Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

A lighting and control management system for your hotel property

Philips Dynalite System Manager is a multiuser control system management and monitoring software tool. It provides users with full visibility into lighting and energy management status and performance while also enabling local or global system adjustments.

Company Overview

With more than 25 years' experience in over 30,000 projects, Philips Dynalite is renowned for its architectural lighting control solutions across multiple segments including hotels, homes, offices, retail spaces, stadiums, and major projects.

Integration Overview

Philips Dynalite offers a full range of network devices from the award winning Antumbra user interface range, DALI 209 compatible dimmers, phase-cut dimmers, relay controllers, multi-function sensors, touch screens, integration tools, and hotel room management software.

All Philips Dynalite devices are developed together ensuring seamless and consistent network system performance.

Operating off the standard RS-485 network for its core protocol DyNet, which is open and detailed in published documentation. Systems are configured with System Builder software, showing all network messages translated in real time, allowing integrators to copy network messages directly into their own devices.

Integration Details

Integration between Philips Dynalite System Manager and Oracle Hospitality OPERA supports the following functionality:

- Check in
- Check out
- Wake up calls
- Voice mail and message light
- Room status guest requests such as do-not-disturb, make-up room, laundry pick-up
- Room maid status such as clean/occupied, dirty/vacant, inspected/vacant
