

Do you know
about...

the new CX Sales Mobile
app with optimized sales
workflows?

a mobile user experience
that is modern, seamless
with the application?

You can do more with the new **CX Sales Mobile** app!

- Access Adaptive Search capabilities and saved searches in the mobile app for consistent, effective cross-platform search and fast interactions
- Use mobile app's offline and online modes to instantly access and manage information anytime, anywhere
- Get a quick 360-degree view of a business object – its summary, key, and related information
- Use QR code to allow your users to easily sign in
- Scan business cards to create contacts or leads – card information is automatically added

Administrators can register for and implement the CX Sales Mobile app, including configuring the app settings. For information, see the [Mobile Applications](#) chapter in the Implementing Sales guide. To transition from the classic Sales Cloud Mobile and CX Cloud Mobile apps, see [Transitioning to the new CX Sales Mobile App](#).

Users can sign in and manage their sales tasks using the new CX Sales Mobile app. For all that you can do, see the [Mobile Applications](#) chapter in the Using Sales guide.

Some benefits...

Modern intuitive Redwood experience designed to drive productivity

Action-based home page to easily track Sales tasks

Optimized workflows for faster, more efficient sales interactions

Consistency across mobile and workspace for seamless user experience
