- Embedded administration and management of reports

Figure 1. One View Real Estate

The JD Edwards EnterpriseOne reporting capabilities are designed to deliver personalized access to information critical to your business processes. One View Reporting is all about delivering the right data to the right person, right now. Clear and concise views over operational activities lead to more effective decision making and improved productivity. One View Reporting's intuitive interface empowers end users with the flexibility to create personalized transactional reports without the need for IT assistance.

One View Reporting Real Estate Module

With One View Real Estate, improve insight across your real estate portfolio to ensure properties are managed with optimum capacity. Users have the choice and flexibility of reporting on their properties to match both the financial and property reporting requirements of their organization. Financial categories and other financial information as well as property categories and other property information provide users multiple

ORACLE

ways to view their properties for reporting and comparison purposes. Property managers can accurately assess the health of their business with a view of a single building's status or many buildings together at any point in time.

One View Real Estate delivers a set of high-value reports to help keep your properties on track. Reports include consolidated and detailed occupancy and vacancy reports that provide valuable information to manage your real estate portfolio. Improve bottom-line performance on properties through rent roll reporting. Minimize your vacancies through the upcoming vacancy review.

JD Edwards EnterpriseOne One View Reporting

JD Edwards EnterpriseOne One View Reporting enables end users to access data from simple to sophisticated reports using JD Edwards EnterpriseOne find browse applications with Oracle BI Publisher layout reporting and distribution features. One View Applications combine essential transaction data and master data, including associated descriptions and category codes, previously not available. Users can view data in the exact layout they want using all the advanced capabilities of Oracle BI Publisher. One View Reporting provides a large library of predefined reports designed to answer the most common business questions. Delivered reports can be personalized by end users as needed and additional reports can be defined without IT support. The complexity of data models, table joins, and business views are masked from the end user to ensure intuitive reporting experiences. One View Reporting provides users a simplified and clear view of the essential data necessary to effectively execute business processes.
