

# Do you know about:

the new **actionable infolets**?

and their role in effective and efficient, task-based processes?

## You can do more with actionable infolets!

- **Deliver a smarter, more friendly** user experience

- **Make it quick and easy** to perform common actions

- **Show users** their most relevant information at a glance

- **Reduce time** looking for and updating data

### Administrators

can easily implement Actionable Infolets to support common information requirements and actions. See the [Actionable Infolets](#) chapter of the Implementing Sales guide.

### Users

can immediately use Actionable Infolets to take quick action on the information most relevant to them. Check this tutorial video including the use of Actionable Infolets in a [Task-Based Home Page](#).

## Tremendous benefits:

Minimize time to complete common actions

Focus on the most critical selling activities

More productive sales processes

More successful and satisfied users

Try it and let us know what you think:
