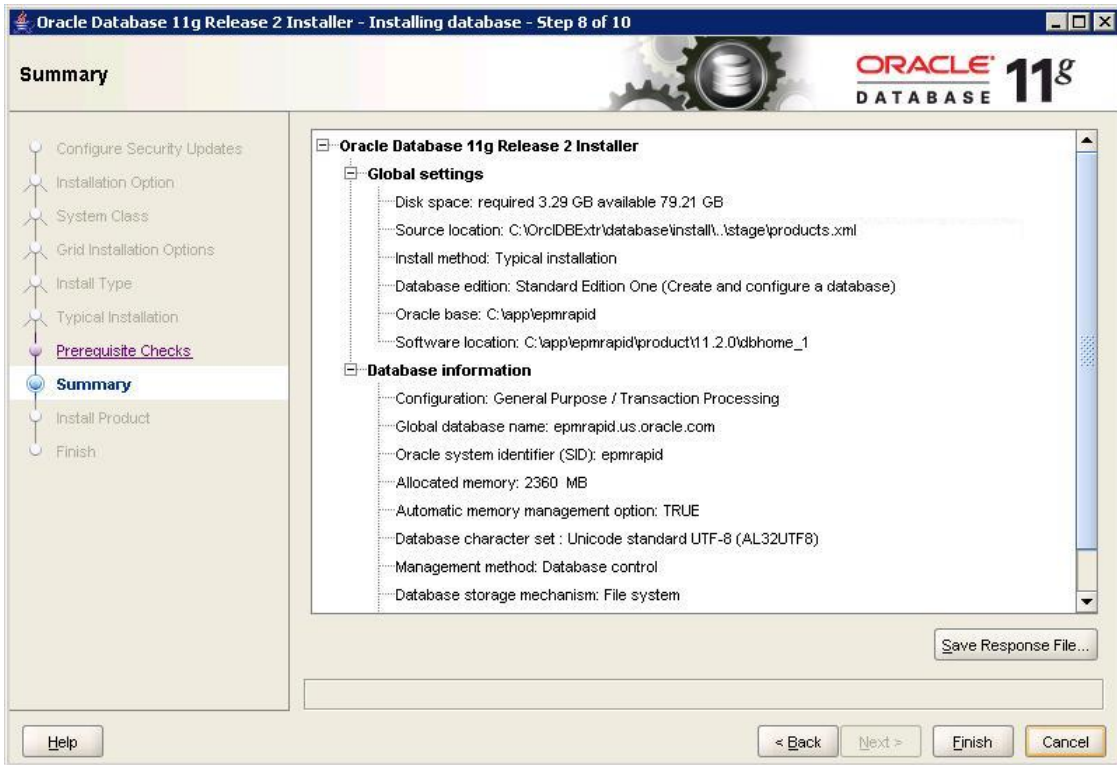

8 In **Typical Install Configuration**, enter the following information. Keep default values for all other fields. Click **Next** when you are done.

- **Database Edition**—Select **Standard Edition One(3.29 GB)**.
- **Global Database Name**—Set to `epmrapid.example.com`. Be sure to replace `example.com` with your fully qualified domain name.
- **Administrative Password**—Enter the deployment password.
- **Confirm Password**—Reenter the deployment password.

9 In Summary, click Finish.

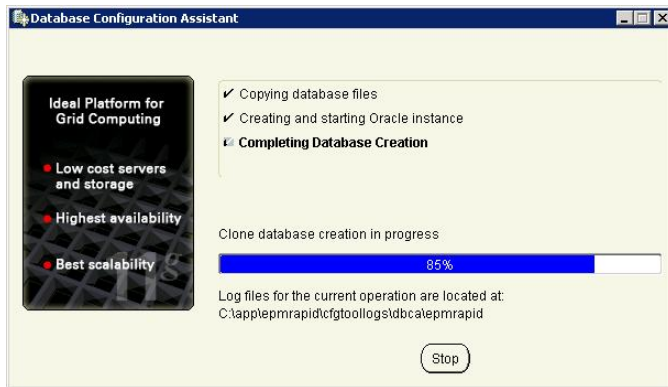

10 In Install Product, click Finish.

11 After completing the installation process, the installer runs the Database Configuration Assistant.

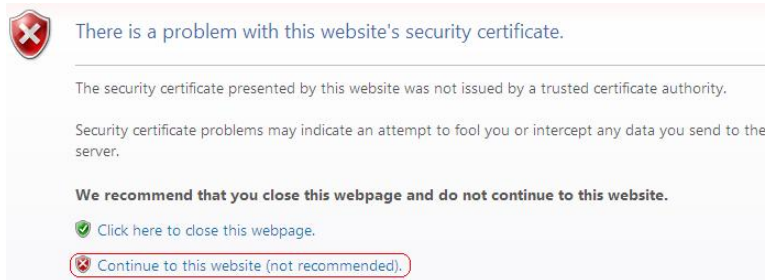

12 In Database Configuration Assistant summary, click OK.

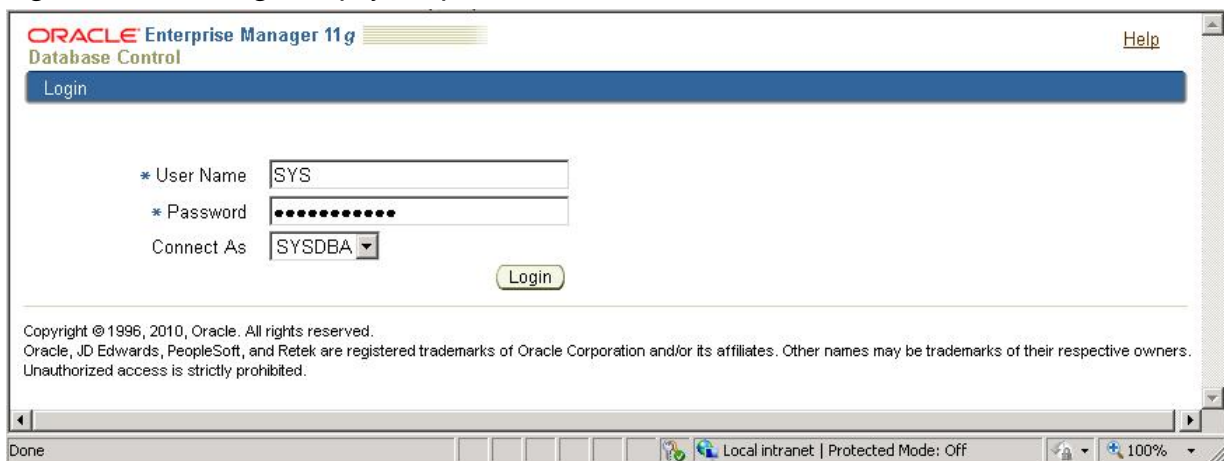

13 In Oracle Database 11g Release 2 Installer, click Close.

14 Validate the database installation by selecting **Start**, then **All Programs**, then **Oracle - OraDb11g\_home1**, and then **Database Control - epmrapid**.

Because Enterprise Manager Database Control is a secure site, you need a certificate. Select the **Continue to this web site (not recommended)** option.

15 Log in as user SYS using the deployment password. Select SYSDBA role in Connect As.

The Oracle Enterprise Manager 11g Database Control home page opens.

About Oracle Enterprise Manager

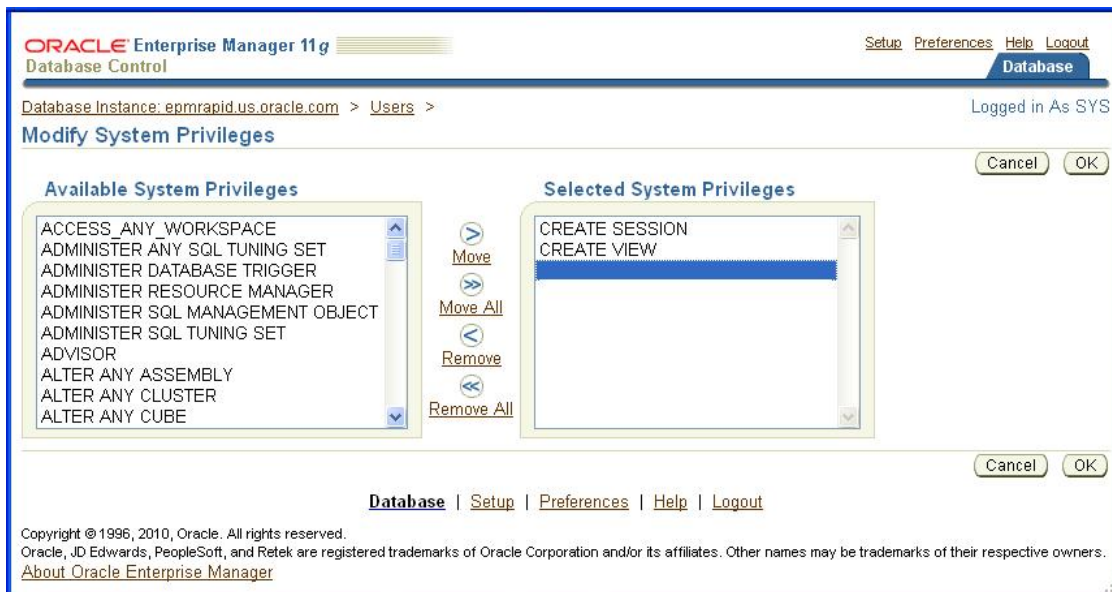

- In **Roles**, select **Edit List**:

- e. In **Available Roles**, select the **RESOURCE** role, and then move it to **Selected Roles**.

- f. Click **OK**.
- g. In **System Privileges**, select **Edit List**.
- h. Move **CREATE SESSION** and **CREATE VIEW** privileges from **Available System Privileges** to **Selected System Privileges**.

- i. Click **OK**.
- j. In **Create User**, click **OK**.

## Step 3: Installing and Configuring EPM System

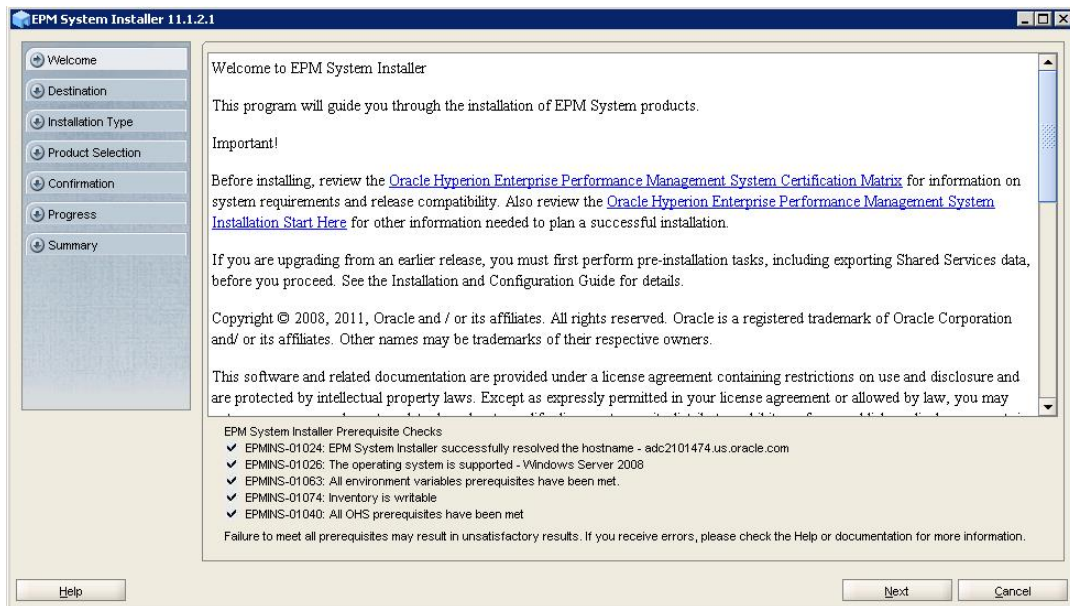

This process takes approximately 90 minutes.

► To install EPM System files:

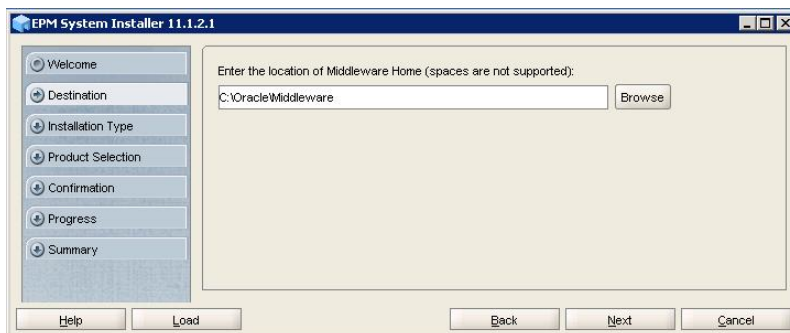

- 1 In Windows Explorer, navigate to the `EPM_rapid_unzipped` folder, and double-click `installTool.cmd`.
- 2 In **EPM System Installer**, select a language and click **OK**.

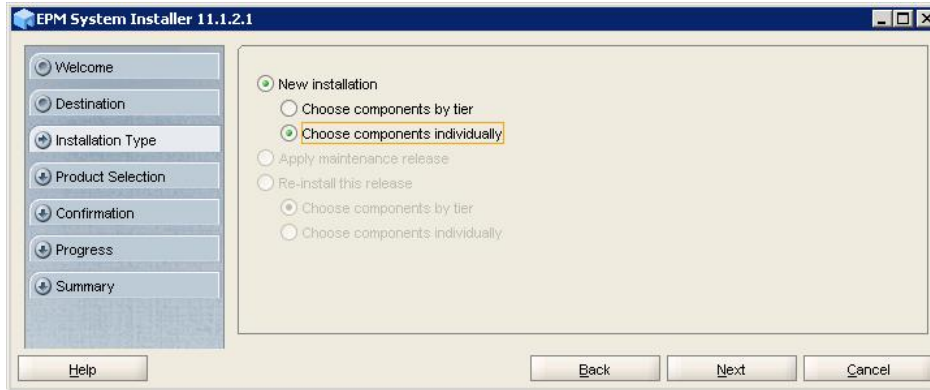

- 3 In **Welcome**, verify that your system has passed all prerequisite checks, and then click **Next**.

- 4 In **Destination**, click **Next**.

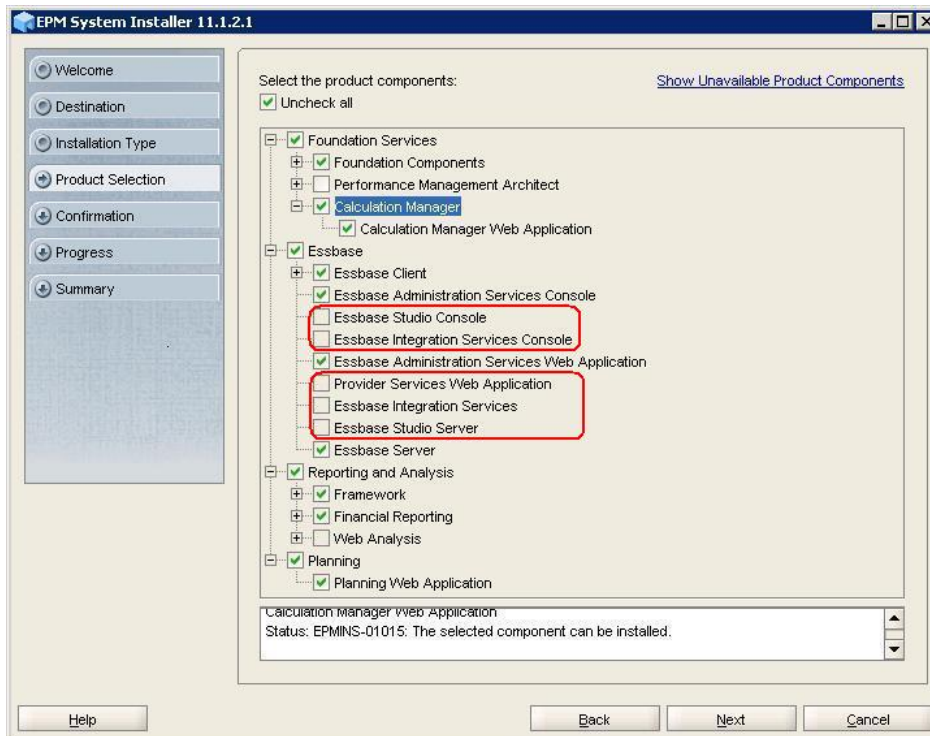

**5 In Installation Type, under New installation, select Choose components individually.**

**6 In Product Selection, uncheck these Oracle Essbase components, and then select Next:**

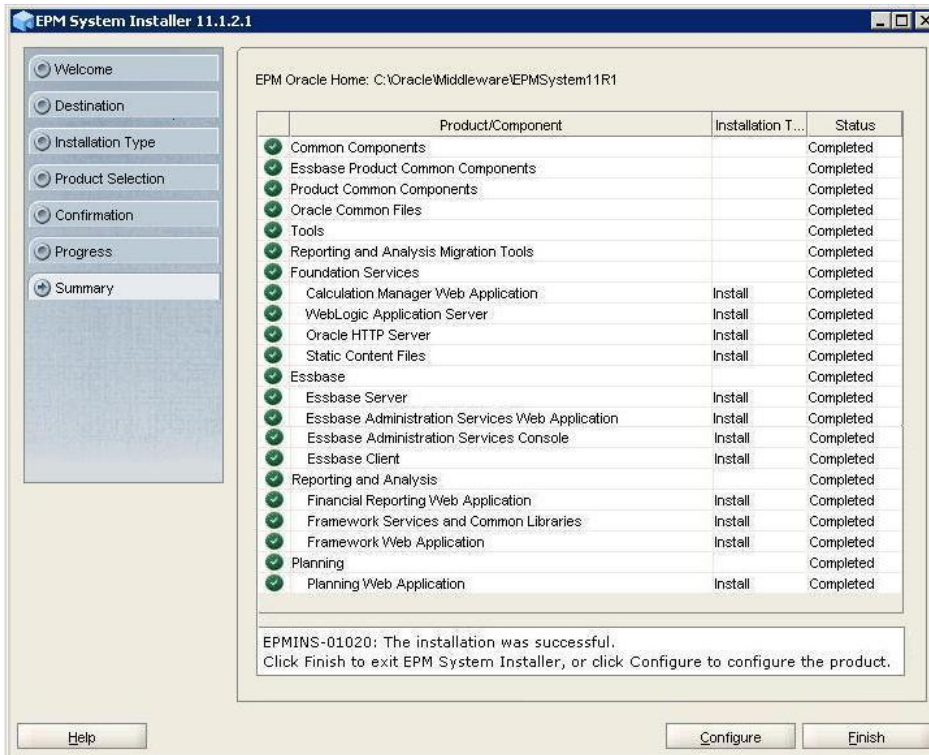

- Essbase Studio Console
- Essbase Integration Services Console
- Essbase Integration Services
- Essbase Studio Server
- Provider Services Web Application

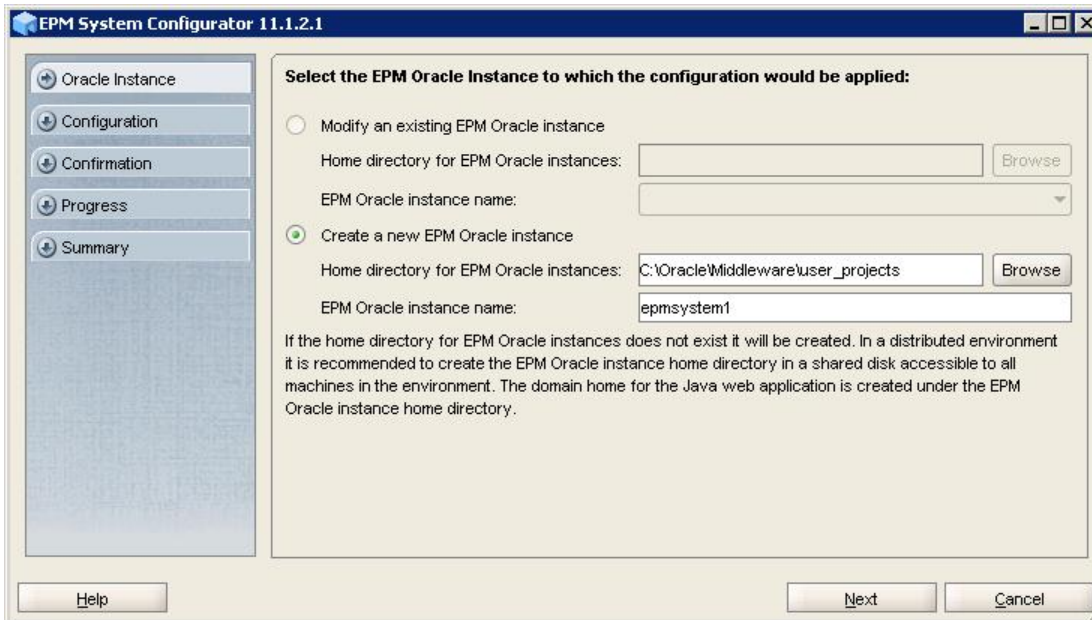

**7 In Confirmation, click Next.**

**8 In Progress, monitor the installation status.**

9 In Summary, click Configure.

10 In Oracle Instance, click Next to use the default values to create an EPM Oracle instance.

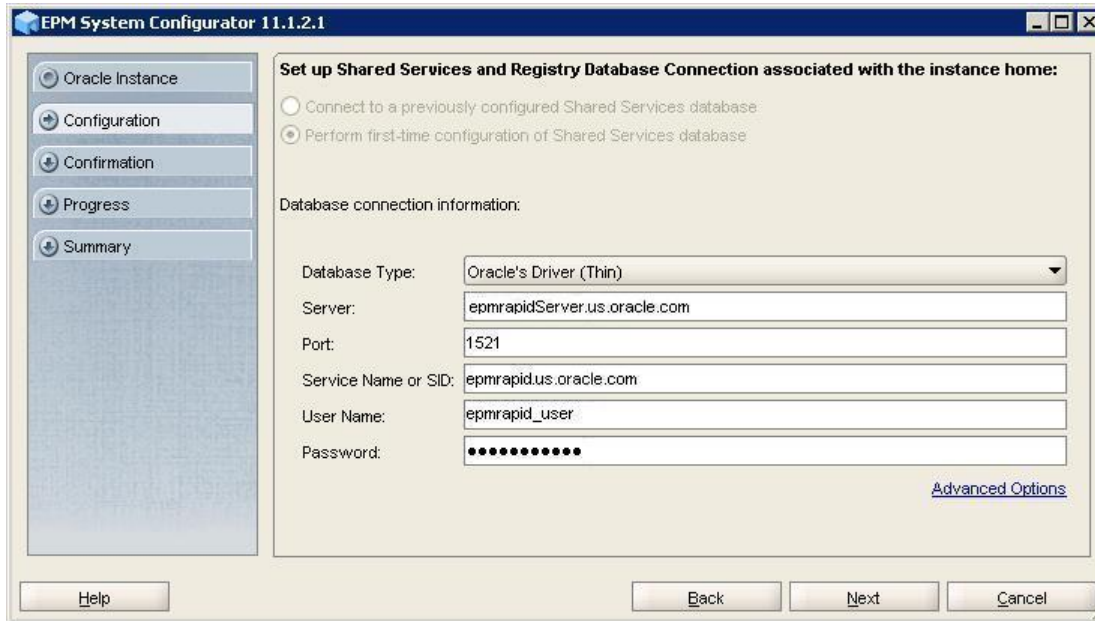

11 On the database Configuration, enter the following information, and then click Next. Use default values for all remaining fields and selections.

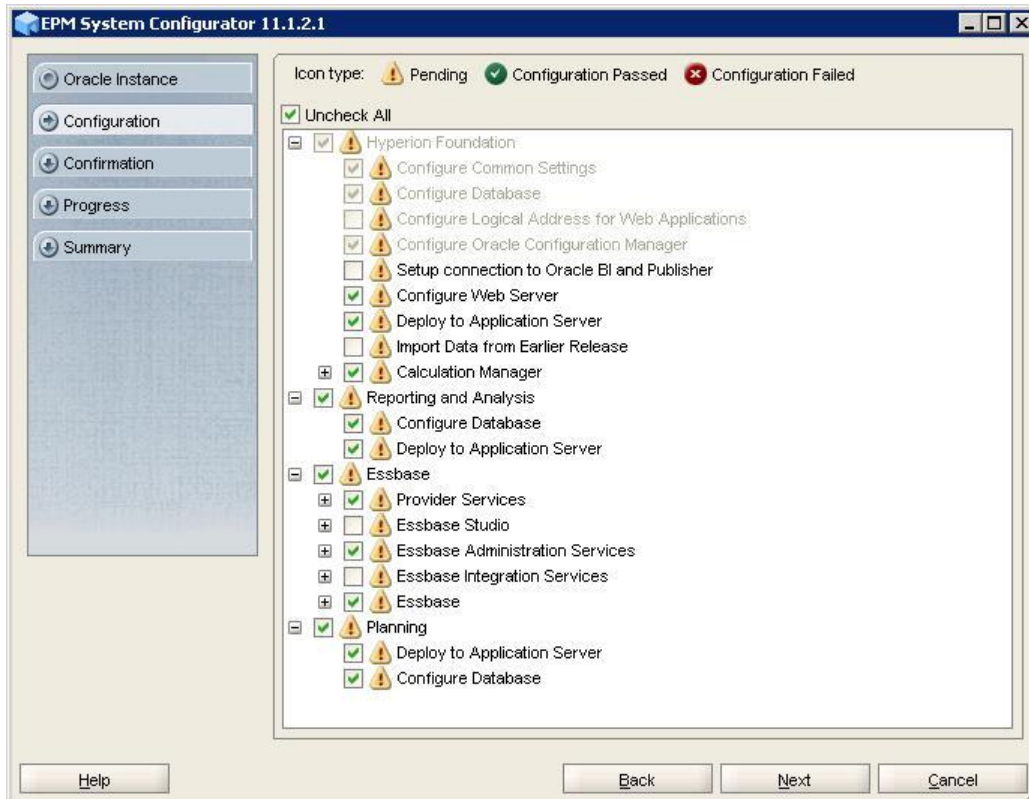

- **Service Name or SID**—Enter `epmrapid.example.com`. Replace `example.com` with the fully qualified domain name. The database service name that you must use is available in `C:\app\epmrapid\product\11.2.0\dbhome_1\NETWORK\ADMIN\tnsnames.ora`.

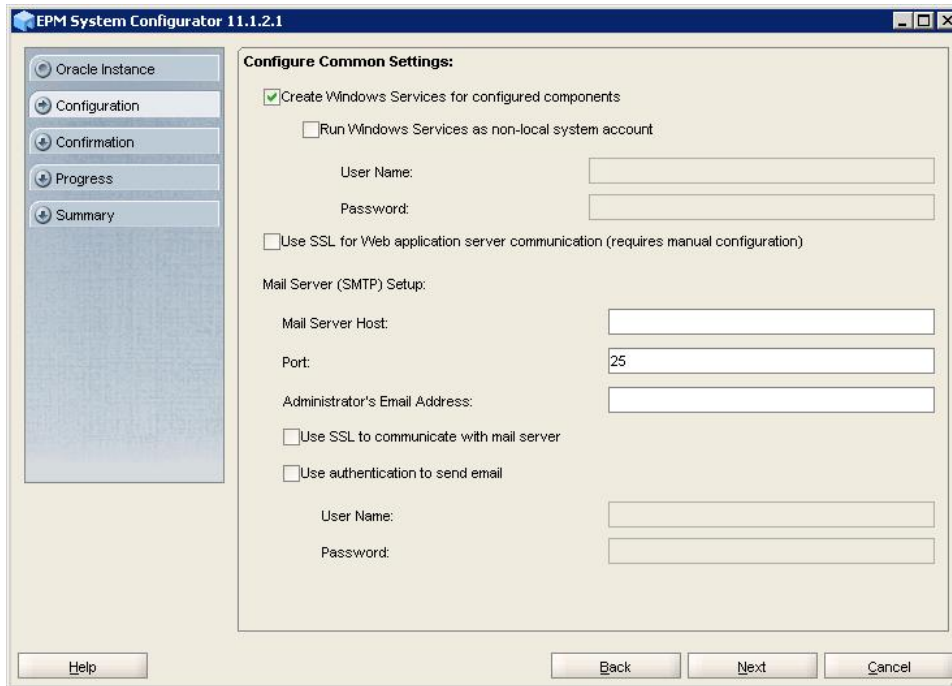

- **User Name**—Enter `epmrapid_user`.
- **Password**—Enter the deployment password.

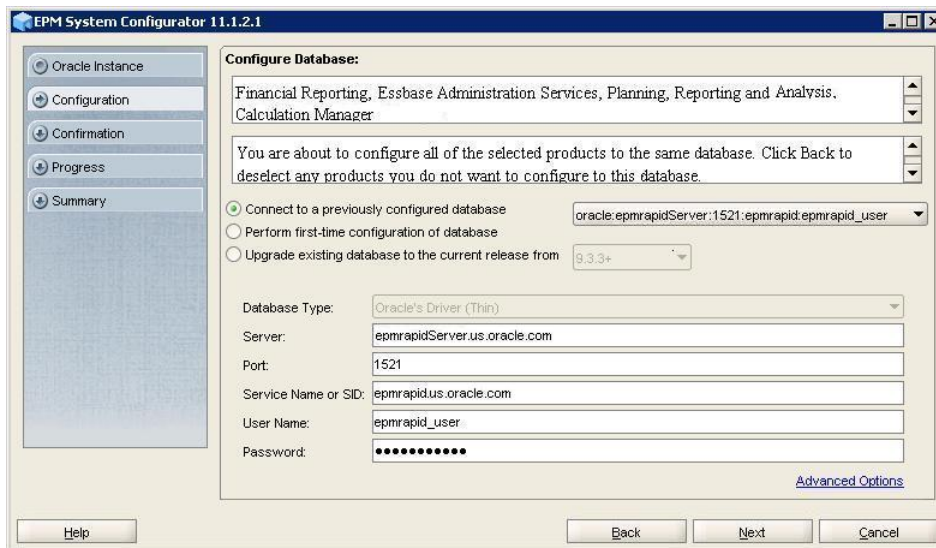

**12** In component **Configuration**, click **Next** to configure the selected products.

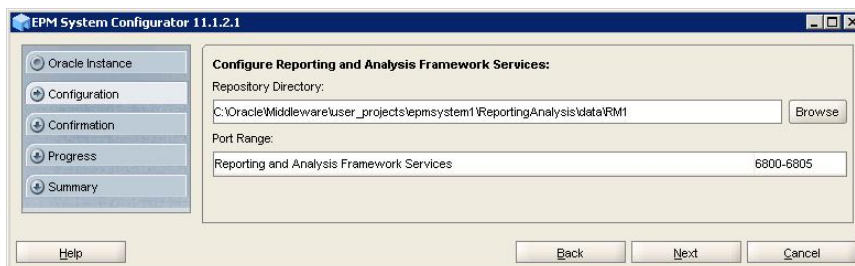

13 In **Configure Common Settings**, click **Next** to use the default values.

14 In **Configure Database**, use the default values, and then click **Next**.

15 In **Configure Reporting and Analysis Framework Services**, click **Next** to use the default values.

**16 In Deploy to Application Server - Specify WebLogic Domain Information, enter the following values, and then click Next. Use the default values in the remaining fields.**

- **Administrator Password**—Enter the deployment password.
- **Confirm Administrator Password**—Reenter the deployment password.

**EPM System Configurator 11.1.2.1**

**Deploy to Application Server - Specify WebLogic Domain Information:**

Deploy Web applications to an existing domain.

Set the language to be used by Essbase (ESSLANG):

Deploy Essbase in standalone mode

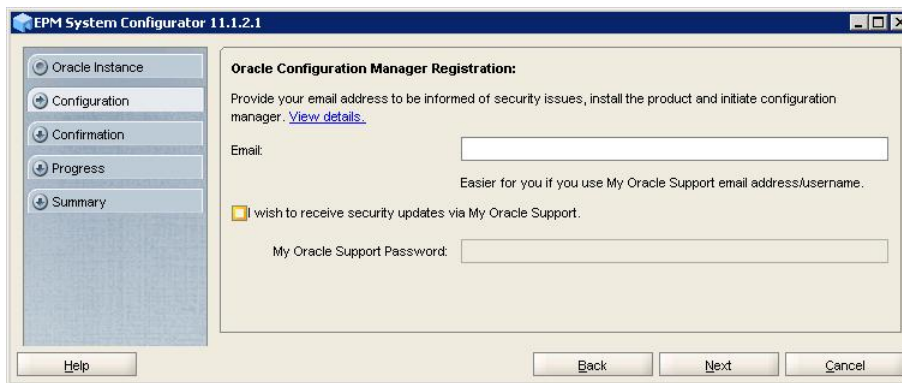

Buttons: Help, Back, Next, Cancel

19 In **Configure Web Server**, click **Next** to use the default values.

20 In **Oracle Configuration Manager Registration**, uncheck **I wish to receive security updates via my Oracle Support** and then select **Next**.

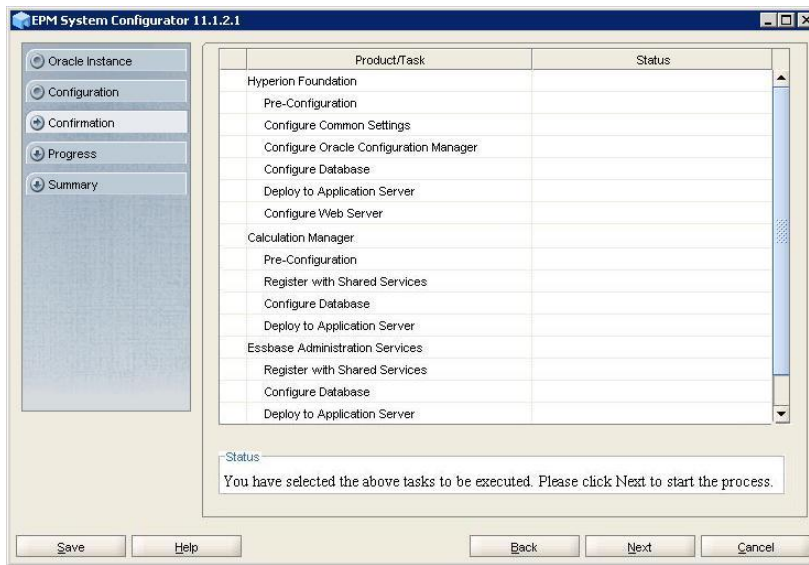

21 In **Email Address Not Specified**, click **Yes**.

22 In **Set Shared Services admin user password**, enter the deployment password in **Password** and **Re-type Password**, and then click **Next**.

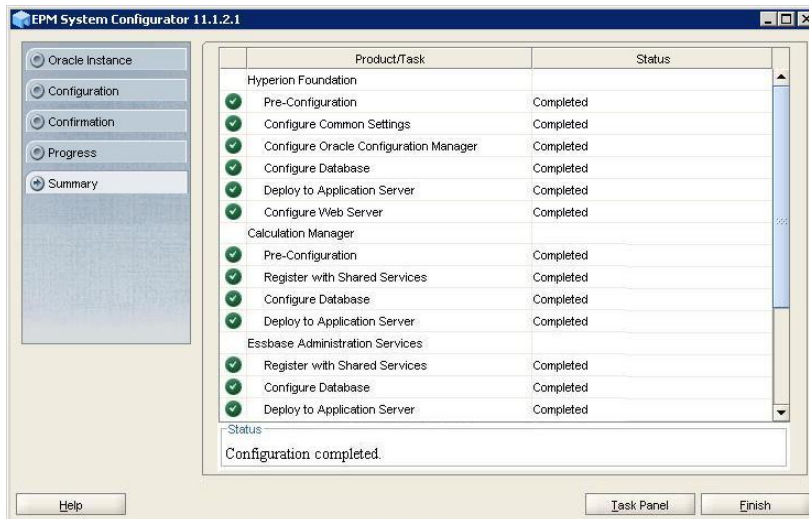

**23 In Confirmation, click Next to initiate the deployment process.**

The deployment process takes approximately 45 minutes.

**24 In Summary, click Finish.**

**25 Install Financial Reporting Studio.**

These steps install the client components for Financial Reporting Studio.

- In Windows Explorer, navigate to `EPM_rapid_unzipped\FinancialReportingStudio`, and double-click `FinancialReportingStudio.exe`.
- In **Choose Setup Language**, select a language and click **OK**.

- Click **Next** on all installer wizard screens.

d. In **InstallShield Wizard Completed**, click **Finish**.

**26** On your server, select **Start**, then **All Programs**, then **Oracle EPM System**, then **Foundation Services**, and then **Start EPM System**.

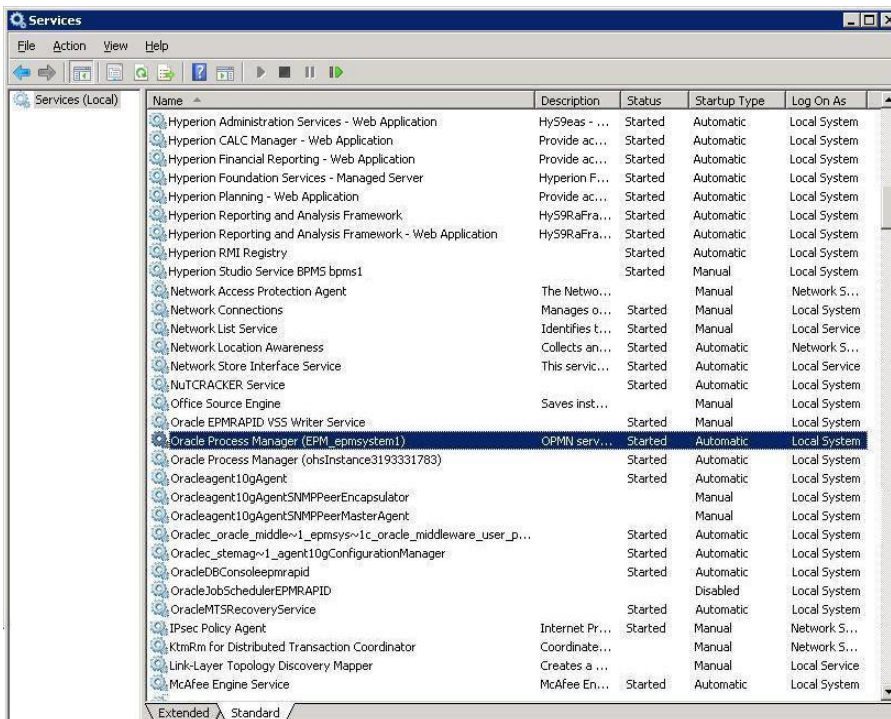

This process takes approximately 15 minutes.

**27** Confirm that processes are running by viewing Windows services.

a. On your server, select **Start**, and then **Run**.

b. In **Open**, type `services.msc` and then click **OK**.

c. In **Services**, verify that the Hyperion and Oracle services startup status match those indicated in the following illustration:

**28** Select **Start**, then **All Programs**, then **Oracle EPM System**, then **Foundation Services**, then **epmsystem1**, and then **EPM System Diagnostic**.

Oracle Hyperion Enterprise Performance Management System runs diagnostic scripts. Diagnostic Test results are displayed in your browser.

**29** Review the diagnostics report and verify that all deployed products have passed the tests. You can ignore Interactive Reporting diagnostic checks that indicate failure, because Interactive Reporting is not part of the deployment.

PASSED	HTTP: HTTP	Checking availability of HTTP context http://ADC2101474.us.oracle.com:19000/raframework/index.jsp	0 seconds
PASSED	HTTP: HTTP	Checking availability of HTTP context http://ADC2101474.us.oracle.com:19000/hr/status.jsp	0 seconds
PASSED	HTTP: HTTP	Checking availability of HTTP context http://ADC2101474.us.oracle.com:19000/vorkspace/status	0 seconds
PASSED	WEB: Permissions	All HIT entries are present in system-jazn-data.xml	0 seconds
PASSED	Single Sign-On	Checking availability of login http://ADC2101474.us.oracle.com:28080/interop/index.jsp	0 seconds
PASSED	LNK: Registry	Checking that all components in the registry have a link to host	0 seconds
PASSED	CFG: Environment	Checking whether system path variable length exceeds 2,000	0 seconds
PASSED	REG: Configuration	Checking if product has only one product node in registry.	0 seconds
PASSED	WEB: Libraries	Check if all shared libraries are targeted for application "Oracle EPM Shared Services".	0 seconds
PASSED	WEB: Web Application	Availability of Web application context http://ADC2101474.us.oracle.com:28080/interop	0 seconds
PASSED	REG: Web Server	Checking if Web Server linked to the all Web Applications	0 seconds

### 30 Verify that you can access Financial Reporting Studio.

- a. Select **Start**, then **All Programs**, then **Oracle**, then **Financial Reporting Studio**, and then **Financial Reporting Studio**.
- b. In the **Logon** screen, enter the following information, and then select **OK** to open Financial Reporting Studio.
  - **User Name**—Enter admin.
  - **Password**—Enter the deployment password.
  - **Server URL**—Enter `http://HOST_NAME:19000`. Replace *HOST\_NAME* with the name of your server.

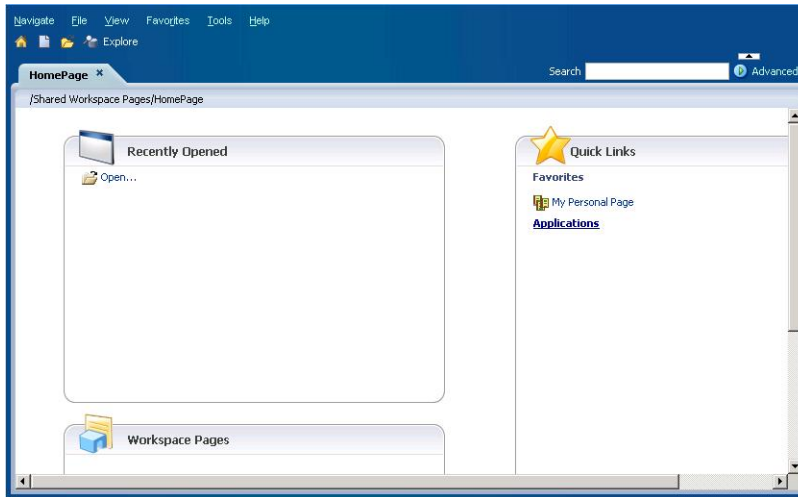

### 31 Verify that you can access Oracle Enterprise Performance Management Workspace, Fusion Edition, and Planning Administration Wizard.

- a. Select **Start**, then **All Programs**, then **Oracle EPM System**, then **Workspace**, and then **Workspace URL**.
- b. On the **Logon** screen, enter the following information:
  - **User Name**—Enter admin.
  - **Password**—Enter the deployment password.

- c. Select **Log On**.

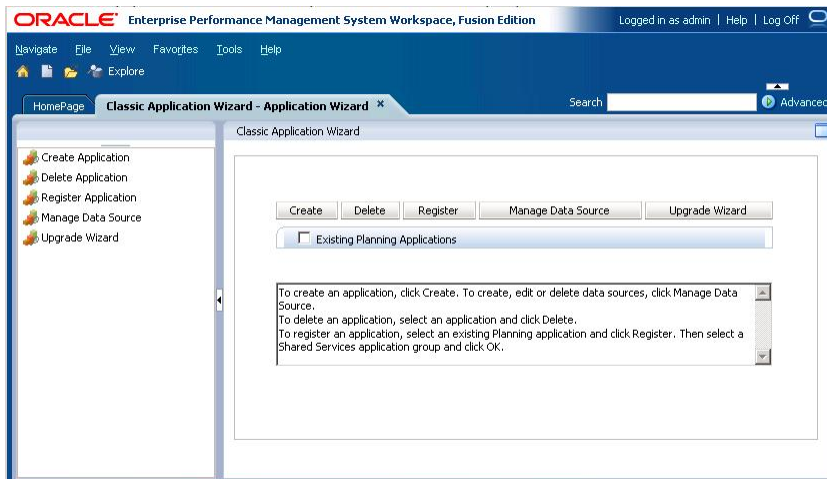

Workspace home page is displayed.

You can download and install Smart View on a client computer by connecting to Oracle Enterprise Performance Management Workspace, Fusion Edition.

- To download Oracle Hyperion Smart View for Office, Fusion Edition, in Workspace, select **Tools**, then **Install**, and then **SmartView**.
  - To install Smart View client, follow the instructions in [Oracle Hyperion Enterprise Performance Management System Installation and Configuration Guide](#).
- d. Select **Navigate**, then **Administer**, then **Classic Application Administration**, and then **Planning Administration**.

The Classic Application Wizard opens. This wizard is used for creating Classic Oracle Hyperion Planning, Fusion Edition, applications.
