Payroll – Payments Costing Real Time

Description

This subject area provides real-time information on costs of payroll payments. You can report on account types, source types, debit and credit values, and their currencies related to payroll payment details. In addition, you can report on the payroll process flow, payroll relationship details, personal payment methods to workers, legislative data group, department, and so on.

You use the Time dimension to report on the payroll payment costs across different time periods. Worker details such as job, location, business unit, and department and so on display the current data.

This subject area can be used to answer business questions such as:

- What are the various account types in payroll costs of payment?
- List the account type with debit and credit values.
- List the payroll process source type in costing of payments.
- Can I get a trend of payments costing by country and department?

The following job roles are used to secure access to this subject area:

- Payroll Analyst

The following BI duty roles are used to secure access to this subject area:

- Payroll Transaction Analysis Duty
