

Integrate Cost and Schedule Management with Oracle Primavera Solutions

Automate and unify your cost, contract, and schedule management to increase forecast accuracy, improve measurement of project progress against schedule, boost visibility into the impacts of proposed changes on cost and schedule, and reduce risk and surprises

Break down silos to build up success

As the long-running industry standard for planning and scheduling, Primavera solutions from Oracle give you the capabilities to confidently optimize resources, manage the critical path and dependencies, and give you the tools to monitor and manage your schedule health. As part of the [Oracle Smart Construction Platform](#), [Primavera P6 Enterprise Project Portfolio Management](#) and [Primavera Unifier](#) project and asset management are natively integrated to provide a unified and comprehensive project controls solution.

The unparalleled power of the Primavera resource management and scheduling solution is united with Primavera Unifier project and asset management, having more than 20 years of proven success across 40+ countries and supporting over \$500B of capital budget.

Native integration between Primavera P6 and Primavera Unifier

The native integration between Primavera P6 and Primavera Unifier ties the cost breakdown structure to the schedule activity sheet to provide a holistic view across cost and schedule. As part of the 1500+ strong Oracle industry development team, the Primavera P6 and Unifier teams work together, taking integrations into account and ensuring coordination related to product updates.

Connected data increases forecast accuracy

Continuous visibility into the time-phased baseline against the current forecast across all projects lets project teams and management make timely data-driven decisions, take proactive action, learn from project to project, and use their knowledge to improve forecast accuracy, decreasing risk and associated contingency.

Visibility into cost and schedule impacts of proposed scope changes decreases repercussions of those changes

Using scenario planning capabilities, various proposals can be assessed, taking into consideration the cost and schedule impacts of each scenario. Taking the guesswork out of decision-making reduces the impacts of changes and improves project outcomes.

The Primavera integrated cost and schedule solution enables:

- Funding and budget management
- Schedule-based cash flow management
- Resource management
- Critical path method (CPM) scheduling
- Scenario planning
- Contracts and procurement management
- Change management
- Document and drawing management
- Project administration
- Progress measurement
- Close-out management
- Preventive and corrective maintenance
- Warranty administration

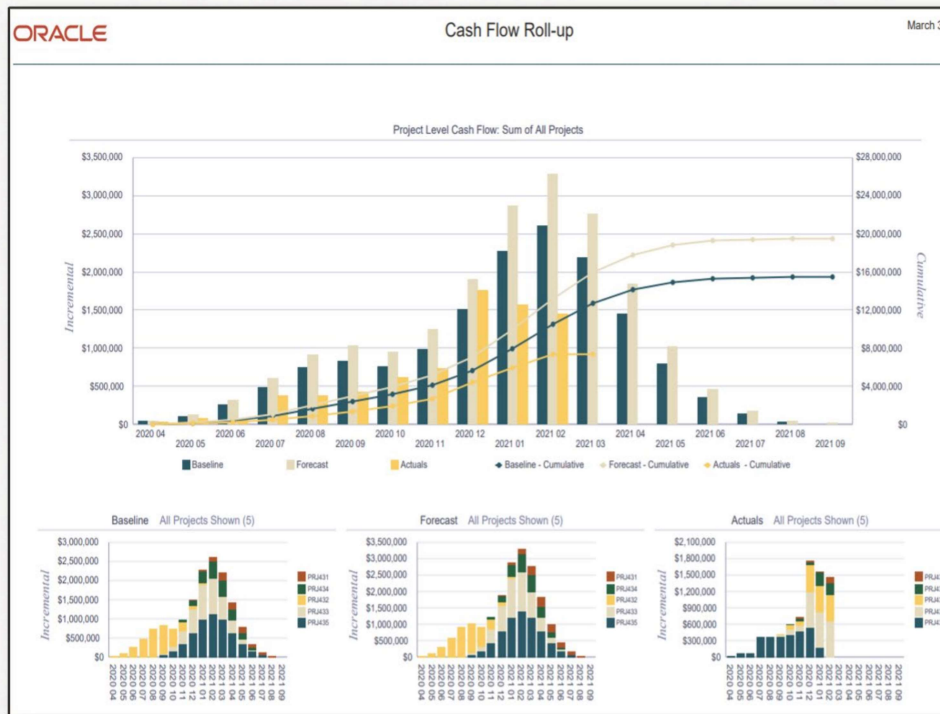

Integration creates a holistic view of time-phased progress against plan

The connection between the cost breakdown structure (CBS) in Primavera Unifier and the Primavera P6 activity sheet provides a holistic view of time-phased progress against the plan.

Project managers and team members can easily access and keep track of the project schedule and progress without needing access to Primavera P6. They also don't need to wait for updates from schedulers. By accessing the Primavera Unifier activity sheet, project managers and team members can see schedule and progress information fed in from Primavera P6, enabling proactive decisions and actions.

Key business benefits

- Increase forecast accuracy to reduce contingency
- Re-allocate funds in a timely manner
- Improve measurement of project progress
- Decrease impact of scope changes
- Reduce project risk
- Reduce number of surprises on projects
