## **Announcing a Direct Links Index to Transfer of Information (TOI) Training for Oracle E-Business Suite 12.2**

Oracle offers free, online “Transfer of Information” (TOI) training on how to “Implement and Use” the new and enhanced features of Oracle E-Business Suite 12.2. We now provide a direct links index to help you quickly navigate to the TOIs you want to watch. See: [oracle.com/goto/ebs-toi](https://oracle.com/goto/ebs-toi).

Alternatively, you can visit the Oracle E-Business Suite Training TOIs [home page](#) and use the navigation controls available there to narrow in on TOIs of interest.

The short (one hour or less) TOI sessions provide release- and product-specific training targeted to product implementers. Pre-recorded by Oracle Development experts, training topics include day-in-the-life use and setup of features, as well as troubleshooting tips and best practices.

When accessing a TOI, you might be prompted to sign into your Oracle account – proceed to do so. If you do not already have an Oracle account, follow the on-screen instructions for creating one.
