

PROMATIS BPM Appliance

BPM Out Of The Box

1 Business Challenge

- Ability to change is the crucial factor for success – Changing business models and strategies
- Needed flexibility requires agile instruments
- Well-defined architectural frame, which ensures compliance with enterprise-wide standards and enables for a future information-technological upgrade of the solution at any time.

2 Solution

- With Unified BPM Suite, market leader Oracle offers the most complete and consistent standard-based suite of BPM products.
- It creates a unified environment for design, development, implementation and monitoring of business processes. Powerful and perfectly coordinated products for business users and management are included, as well as for process engineers and software developers.

3 Results

- The business process and Oracle specialist PROMATIS has created a solution product with BPM Appliance™ that makes it easy for customers to get in on Business Process Management:
 - Best Practice Knowledge Bases
 - BPM Software
 - Infrastructure: software, optional hardware
 - Services: installation, implementation, training, support
