

# Oracle Primavera Unifier NEC4 Contract Management Solution

Maintain contractual compliance, improve productivity across teams, and foster trust and teamwork for successful contract management and project delivery

## Complying with NEC4 requirements

Managing NEC4 contracts can be a complicated process. To effectively meet the requirements of the NEC4 suite of contracts, a collaborative and structured contract administration environment is required to:

- Manage and retain contractual communication
- Provide timely and accurate insight on cost, programme, and contract performance
- Effectively manage actions to mitigate impact on time, cost, and quality

## One solution to manage all NEC4 contracts

The Oracle Primavera Unifier NEC4 contract management SaaS solution helps organisations manage a single contract or quickly scale to handle multiple contracts for managing a full portfolio of works through a rapid deployment, offering fast time to value.

It provides a full suite of pre-configured forms, workflows, dashboards, and reports to manage multiple types of contractual communication, contractual response times, and contract changes.

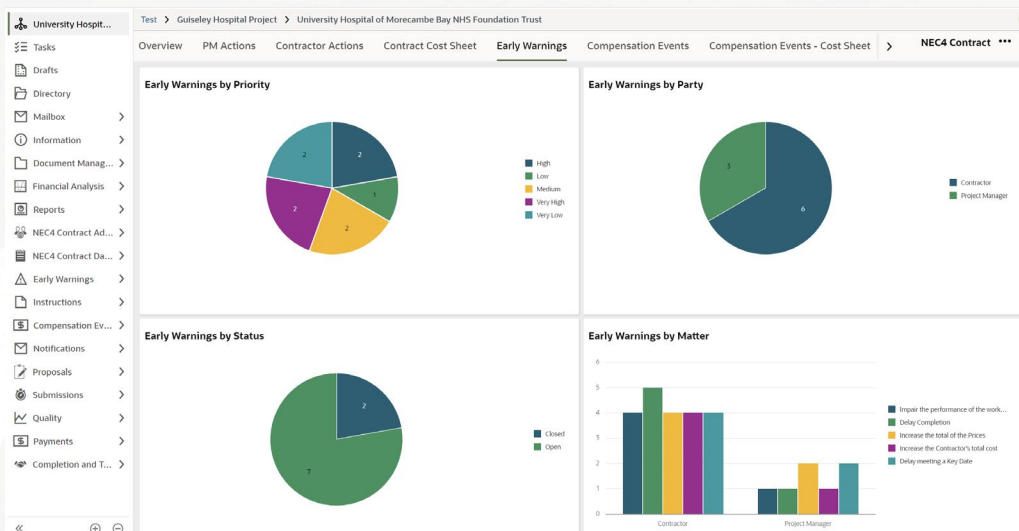

## Key business benefits

Improve collaboration and information management with the Oracle Primavera Unifier NEC4 contract management solution.

- Manage all contract information and communications in a collaborative common data environment with secure, role-based access for all portfolio, project, and contract management stakeholders.
- Leverage extensive workflow capability and ensure delegation of authority is maintained.
- Utilize pre-configured standard reports and dashboards.
- Configure additional dashboards and reports.
- Take advantage of date-stamped contract communications, providing auditability and traceability.
- Leverage detailed cost-breakdown information within the platform instead of in external documents, which ensures accurate and up-to-date information.
- Gain transparency into contract data across the project and portfolio.

## Early warnings and compensation events

- Notify parties of early warnings with actions logged and tracked to mitigate impact to time, cost, and quality.
- Manage compensation events from notification to implementation with full traceability and audit capability.
- Access interactive, visual representation of the relationships between contract communications.

## Payment applications and certification

- Leverage detailed payment applications against the activity schedule or bill of quantities (BoQ), which is broken down by cost breakdown structure (CBS).
- Take advantage of full payment workflow from application to certification with downloadable PDF certificate.
- Standardise payment applications across the portfolio for improved reporting.
- Roll up financial information including payment certificates at project level, providing visibility into all contractual costs.

## Programme management

- Leverage native integration between [Oracle Primavera P6 and Primavera Unifier](#).
- Use automated workflows to enable submission of programme and acceptance.
- Automatically feed dates from programme submissions into dashboards and reports.
- Access key and sectional completion dates that can be set, tracked, and changed via compensation events for full visibility into programme.

## Field management

- Use the Primavera Unifier mobile application to provide on-the-go capabilities to the field staff.
- Create and progress communications while in the field using an easy-to-use mobile application.
- Capture site inspections, tests, and defects directly in the field.
- Initiate and progress workflows on a mobile device in the field and have them accessible back in the office.

## Extended benefits

In addition to managing their NEC contracts, organizations can use the Oracle solution to manage their complete portfolio of projects including company-specific health, safety, environment, and quality (HSEQ) management processes and other forms of contracts outside of the NEC suite of contracts. Unlike similar solutions, Oracle's NEC contract management solution is supported by and hosted on Oracle Cloud Infrastructure and has extended benefits including open REST-based APIs, comprehensive Primavera project controls, field and document management capabilities, and an advanced mobile application to deliver exceptional value, proven success, and ease of use.
